Reroof with Brantford Asphalt Roofing

Don't let a leaky roof damage the wall paper, carpets or furniture in your home, the crops in your barn or the goods in your store. Tear off the old shingles or other worn out roofing material and put on a lasting roof of Brantford Asphalt Roofing.

This roofing is made of a blend of hard and soft asphalts on a long-fibred felt base. By blending the asphalts a roofing of remarkable elasticity is secured—one that is flexible, durable and capable of resisting all kinds of severe climatic extremes.

Brantford Asphalt Roofing is, in addition, surfaced with silica sand on both sides, which adds to its weight, fire-resistance and durability. You may be offered other sanded roofing, but it will not have the quality of material or weight of saturation of Brantford Asphalt Roofing.

Made in three weights:—60 lb., 70 lb., 80 lb. per square.

Brantford Ruober Roofing

is the same quality as Brantford Asphalt, but has a smooth, rubbery surface instead of the sand. It is particularly suitable for verandah decks and floor coverings. Three weights:—40 lb., 50 lb., and 60 lb. per square.

Standard Mohawk Roofing

consists of the same grade of materials as Brantford Asphalt but at a low price. Tested for years and has given entire satisfaction. Sanded on one side. One weight:—40 lbs. per square.

Mohawk Rubber Roofing

The same quality as Standard Mohawk but with a smooth surface. Used for all classes of temporary work—sheds, bunk-houses, camp sites, even dugouts in the trenches. 35 lb., 45 lb., and 55 lb. weights.

Leatheroid Roofing

Slightly lower quality than Mohawk Rubber. Used for same purposes. 35 lb., 45 lb., and 55 lb. weights. Samples of any of these roofings and prices will be furnished by either the makers or their agents in this locality.
