ATLIN MINERS IN TROUBLE.

Rotten Regulations Are Delaying the Work of Developing the Rich Creeks

AND TOO MUCH CLAIM-JUMPING.

No Man Knows Where He is At Just Now, According to The World's Correspondent.

Lake Atlin, B.C., June 15.—(Special Correspondence.)—At last I have a chance to write a little intelligently upon the situation in Atlin, both from a mining standpoint as well as a political one. We have here in this district one of the finest countries in British Columbia, a district that, to my mind, will become one of the greatest hydraulic mining countries in the world, not to say anything about the possibility of there being rich quartz discoveries made in this vicinity in the near future. Already many quartz ledges have been recorded, showing free gold, but as yet, of course, little prospecting work has been done.

Creeks That Pay.

Many of the creeks have turned out very well, notably Pine, Spruce, Boulder, Moose, Otter, Monroe Creeks. A 14-ounce nugget was taken out of Pine Creek last week, and several thousand dollars in gold has been already turned into the three banks here.

Reports are coming in daily of new strikes, and, although I do not think this district will ever touch the Klondike or be a poor man's camp, I certainly do think a great amount of gold will come out of the district when once capital is given a chance to operate.

At present 100 feet is not enough ground generally to work profitably, and many creeks will not pay for sluicing at all, but would pay large profits if worked in a large way by hydraulic companies.

Were the miners allowed to work groups of claims as a company or syndicate, good returns would result on many creeks.

How the Law Stands.

As the law at present stands, each individual claim must be represented by at least one man. In this way more men are required than are necessary for the actual work.

Another grievance, and one that is now causing untold litigation, and is apt to cause serious trouble, is the jumping of claims. No matter how many wish to record the same claim, they are at liberty to do so, provided they pay over to the records office the inevitable $2.50. The recording fee paid, almost immediately a lawsuit ensues, and the claim is tied up awaiting the arrival of the judge who has been promised six months' vacation, and upon whose shoulders will devolve the duty of deciding the ownership of these claims.

Many Claims Lying Idle.

In this way many good claims are lying unworked, and right at this time, when the mining season should be in full blast.

Want Regulations Repealed.

Last week a mass meeting was held here, and a petition drawn up, praying for a repeal of these regulations, the early appearance of a judge, and that the Government would allow the country to be open for capital to come in and invest, not foreign capital especially, but any capital. As things now stand, no mining license will be issued to any company whose Board of Directors are not resident in British Columbia. So, you see, you Toronto capitalists can expect little room here for investment until these laws are altered.

On May 17 the Government auction of town lots took place, lots selling freely at from $100 to $1000 above the Government upset price of from $100 to $400 for front lots.

No one here can feel sure of his claim for 24 hours, no matter how rich it may be. Some jumper may record it and have it tied up.

Now, I think I have told you in as few words as I can something of the situation here at present.

Slow Mails.

The steamers are commencing to arrive, bringing in their new arrivals and occasionally some mail matter. Any old thing can drift in here on a raft, but it takes our Government a long time to run a mail service. The usual long string of mail waiters are to be seen outside the postoffice after the arrival of each mail.

Officials Doing Their Best.

As to our officials here, there are all kinds. They are doing their very best to oblige the people, and are very popular, but their hands are tied down to the unjust and scandalous manner in which the country is being administered at Victoria.

We have two wharves, two churches, about 30 hotels, and many other places of business, and hundreds of houses are going up. The lumber is being supplied by three sawmills.

Harold W. Ebbs Canavan.

Promising Gold Mining Outlook.

"What is the present outlook for gold mining in Canada?" said a World reporter yesterday to Mr. Clarke of Clarke & Co., the well-known mining brokers.

"It never was more promising," was the reply. "You see," continued Mr. Clarke, "it has now been fairly under way for about three years and the percentage of failures is less than in any mining country with which we are acquainted. In 1807 the Klondike excitement diverted attention from the nearer and more permanent quartz lodes, and in 1898 we had the Spanish-American war, which left things in a more or less unsettled state. But at last we have got down to real business. The rush speculation of 1896 is still something of a burden upon legitimate mining, but it is being gradually thrown over and people are beginning to see that the judicious employment of capital in mining will give greater returns than in any other line of enterprise. It is safe to say that the large capital that has been invested will double itself in five years, besides paying good interest in the meantime, and that even where it has been used to exploit the refractory sulphide ores of the Trail Creek district.

