The favorable attitude of Germany and the United States makes such interference practically impossible. Such being the case, it is only a matter of time till the affair was one that would keep for years. But in the end Great Britain will prevail, and one result of the war will be the formation of a great British Confederacy in

"We must guard with the utmost vigilance the powers of our free Parliament. This is not a party matter. It affects the dignity and independence of a Conservative member of Parliament as well as of a Liberal. If a Government to-day usurps the powers of Parliament, the effect may be felt after the present situation has passed into history. Every Canadian who desires the honor and prosperity of his country is interested in the power and independence of Parliament and in the freedom of its discussions. One of the most serious dangers which threatens the Parliamentary system here, as in Great Britain, is the tendency to increase the strength of the Executive at the expense of Parliament. If Parliament becomes merely-an instrument for registering the decrees of the Executive, one of the great safeguards of our liberties will be gone, and Parliament itself will fall into a position of weakness and contempt. It would be dangerous, too, to allow the Government to fall into the habit of acting on expressions of public opinion."

This homily on the inviolability of the ize very well with The Globe's

"Every thinking man knows well the importance of submitting to Parliament every great and serious issue concerning the welfare of the Dominion, but there are occasions when the Government must act quickly and assume responsibility, and the building of this rallway was one of those issues that required grappling with at once for the salvation and success of the people who were seeking treasure in those unknown and bleak regions.

"We remember the great want felt for a man in the Crimean days when our soldiers were dying from cold and exposure in and around Balaclava, while at the same time ships were lying at anchor close by loaded with comforts of every description, and yet the ships were unloaded and soldiers were dying all for the want of a man to take the responsibility of distributing garments so much needed, and forsooth there are

face which men admire, they may cure the trouble and renew strength and beauty by the use of Dr. Pierce's Favorite Prescription. It overcomes all the ills peculiar to women. It imparts strength to delicate organs, stops the drains that sap vitality, restores the color to the cheek and roundness to the form. It brings health back and health itself is beauty. It is impossible for the face to be fair or the figure shapely if there are pains, irregularities, displacements, drains, or weakness in the organs of womanhood.

"I had female weakness very badly," writes

"I had female weakness very badly," writes Mrs. O. S. Adams, of Fargo, Cass Co., N. Dak. "I had to be in bed part of the time. I was tired all the time, could not do my housework; had fainting spells, nervous headache, backache and pain in my left side, when I would lie down; had pains and aches all over. I commenced taking Dr. Pierce's Favorite Prescription and had not taken two bottles when I was able to be around again and to do my work, with no pain. I am now feeling better than for many years."

Don't you want a reliable doctor book? I am now feeling better than for many years."

men in Ottawa who for the sake of miserable partyism would censure the Government for acting, and at once, in the interests of Canada and a safe route to the Klondike."

The Globe's citation of the principle of Parliamentary control would have been correct on both occasions if the facts on the two occasions referred to were trans-posed. per, W. J. Tupper, Mayor Andrews, Robert liogers, R. P. Robbin, M.L.A., and others. A reporter had a short interview with the veteran statesman on his arrival, in his reply to a question in regard to his movements, Sir Charles said: I cannot tell you anything until I have consulted with my friends. Lady Tupper met with an accident, as you may know, and I shall see how she is before I decide on my future movements."

When questioned as to matters at Otthwa, Sir Charles showed the reporter a telegram he had received from the Capital, which read: "Government have falled to effect insurance on lives of Canadian contingent." Speaking in regard to this, Sir Charles said: "Notwithstanding this statement and reports which have appeared in newspapers to the same effect, I cannot believe that the Government have receded from the pledge they made to insure the lives of members of the Canadian contingent. It seems too utterly incredible. These menhave gone sway with the conviction that the Government has insured their lives, in addition to the accident insurance arranged for them independent of the Government, and the Ministers would surely never take such a retrograde step. I think you will soon find the report contradicted."

St. Andrew's Rapids.

Referring to the Government's action in the impropement of the St. Andrew's Rap-The Government Failure.

Referring to the Government's action in the improvement of the St. Andrew's Rapids, the ex-Premier said: "I am glad to find that the Government party, who denounced me so very strongly for proposing to execute the same work, have come to the conclusion that I was right by proposing to effect the improvements themselves. I think it was The Globe, the Government organ, that made one of the worst attacks I ever had made on me in regard to this very proposition."

The Imperial Copper Co. On enquiry at the office of the Imperia o-day it was learned that the application to-day it was learned that the applications for stock are very numerous. A large number came from Ottawa and the district between there and Parry Sound, indicating that the possibilities of Parry Sound copper mining are well known in that section. The largest subscriptions, however, are said to come from American cities across the Irke. The splendid showings of copper ore in Parry Sound and the exceptionally strong practical board of directors of the Imperial and the fact of its being the first homo mining company ever organized in Toronton cke it an especially desirable investment.
