**Contact: Robert Jean,  
President**

St-Jean Port-Joli, on the picturesque St. Lawrence River, has a long tradition of manufacturing handcrafted items, and Sculpture Caron is a part of that heritage. Ours is a happy marriage between traditional sculptured art and objects useful in everyday life.

Our workshop features the creations of master carvers. Their products include figurines, bas reliefs and animal sculptures, along with lamps, clocks, barometers and many other practical objects, all with carefully hand-sculpted casings.

Our materials are linden wood and walnut, and our inspirations are folklore and history.

Traditionally, our markets have been local tourism gift shops and company incentive programs. We have developed the capacity to expand our horizons, and are seeking new market opportunities.

Manager**

True sensuality is more evocative than provocative. Secret Garden's desirables both delight and decorate. Secret things that scent and seduce — like glorious sachets and satin perfumed pillows. Things like scented stationery, cards and soft satin shoe stuffers.

Our indulgences recall gentler times. Satin padded hangers are fitting rewards for that "dress for success". Beautiful lingerie bags slip from bureau to valise for business trips. Lace organizers help to sort, and to scent. Rosebud scented drawer liner and handkerchief trim cotton tissue holders decorate drawers and pretty purses.

Colours reflect classic femininity. . . from pastels, to pristine white and melting French vanilla. Colours that fade to become more delicate and scents that persist subtly. A memory. This is Secret Garden.

Our success reflects a demand for exquisitely executed luxury items for women of all ages. Available at fine stores, Secret Garden brings better days into any woman's home and heart.

*Indulgences for contemporary women of all ages both pamper and delight.*
