

Miscellaneous.

The yearly loss in wages in Great Britain through ill-health is \$55,000,000.

It is claimed that 3,000,000 song birds were killed last year for the purpose of adorning women's hats with their plumage.

The smallest watch in the world has just been completed by some Bombay jewelers. It is not larger than a two anna bit (about the size of a dime), and has the most perfect jeweled lever movement and a fully-compensated chronometer balance.

"Do you think," said the intellectual young woman, "that there is any truth in the theory that big creatures are better natured than small ones?" "Yes," answered the young man, "I do. Look at the difference between the Jersey mosquito and the Jersey cow."

The gold-beating industry is threatened with extinction by the Swan process of preparing gold leaf. This consists of depositing a thin coating of gold upon a copper space and then dissolving the base by submission to perchloride of iron. It is stated that the leaf may by this means be made of the thickness of 1-4,000,000th part of an inch.

The tastes of great men differ. Prince Bismarck recently said to a visitor that he had only one serious complaint to make against old age, and that was that he had been obliged of late to abstain almost entirely from tobacco. On the other hand, Gladstone has become very sensitive to the odor of tobacco in his old age. He dislikes it intensely, and the surest way to obtain his antagonism is to go into his presence with the odor of a cigar or pipe on your person.

THE MUTUAL LIFE INSURANCE

COMPANY OF NEW YORK

RICHARD A. MCCURDY PRESIDENT.

Send to DR. RADWAY & CO., 410 St. James St., Montreal, for Book of Advice.

Minard's Liniment Lumberman's Friend

The possibilities of modern aseptic surgery seem well-nigh boundless. It stops at nothing, even daring to remove the greater part of important organs whose preservation intact has generally been regarded as necessary to life. Thus, large portions of organs like the brain, liver, and lungs, and the entire kidney and spleen have been removed. A recent case, in which nearly the whole stomach was removed, to get rid of a malignant growth, is reported in *The Medical News*, Philadelphia, February 16th. Says *The News*: "The newly formed stomach had a capacity corresponding to the volume of a hen's egg. . . . After the third day the patient was able to take meat, and when dismissed after the lapse of several weeks she had gained twenty-two pounds in weight, although in the interim she had been attacked with pneumonia."
