- (b) Data on any unintended effects in aquatic plants, invertebrates, fish, seabirds, marine mammals, endangered species, other biota, water quality, the seabed, or habitat of non-target organisms, including sensitive and representative organisms:
  - acute toxicity;
  - chronic toxicity;
  - developmental and reproductive toxicity;
  - endocrine disruption;
  - sediment toxicity;
  - bioavailability/biomagnification/bioconcentration;
  - food web/population effects;
  - observations of adverse effects in the field/fish kills/ strandings/ tissue analysis; and
  - residues in seafood.

These data shall relate to one or more types of non-target organisms such as aquatic plants, invertebrates, fish, birds, mammals and endangered species.

- (c) Data on the potential for human health effects (including, but not limited to, consumption of affected seafood).
- (4) A comprehensive proposal shall include a description of the methodologies used, as well as any relevant measures taken for quality assurance and any peer review conducted of the studies.
