

A NEW REFRIGERATOR.

The fertile and inventive brain of J. D. Pennington, the general manager of the Valley City Seating Co., Dundas, Ont., is over busy, and its latest production is a refrigerator which bids fair to supersede all others which have been placed on the market heretofore and laud its inventor among the millionaires of our country. There are several new features connected with this refrigerator, but the one of most importance to its user is the ease with which it can be cleaned. Every part of the interior can be taken apart, leaving nothing but the bare wooden frame, and after being cleaned a child can put them together in from three to five minutes—and it will be known as the New Century refrigerator. Mr. Pennington, after exhibiting a model to a representative of one of the largest exporting and importing firms of Great Britain, is now in direct correspondence with the view of having them take the complete control and handling of the entire demand for export trade of Europe, India, Africa and Australia. He also has an offer from a gentleman in Toronto, as follows: The assignment to him of a half interest, Mr. Pennington retaining Canada and the United States; he will go to all the expense of patenting the article and registering the name in Great Britain, France, Germany, Australia, Spain, Italy, Austria and South Africa, and guarantees to look after the business in these countries and the management of the same, Mr. Pennington only being required to see personally to the inspection of the finished article as it leaves the works.—Dundas Banner.
