

The Markets.

Barley.

Is Toronto the market is dull, although quotations are improving. Enquiries are occasionally heard for feed, and on Monday several cars were sold west. The stock in store are 69,036 bushels, against 59,056 bush. last week, and 47,111 bush. at the corresponding date last year.

The visible supply in the United States and Canada is 239,400 bush., against 673,000 bush. in 1893 and 536,000 bush. in 1892.

At Oswego Canada barley is reported unchanged, prices being merely nominal on an absence of sale. The shipments for the week were 15,000 bush.

MARKET PRICES.

Toronto, malting	\$9 15 to \$9 18
do. feed	8 40 to 8 45
Montreal, malting	9 25 to 9 30
do. feed	8 40 to 8 45
New York State six rowed	48 00 to 48 75
do. two rowed	47 00 to 47 50
Western	47 00 to 47 50

Hops.

The Licensing Wof, of London, reports that "a fair business for the time being continues in English and Pacific. Stocks of all kinds are exceptionally low, and consequently prospects of the new crop will be watched with more than ordinary interest. In the meantime, the good growths of English remaining in first hands are held firmly at very full values, and imports for America continue light, as the currency there is higher than in this market. Continental markets (except Belgium) are still considerably above ours, and are reported higher on the week for the finer qualities."

Messrs. Hand & Co., of London, Worcester and Wolverhampton, report that there is no feeling to report on this market. Very little deal at recent quotations, and plantation accounts are still favorable. Foreign and Continental markets are inactive and unattractive. "Y. Y. Hamilton, N. Y., Scotland reports: "Less than a hundred bales have been marketed here since the last report. Lealand & Tanager reporting the purchase of 65 bales at the exceptionally low rates that have ruled for several weeks. Plantations have now done sufficient work in the yards to confirm what has long been believed—that the plants wintered uncommonly well, and are very promising. Of course there are exceptions. A scarcity of roots is noted locally, and there appears to be a demand for those of the cluster variety. A quantity of Canada roots have been shipped."

From Belgium it is reported that there is shortage of hops, as the country can not get a supply from Germany. All countries in Europe are turning their eyes to America as the only resource for source of supply until the crop of 1894 is ready for the market. They propose to buy direct, and thus save the large commission asked by English dealers.

From New York State it is reported that growers are busy in their yards and the few holders of hops among them seem to be content to wait for further developments. The warm weather has brought the vines out of the ground and they are growing fast. Grubbing and pulling are under way. Tying will be in order in another week.

The New York Bulletin says: "German advices were somewhat better. Along with recent reports of improved tone in the London market this served to give a more favorable superficial aspect to the general situation, as far as European interests are concerned. There was no increase in export inquiries here, however, nor business between dealers that would import more substantial support to the market on this end of the line. Interior

holders of particularly fine growths stand out very firmly, however, for prices above those at which the bulk of recent business in similar goods has been effected, and are not so much influenced by the relatively lower prices at which other grades are secured or the very moderate prices at which both local and interior dealers are selling to home brewers."