"The free-milling deposits, though perhaps not so extensive or permanent, turn into money much quicker. We are well within the mark in saying that Lewis A. Hall, with an investment of $118,000 in Golden Star, came out with his capital intact besides a net profit of $250,000 in less than two years, and that mine does not at the present time owe on capital and expense account the sum of $25,000.

"But do not misunderstand me," said Mr. Clarke, after a pause. "Do not run away with the idea that gold is to be had for the mere picking up. Mining is a business requiring care, experience, attention and capital, just as much as any other. Nothing is easier than to lose money in an alleged gold mine, and there is perhaps no business in which the temptation to fraud is so great. The fakirs found here a tempting field when our people first realized the great mineral resources of the country in 1896. But now the public are not only much more discriminating, but much more competent to decide upon the merits of a 'proposition.'

"The industry can and should be conducted in such a way as to be eminently profitable; then it will be permanent and will add vastly to the wealth of the country and of the individuals engaged therein.

"I firmly believe that our mineral resources are equal, if not superior, to those of any country in the world, and it requires only the intelligent direction of capital to bring us into the very front rank before another ten years go by."

Of Interest to Hamilton People.

A daily review of the market will hereafter be posted up in the office of Wilson Barr & Sons, Sun Life Building, Hamilton, giving a full account of each day's transactions, which should keep Hamilton investors in thorough touch with this market.

Cox and Jaffray in the West.

Fernie Free Press, June 24: Mr. Robert Jaffray, vice-president and managing director of the Coal Company, who has been in town for the past couple of weeks, leaves early next week for a run through West Kootenay and the Boundary District, where he has important interests. He will, however, in all probability, return in a few weeks' time to meet Senator Cox at Fernie. As this will be the first visit of the Senator to the West, he cannot fail to be deeply interested in our progress, and will be heartily welcomed by the community he has helped so largely to establish.

Senator Cox left for Fernie, B.C., yesterday.

THE LAKE SHORE DEAL.

Group at Moyie Has Been Taken Over by the Canadian Gold Fields —Company Meets To-Day.

Rossland Miner, June 24: Mr. J. C. Drewry has returned from Moyie, whither he went with Dr. R. J. Wilson of Toronto, president, and Alexander Pridham of Granville, vice-president, of the Canadian Gold Fields Syndicate, and E. P. Heaton, general manager of the Guardian Life Insurance Company of Toronto, for the purpose of taking over the Lake Shore group at Moyie. Dr. Wilson and Mr. Pridham went to the coast, whence they will leave for the east within a day or two. Mr. Heaton returned with Mr. Drewry. Mr. Drewry was seen yesterday, and stated that the property had been taken over and that operations would be pushed with the utmost energy. He also stated that he had ordered a complete seven-drill compressor plant from James D. Sword, M.E., the agent in British Columbia for the James Cooper Manufacturing Company of Montreal. This plant will be a model one in every respect, and will be built under Mr. Sword's directions, he having contracted to put the plant in running order. The plant consists of an Ingersoll-Sergeant air compressor, a 100-horse-power boiler, receivers, condenser and a full complement of drills and pumps, etc. This will be the largest plant in East Kootenay. There are four other plants there. These are at the North Star, Sullivan, St. Eugene and Thunder Hill mines.

There are eight claims in the Lake Shore group, located on Lake Moyie, which is an ideal situation for a mine. The veins are from 4 to 13 feet in width, the vein-filling being of quartz and highly argentiferous galena. Shipments have been made from the property, and net over $600 to the carload above all expenses. The Crow's Nest Railway, which will be the main line of the C.P.R., passes over the property, and within 100 feet of the proposed power plant. No better situation for a large mine could exist, there being unlimited timber and water upon the properties, and a railway at the mouth of the main tunnel. The topography of the principal claim is such that chutes can be run from the mouth of the tunnels to dump into the railway cars below. Mr. Drewry was very fortunate in securing this valuable property, as there was considerable competition among mining men to get an option upon it. The price paid was in the neighborhood of $90,000, and many engineers who have visited the property believe that sufficient ore can be mined from it to pay for it within the next few months, and that it is destined to be one of the largest silver-lead producers in East Kootenay. This valuable acquisition of the Canadian Gold Fields Syndicate should have a marked effect on the price of its stock. Mr. Heaton, in speaking of the property yesterday, said that the Lake Shore group was destined to make the stockholders of the company rich. Mr. Heaton also visited the Sunset No. 2, in this camp, and said he was greatly pleased with the appearance of that property.

