PROF. HENRY G. VENNOR,

Dear Sir:—I hand you herewith a table giving the amount of rain and snow fall by months for the past forty-one years. The column which is designated "inches rain," includes the melted snow. You will notice there is a break in 1872, as far as I can learn, no record was kept during that part of the year not given. You can make whatever use you desire with the table.

Yours respectfully,

J. BRAINERDT HALL.

WORCESTER, Mass., May 20, 1882.
