

IN THE WORLD OF SPORT

BASE BALL ON THE DIAMOND

Catcher "Jack" McLean has made a very good impression in the games he has played with Cincinnati.

Blankenship, the catcher drafted by Washington from the Pacific Coast league, batted for 330 this season.

Catcher Sullivan of the White Sox says he will be ready to get into the game when the New Yorks reach Chicago Sept. 21.

The Boston Nationals have blanketed every team with the exception of Cincinnati and have held that team down to one run five times out of six.

It is given out that the popular manager of the Boston Americans is to wed Miss Julie Harmon of that city some time after the close of the playing season.

The St. Louis Nationals lost no time in gathering Pitcher Fomme, the Springfield Three I league pitcher who was with Chicago Cubs down to one run and three hits.

The effectiveness of the Chicago White Sox pitchers is shown in the 25 situations administered opposite clubs. Cleveland has 20 shutouts, Philadelphia 15 and Boston 5.

The New York Highlanders won seven out of nine games at Boston this season, making the remarkable record of shutting out Boston four times on the latter's administered opposite clubs.

The Brooklynians are getting a great reputation for double-headed victories. They have twice won double-headers from McGraw's team this season and have landed a doubleheader in Philadelphia. Donavan will annex fifth place all right, and that will be a great triumph for him.

National League. At Boston—Chicago, 3; Boston, 1. At Philadelphia—St. Louis, 5; Philadelphia, 2. At Brooklyn—Cincinnati, 3; Brooklyn, 2. Second game—Brooklyn, 4; Boston, 1. At New York—Pittsburgh, 8; New York, 4 (Eight innings).

THE TURF Chatham, N. B., Sept. 19.—Beautiful weather prevailed today and there was a large attendance at the event of the day.

The dead and injured as yet have not been identified. At the spot where the express was derailed there is a curve and it is supposed the brake failed to act.

At last accounts the coaches were still blating and the fire brigade had been called. The engine and several coaches were derailed there is a curve and it is supposed the brake failed to act.

GRIDIRON GOSSIP

Football has claimed its first victim of the year in George Harriman, a Neigh (Neb.) high school lad, who broke a leg in practice last week.

It is given out that the popular manager of the Boston Americans is to wed Miss Julie Harmon of that city some time after the close of the playing season.

The St. Louis Nationals lost no time in gathering Pitcher Fomme, the Springfield Three I league pitcher who was with Chicago Cubs down to one run and three hits.

The Mooney Way

There's nothing too good to go into MOONEY'S CRACKERS. The best flour that Canada mills, the best butter and cream that Canada's famous dairies can produce, and the best equipped bakery in Canada, to convert them into the best crackers you ever ate—Mooney's Perfection Cream Sodas.

They are good eating any time and all the time. Crisp, inviting, toothsome.

At all Grocers. MAD CAT ATTACKS AND BITES THREE Fights Furiously With Family at Dinner and Victims Are Badly Torn and Scratched.

NEW YORK, Sept. 19.—Suddenly found, a pet female cat belonging to Henry J. Mengel, No. 300 West Sixty-eighth street, made a vicious attack upon Mrs. Mengel, her daughter Elizabeth and her young son, while the family were dining in their flat.

Mrs. Mengel fell to the floor with the infuriated animal claving her viciously. Several bites and deep scratches on the hands. The injured were attended by a physician. Mrs. Mengel's condition, however, will necessitate a special diet.

Although the cat, known by the name of "Bodie," had been scolding for an hour, repeatedly jumping about in a peculiar manner, no particular attention was paid until it sprang upon the table, clinging to her right arm with its teeth and scratching her wrist with its claws.

Mrs. Mengel fell to the floor with the infuriated animal claving her viciously. Several bites and deep scratches on the hands. The injured were attended by a physician. Mrs. Mengel's condition, however, will necessitate a special diet.

