

SOME AMERICAN
PHONOGRAPHERS.

IN MUNSON'S SYSTEM.

MR. JAMES E. MUNSON.

INVENTOR OF THE MUNSON SYSTEM OF PHONOGRAPHY

GRAPHY

The page contains two columns of shorthand notation, likely representing the Munson System of Phonography. The notation consists of various symbols, including letters, numbers, and special characters, arranged in a structured manner. The symbols are written in a cursive, flowing style, typical of shorthand systems. The notation is organized into rows, with some rows containing multiple symbols. The symbols are arranged in a way that suggests they are meant to be read and interpreted as a shorthand representation of spoken language. The notation is presented in a clear, legible format, allowing for easy comparison and analysis of the system.