Mr. Drewry will leave to-day for Toronto and Montreal, to be absent for three weeks. One of the purposes of his trip to the east is to attend the meeting of the directors of the Canadian Gold Fields Syndicate, which will be held in Toronto on July 4.

A Natural Soap Mine.

A natural soap mine is one of the latest mineral discoveries in the Northwest.

Several soda lakes have been found in the foothills near Ashcroft, B.C. Their bottoms and shores are encrusted with a natural washing compound, containing borax and soda. No two analyses agree exactly as to the composition of the material. A New York analysis gives 26 per cent. borax, while a Montreal chemist, from the same sample, gives 16 per cent. borax.

Tests prove the substance to be equal to the best washing powders in common use for cleaning purposes. It is also said for cleaning purposes. Trials by blacksmiths and farm workmen show that it will remove grease and dirt quicker than soap. After many such tests a syndicate of British Columbia men has been formed to put the product on the market. One of the members is now in New York for the purpose.

About 275 tons of the compound have been cut and taken out of the lake. It is handled precisely as ice is handled. The blocks are nine inches in thickness, and are sawed in blocks, weighing 50 pounds.

Deer Trail No. 2.

The advance of Deer Trail No. 2 continues, and there seems to be no prospect of an immediate end to the boom. A bid of 25 failed to secure any stock this morning, and unless the unexpected suddenly happens, there is little doubt that the stock will soon reach 30 cents.

Toronto is largely responsible for the present boom. Most of the loose stock on the local market has been picked up, and is now held in the Canadian mining centre. As a result there is very little stock for sale in this city, and it has been a comparatively easy matter to send the quotation booming up. The property of the company never looked better than at the present time, which circumstance also tends to assist the boom.

Telford Yukon Expedition.

From letters just received from the manager of the Telford Yukon expedition, dated May 25 and June 6, the success of this company is now assured, one of their claims on Hunker Creek being proved very rich indeed, the adjoining claim having been sold for $250,000; another claim on the same creek, near by, having had $65,000 in gold washed out in three days. The claims on Thistle and Blueberry Creeks owned by the company were also proved to be very valuable, but the season for working them is now over, and all the men hard at work at the bench claims on Hunker Creek, which can be worked all summer.

A few specimens of gold were enclosed in one of the letters received by Messrs. Parker & Co. and are on exhibition in the window of S. J. Sharp, 80 Yonge-street. It will be worth your while to stop and have a look at them.

"Nerves." Have you any "nerves" about you? Are they shaky sometimes? Hutch Tablets will steady them. Ten for 10c.

Friends Give Up Hope.

Saratoga, N.Y., July 3.—Bishop Newman's friends have given up all hope of his recovery. The Bishop appears to be sinking rapidly.

Honest Advice Free to Men.

All men who are nervous and debilitated or who are suffering from any of the various troubles resulting from overwork, excess or youthful errors, are aware that most medical firms advertising to cure these conditions cannot be relied upon. Mr. Graham, a resident of London, Ont., living at 437½ Richmond-street, was for a long time a sufferer from the above troubles, and after trying in vain many advertised remedies, electric belts, etc., became almost entirely discouraged and hopeless. Finally he confided in an old clergyman, who directed him to an eminent and reliable physician, through whose skilful treatment a speedy and perfect cure was obtained.

Knowing, to his own sorrow, that so many poor sufferers are being imposed upon by unscrupulous quacks, Mr. Graham considers it his duty to give his fellow-men the benefit of his experience and assist them to a cure by informing anyone who will write to him in strict confidence where to be cured. No attention can be given to those writing out of mere curiosity, but anyone who really needs a cure is advised to address Mr. Graham as above. 25

WILL FIGHT IT TO A FINISH.

An Attempt is Now Being Made to Prevent the Ongiara From Running on Sunday.

ONTARIO ACT WILL BE TESTED.

People of Niagara Don't Want to Lose Their Only Traffic Convenience on Sunday.

