the open to control the movements of torpedo vessels. They supply also the A clear saving of \$80,000 per annum, r to put it in tons, from 13 to 15 cents per ton of ore, on the present treatment capacity of the Granby smelter, is what Supt. Hodges has accomplished with the ecently installed electrical charging device, which is now in full and most successful operation at the company's reduction works, says the Phoenix Pioneer pedo vessels, which approaches super-fluity, the expectation is justified that

This accomplishment is particularly noteworthy for the reason that it opens nother important avenue of reducing costs in treating Boundary ores-those low grade ores that were so little thought of half a dozen years ago.

jestvensky advances shortly, conditions will be favorable for night attack; for This week a representative of the Pioneer visited the smelter to see these the moon is waning, and will have little power before May 10th. Should such chargers in operation, and even a layman could readily perceive the economy encounters follow, the impartial military observer must hope that the tactical prerought about. Mr. Hodges has given the Pioneer the figures following, which cautions and steadiness of the defence may equal the preparations and heroism are therefore official: The six furnaces are divided int to be expected in the offence; for so only

groups of two, each group being served y one of the electric motors in chargng, each motor being 20 h. p. Each motor operates two especially built steel cars, each car holding about two tons of ore and coke, thus making a charge of four tons at one time. These trains are run all over the yards, where needed, and loaded with right propor tions of ore and coke with the greatest facility, and quickly returned to the

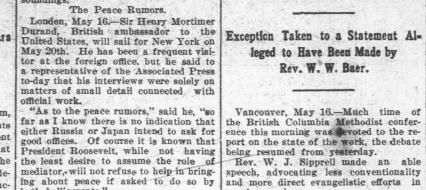

ble fireship, were almost always wrought through panic; not by itself, but by the furnaces. When the train reaches the furnace, instead of running over the veritable inferno on the wheels carry-"I should certainly expect the Japanese admiral to withhold his armored vessels ing the cars in the yard, a set of wheels of every kind, till he has fully tested the at the top of each car runs on rails set possibilities of his torpedoes. Should unsuccess there compel him to bring the just high enough in the furnaces to catch them, thus keeping the steel rails that much farther from the flames. armored force into play against the unminished Russian fleet, comparison be

The entire plan is simplicity itself, works admirably, and without a huch, comes difficult, even if pursued with minand one wonders why it had not been His contention is that the estimates were ute and tedious detail, for, like most fleets in an age of rapid progress, both thought of before, as it does away enonents are a somewhat scratch lot. irely with the charging by hand with To say four against seven is misleading, the "buggies" that are in use in most if mention is omitted that two of the melters. Not only this, but the men four are superior to any two of the seven and two of the seven inferior to the worst two of the four. In armored cruiswho now work at the furnaces have much more desirable work than before. While the installation of the elec ers also, the Russian two are by no trical chargers has been going on at means equal to the weakest two of the Japanese eight. To the layman, unless specially interested, there is no occasion the Granby smelter, other improvements have also been steadily under way, which some time in July will reto pursue inquiry into details of com-parisons in conclusions upon which prosult in these reduction works having eight furnaces and a total treatment fessional opinions will not agree, but a warning may be given against the miscapacity of from 2,500 to 2,800 tons

daily-or to get it down to pounds of copper, from 22,000,000 to 25,000,000 leading rough estimate, based upon a count of all the guns of the same weight pounds per annum. This will be an in-crease of about 35 per cent. over the on both sides, irrespective of the details of the ships carrying them. That is a not infrequent kind of computation, in present output. These new Allis-Chalmers blast fur-

naces, which are now on the ground, are the largest brought into the Bouud-ary, being 48 inches wide by 212 inches ary, being 48 inches wide by 212 means long at the tuyeres, against 44x160 inches in the other six furnaces now in white means, as stated, an increase of the moneys derived from the two mines grant received from the provincial govother feature is that the furnace building has not been enlarged, the new fur-

now disused charging apparatus. Of course other enlargements wer necessary at the smelter. A second brick smokestack is being built, the same height as the old one-150 feet-only to about \$23,000, and that the per capita When that was done it was agreed that no further gravel was to be taken from Spring Ridge. The cost of gravel at Spring Ridge was 3 cents. It cost 20c. for hauling and 15c. for loading, so that 12c was being given away. 12c was being given away. Ald. QUESTION OF FINANCES AGAIN TO THE FORE

Chairman of Board and Trustee Jay Discuss the Action of the Aldermen.

