B. GREENING & Co.

HAMILTON, CANADA.

BURNELL'S

FOUR-POINTED GALVANIZED STEEL BARB WIRE FENCING

There are now before the public a number of Pointed Barbs, which to the casual observer, and appearance to the Burnell Barb which we make, close examination of them will show the difference.

The Grand Trunk Railway Company of Canada preference over all others, and have contracted with over one hundred tons of fencing for immediate delivery.

We claim superiority for our Barb Wire for the following reasons: 1st.—We use only the best quality of Galvanized Steel Wire.

2nd.—The two strands of No. 12 Wire are twisted together just enough to allow for the contraction and expansion of the metal, caused by heat and cold, and so as to injure the structure of the steel.

3rd.—The Barbs on our Wire are four-pointed, always presenting a Barb laterally or at a right angle, is a great advantage over the Two-Barb Wire, which is unable to get against the fence to break it or push it.

4th.—The Barbs are fastened to the Wire at intervals of 7 inches, in a manner entirely different from any other, so that the Barbs are not liable to break, and cannot slip or move toward each other, and thus prevent the untwisting of the cable should either wire break.

5th.—The machinery by which the Barbs are made is perfect, so that the Cable Wires are not injured by the process, as is the case with other Four-Barb Wires.

Manufactured by the CANADA WIRE COMPANY, Montreal.

THE TUPPER GRATE BAR.

Thoroughly tested and approved. One set will save several of any other kind, and save a large amount of fuel. For steamboats, stationary boilers, etc.

H. B. IVES & CO. Founders & Hardware Manufacturers, Quebec.