Capt. Hugh McIntyre of the steamer Ongiara of the Niagara Navigation Line has been summoned before the Police Magistrate at Niagara for alleged violation of the Lord's Day Act in running the steamer on Sunday on the Niagara River between Queenston and Lewiston and Lewiston and the town of Niagara. The case comes up to-morrow at Niagara. The information was laid by a ferryman, who conducts his own business on Sunday, it is said, but claims the right to do so as a ferryman.

The Captain intends to contest the matter and, among other grounds, will urge that the portion of the Ontario Lord's Day Act which attempts to prohibit Sunday excursions is not one within the competence of the Ontario Legislature. The Dominion Parliament alone can pass such an act. The Lord's Day Act was in force at the time of Confederation and cannot be extended by provincial legislation. This was decided by the Supreme Court of Nova Scotia in January, 1898, in the case of Regina v. The Halifax Electric Tramway Company. The section of the act which aims at convicting a captain of a boat used in Sunday excursions was not in force at Confederation, but was introduced in 1885, as an amendment, by he Ontario Legislature, and is claimed to be ultra vires.

Another ground the Captain will urge is that the Niagra River is the property of the Dominion, and that the Dominion Parliament alone can legislate in regard to Dominion property or with navigation and shipping, and that the Provincial Legislature cannot lay down the law as to what can or cannot be done upon an international highway.

The Ongiara has been running for several years on this route between Canada and the United States, and this is the first time an attempt has been made to stop the travel. As no railway runs out of Niagara on Sunday, the Ongiara's trips on Sunday have been found extremely convenient to people staying at Niagara who want to take the train at Lewiston for various points in the States and Canada, and also for Buffalo people wishing to come over Sunday to spend a few days at Niagara. The result of the case will be interesting to marine men.

IS THE MILK TRUST A FIZZLE?

Some Dealers Believe It is, and Think Syndicate Does Not Mean Business.

The milk dealers of Toronto are beginning to feel rather dubious about the offer of the Benjamin Calcraft syndicate for the purchase of their routes. A number of the members are of the opinion that the company do not mean business, and their offer is considered questionable.

The agreement that the syndicate want the dealers to sign—if a sale is effected between them—is characterized by the latter as being utterly unreasonable, and it will not be entertained for one moment.

So at present the matter remains in abeyance, and unless the syndicate come down off their perch and concede to the stipulations of the dealers, no milk trust will control Toronto's supply.

DOUKS LIKE QUEBEC.

Some of Them Appear Disposed to Settle in That Province.

Quebec, July 3.—The first contingent of Doukhobors, to the number of 500, arrived here this morning from Grosse Isle. Another party of 500 will reach here this afternoon about 4 o'clock.

The Doukhobors, who have just been released from quarantine, seem to have taken a fancy for the Province of Quebec, and some of them appear disposed to take up their residence in this part of the country.

Lehigh Valley Summer Tours.

The Lehigh Valley Railroad has just issued its book of "Summer Tours," which gives full details of routes and rates to various places where a summer vacation may be pleasantly and profitably spent. The attractions of the various points covered in the book are diversified, including mountain, lake and seaside resorts, affording a choice of a summering place of any character which may be desired. In naming fares to points not on the line of the Lehigh, the book calls attention to that line as a desirable route to reach the places named. Of course, the strongest emphasis is placed on the points reached by the Lehigh itself and the scenic attractions of the route through the Pennsylvania mountains are not understated, but the book is withal a compendium of useful information regarding nearly all of the better class of summering places, wherever situated. Mailed on receipt of four cents in stamps. Address Charles S. Lee, General Passenger Agent, Lehigh Valley Railroad, 26 Cortlandt-street, New York.

Creelman—Oster.

A very pretty wedding was that which took place at St. Helen's Church, when Miss Annie Oster, eldest daughter of Mr. P. L. Oster, Beaconsfield-avenue, was united in the bonds of matrimony to George D. Creelman of the Murray Printing Co. The occasion was taken advantage of by the bride's parents to serve a most delightful wedding breakfast at their residence, at which all the immediate friends were present. The popularity of the "typo" and his bride was evidenced by the numerous presents, which made a beautiful display. The bride and bridesmaid, Miss Ella Oster, were both dressed in simple white gowns, while Mr. R. Creelman assisted as groomsman. Mr. and Mrs. Creelman will make their residence in Toronto.