(From Tuesday's Daily.)

The action of the city council in refusing to grant the full appropriation asked by the school board for educational expenditures during the year 1905 has roused the indignation of some of the adjourned at noon. trustees. Trustee Jay is particularly emphatic in the expression of his determination not to submit to having the finances of the board of school frustees regulated by the Mayor and aldermen. brought down to the lowest possible Hughes took strong exception to certain notch before being placed before the cify council, and that any reduction will mean a serious interference with the proper operation of the local school system. Furthermore, he states that the council has not the legal power to trim the board's estimates as has been done this year. They have, he says, the right

to refer them back for reconsideration, but not to alter the figures. Of course Mayor Barnard holds a different opinion. The outcome of this

clash will be awaited with interest. This morning a representative of the Times interviewed Beaumont Boggs, chairman of the board of school trusees, on the question. Mr. Boggs takes a rather different view from that exworks.

pressed by Trustee Jay and others. He thinks that the city council is within its rights in reducing the school board's ernment is considered excessive. Whether the Mayor and aldermen are justified in the stand taken in this particular in-stance, he states, is a different matter.

On Tuesday afternoon a reception was held in honor of Mr. and Mrs. Chas. Kent at the home of their son, Mr. Herbert Kent, 245 Yates street. The Rev. W. J. Sipprell made an able event was in honor of the fiftieth anniversary of the marriage of the city treasurer and Mrs. Kent. The wedding of the aged couple took

place at Ealing church, Middlesex county, England, on May 16th, 1855. In spite of their advanced years Mr. and Mrs. Kent are in the enjoyment of excellent health, and accorded their many friends who called on them yesterday a for a place where love really could be found, true brotherly love. The church was not now sufficiently leading the very hearty reception. By request souvenir gifts were omitted

night. Ald. Fullerton opposed the motion, The Cause of Pimples and All Disfigurstating that this was another attempt to ing Eruptions-Dr. Williams' Pink disfigure Spring Ridge.

Ald. Fell objected to such a statement, calling upon Ald. Fullerton to prove it. The latter, proceeding, said that he did

not think that there was any need of this. Superintendent Marpole had informed the council that no further gravel was needed for filling at the present

Mr. Kent made a suitable reply.

UNNATURAL TO BE ALWAYS RESTLESS. WEAK. UNEASY-THE CURE IS SIMPLE.

Your work has been hard and took lots of nerve-force. It lasted so far, but now it's all gone, and you feel half dead. Somehow you must get more vitality. The water in your blood must be turned into nutriment and building naterial

This is just what happens in using Ferrozone, which renews the blood and nerves and makes each organ do the work that nature expects of it.

aid com Ferrozone quickly increases weight, brings appetite and color: instills a reserve of vigor into the system that defies weariness, exhaustion, lebility or sickness of any kind.

The enormous strengthening pow Ferrozone is proved in the case of Mrs. Edward Hill, of Ore Lake P. O., Ont., who says:

"Two years ago I had nervous breakdown. At night I tossed resilessly in bed, unable to get any comfort or rest from sleep. In the morning I suffered from overpowering weakness. My appetite was poor. I grew pale and thin, and a despondent feeling possessed my mind continually. A slight hacking cough also added to my burden.

"My doctor said I might try Ferro-tone, and it did me good in a few days. l increased in strength, the nervous sensations disappeared, and with my appetite came back my color and good spirits. I have gained over ten pounds in weight, and as my aged is 56, I consider Ferrozone is a marvel.

(Signed) MRS. ED. HILL. Remember this: Ferrozone is a true nic-not an alcoholic stimulant. Fifty chocolate-coated tablets in a box for fifty cents, or six boxes for \$2.50, at all dealers or N. C. Poison & Co., Hartord. Conn., U. S. A., and Kingston, Ont.

his city, who has been attending the North Pacific Dental College in Portland for the last two years, has passed his second year successfully. He intends to spend his bolldays in Seattle, and will complete his course next term in the Northwestern Dental University, of Chicago.