THE WOMEN OF HOLLAND AND HIGHER EDUCATION

In Holland girls have exactly the same privileges as boys when it comes to a question of higher education. There are no special courses, universities or preparatory schools for girls in the land where Queen Wilhelmina rules.

All institutions for higher education are open to men and women equally, and on the same terms; students of either sex are treated in the same way and have to pass the same examinations.

At the end of a course at the grammar school, after having passed the final examination for either sex or entrance into a university, the student receives a diploma, which enables them to enter one of the five universities—Amsterdam, Delft, Groningen, Leyden and Utrecht. Delft is the technical university. Here women as well as men can specialize in civil engineering, architecture, mechanical, electrical, and electro-technical engineering, chemistry and mining engineering.

The course covers from four to six years. After passing the final examination in residence, two years being architects, and three as assistants to professors at the Technical University. At the four remaining universities, the 67 departments of medicine, physics, mathematics, literature and philosophy are studied.

Six doctors in law have been established in Holland, and of these two are women. There are also two doctors in medicine, and three in philosophy. These positions being doctors in practice, their positions being generally good.

A woman professor has more than once stood for nomination as professor of gynecology at one of the universities, her reputation being European. Some others have been medical officers of boroughs, and have to examine candidates for examinations and public positions. There are sixteen dentists, with good practices; thirty chemists, of whom some are members of the examination committees in their branches; others are town chemists in large hospitals, etc. They have been appointed teachers, assistants, amanuenses, in clinics, in hospitals and in laboratories.

Two of them have become inspectors of labor, one is a private teacher at a university, one has become head of the laboratory for physiology and pathology at Amsterdam, in succession to a professor. Most of the scientific associations are open to both men and women.

At each of the universities a woman's club has been founded, which is very popular with the women students. At Leyden the university buildings are crowded all over the town, and but for the club girls who do not belong to the same college would scarcely ever come in contact with one another. The club forms a pleasant meeting place during the day; many have lunch and afternoon tea there. There is a study, where it is possible to read without attending lectures. During the evening meetings of all the different faculties are held. The whole club meets once a month, on these occasions papers on various subjects are read and are followed by lively debates.

The greater portion of the day is spent inside the colleges. The evening is usually spent in work, though concerts, lectures and meetings occasionally break the routine, and taking all in all, a girl who studies in Holland is a very happy one.

Will Speak Right Out (New Glasgow Chronicle) Miss E. A. McCully, of Truro, did us the honor of calling and presenting us with a copy of her life of Rev. W. J. MacKenzie, the late minister of the Presbyterian mission in Korea. A cursory look over the pages of the book shows that it is more than usually interesting and that the pen of Miss McCully is a thoughtful and graceful writer and apparently has left the imprint of a brilliant intellect on her work.

We thank Miss McCully for her nice gift and promise that when we have read it carefully we will say right out what we think of it and whether or not we think it is a thoughtful and graceful writer and apparently has left the imprint of a brilliant intellect on her work.

Local Church Union At the meeting of the members of the Brussels street church last night to consider the question of union, a resolution was passed recommending to the effect that they meet at any time to act in conjunction with the Waterloo street people in establishing a new organization under a new name.

The resolution also declares that they are willing at any time to hand over the deeds of the Brussels street property to the trustees of the new organization, who should consist of C. E. Vale, William Alward, J. H. Campbell, John Taylor and W. E. Stewart. This committee of five was appointed, consisting of C. E. Vale, William Alward, J. H. Campbell, John Taylor and W. E. Stewart. This committee of five was appointed, consisting of C. E. Vale, William Alward, J. H. Campbell, John Taylor and W. E. Stewart.

THE APPLE OUTLOOK When things of the Union Pacific are not favorable for the apple growers this year, the first of the season, the growers are not so much as last year. The reason for this is due to the fact that the apple trees have not been so well as last year. The reason for this is due to the fact that the apple trees have not been so well as last year.

With a crop of the young woman undressed to her breast from the mad cat. She sprang upon the table, clinging to her right arm with its teeth and scratching her wrist with its claws.