A beautiful complexion comes from a healthy stomach. Hutch Tablets give that clear pink and white to the skin. Ten for 10c.

The Boys Are Ready.

Harrisburg, Pa., July 3.—The 19th Infantry Regiment, stationed at Camp Mead, received word to-day that the transport to take the command to the Philippines will leave San Francisco on or about July 24. The regiment will leave Camp Meade inside of 15 days for San Francisco. Everything is in readiness for the departure, and the troops are able to leave on two hours' notice.

Why Beauty Fades so Early.

The American "rush" habit is largely responsible for the evanescence of American female beauty. Ignorance of the laws of health, and carelessness bear the rest of the burden. Nine-tenths of our women are in the bilious anaemic condition, which produces sallowness, freckles, moth patches and that accompanying sense of weariness which sometimes amounts to exhaustion, yet they *will not take time to attend to their health.* Their motto is, "By and by." Some are slaves to household work—their carpets and the washtub are killing them. Others are slaves to fashion and frivolous pleasures; none of them will give an hour to serious meditation. If they did, they would realize *whither they are traveling.* Pills and cosmetic powder will not mend matters. These women need *inward cleansing;* that alone will make their complexion clear as a baby's! *Clover extracts* and *clover teas* did the work for our grandmothers. *Karl's Clover Root Tea* will do it for you. It is even more efficacious, for it contains other herbal ingredients which increase its marvelous alterative powers. Why not try it this Spring? We guarantee to refund your money if you are not cured or satisfied. Ask any druggist for a sample package, or write to S. C. Wells & Co., 82 Colburn Street, Toronto, Ont., and they will mail you a package free of charge.

Sold throughout United States and Canada at 25c. and 50c.; and in England at 1s. 6d. and 2s. 3d.

Golden Star

Reducing the dividend without any reassuring or official statement as to the condition of the mine was a hard blow at the stock, and this also when in a general way though perhaps not technically or in detail, the directors had a fair idea of what the expert would say. When advising action during last week we intended to include the whole period before the arrival of the full report, which may be any day within the next ten. This week, however, will not, we think, give quite such large profits as last, but there is still good money ahead. Write us (signatures plain), for advice as to any of the mines or for our views as to the

Biggest Money

makers. Orders for the purchase or sale of any of the standard stocks will be promptly and carefully executed.

There is Money in Mining Stocks

If you use judgment when investing. Many of our clients have made more in the last two months out of stocks than they would make in a year in their regular business. We are not interested in any mining company, and therefore not interested in recommending any stock except on its merits. We recommend Golden Star, Fairview Corporation, Deer Trail, Alice A. and Van Anda at present prices. We do business on commission only. Write, wire or phone us if you are buying or selling. Correspondence promptly answered.

$200,000 6% PREFERRED STOCK

—OF—

The Standard Aluminum Reduction Company,

Incorporated and Established 1897.

ST. LOUIS, MO.

The Total Amount of Preferred Stock Authorized is $500,000, and is for Enlargement of Works. This Allotment is Part Thereof.

Application will be made to admit this Stock to trading in the New York Market and on the Stock Exchanges.

Aluminium cast in bars, and Aluminum Utensil manfactured ware, showing product of the company in its respective departments, can be inspected at the works of the Standard Aluminum Reduction Company, in operation, northwest corner Main and Miller-streets, St. Louis, Mo., and at the uptown office of the company, 401 Bank of Commerce Building, St. Louis, Mo.

Statements on file show that the company is in good financial condition, owns all its properties clear and has no debts.

Estimates and statement for enlargement of works at St. Louis show that by additional expenditure of $125,000 for enlargement the earning capacity there will be $158,800 CLEAR PROFIT PER ANNUM.

Estimates for erection of works also at the company's water power station show that after the erection of such works there the company CAN EARN THERE OVER $500,000 CLEAR PROFIT PER ANNUM ADDITIONAL.

For full particulars we refer to prospectus and subscription forms, stating particulars and terms. Copies furnished on request.

The undersigned will receive subscriptions for the Preferred Stock at $80.00 per share of $100.00 each, Full Paid and Non-Assessable, and for a limited amount of the Common Stock at the same price.
