

'King' Radiators

The Most Perfect Steam and Hot Water Radiators on the Canadian Market, in Build, Rating, Design and Ornamentation

T

HE "KING" RADIATOR is *honest* in build, *rating* and *design*, is a screwed nipple radiator, and we *guarantee* every section to have the full amount of *rated surface*. Measure the "KING," then compare with others.

"KING" RADIATORS are the most *graceful* and *artistic* heretofore produced, in both plain and ornamental designs. They are handsomely built, aesthetic in proportions and the *relief ornamentations* are such as to adapt the "KING" to various combinations in color decorations. The ornamentation is *Raised*, not *Sunk*.

In "KING" RADIATORS the same style of ornamentation reigns supreme, so that in every installation, whether comprised of 2, 3, 4 column, or wall radiator, the ornamentation will be found absolutely consistent throughout. This is a distinguishing feature of the "KING."

"KING" RADIATORS are made in the best and most modern equipped radiator plant on the continent, in which are employed the most skilled workmen. The superior quality and smoothness in finish of the castings used in the "KING" is a feature of great importance.

The "KING" RADIATOR, scientifically, practically and mechanically, is a *MASTERPIECE*.
