

**POOR PACKAGE DYES MAKE
Women Miserable and Cross.**

Diamond Dyes

**Have Made Millions of Wives,
Mothers and Daughters
Happy and Con-
tented.**

Women who buy and use any of the adulterated, weak and worthless package dyes put up in imitation of the reliable and never-failing DIAMOND DYES, must expect to meet with sad trials and disappointments in the home. Crude package dyes with only fancy names to recommend them, and sold by some dealers for the sake of large profits, are the direct cause of much of the feminine bad temper and irritableness manifested in many homes.

If our women and girls would avoid trouble, loss of goods and hard cash, they must insist upon getting the DIAMOND DYES whenever home dyeing is to be done. One ten cent package of the time tried DIAMOND DYES will always color more goods than will two packages of other dyes, and give brighter, fuller, more brilliant and more lasting shades. Once used, DIAMOND DYES become the chosen dyes for all well-regulated homes.

Send your name and address to Wells & Richardson Co., Limited, Montreal, P. Q., and you will receive free of cost new Dye Book, Card of Dyed Cloth Samples and Booklet in verse, entitled "The Longjohn's Trip to the Klondike."

**It Pays to Use The Kind
That Has NO MUD.**

The immense popularity of Wells, Richardson & Co's Improved Butter Color has induced spectators with little chemical ability to put up imitations of the famous butter that makes prize butter. These imitation butter colors contain mud and other impurities that ruin well made butter. Wells, Richardson & Co's Improved Butter Color is noted for its purity. There is not the slightest trace of any injurious ingredient in it, and the last drop is as clear and pure as the first. Wells, Richardson & Co's Improved Butter Color gives the true and natural June tint; common colors produce a bricky red that soon fades from the butter leaving it with a lard-like color. Ask your druggist or dealer for Wells, Richardson & Co's Improved Butter Color, the kind that has No Mud.

FERRY'S SEEDS

Represent the survival of the fittest. We have become the largest seed house in the world because our seeds are better than others. Do you wish to grow the most beautiful flowers and the finest vegetables? Plant the best seeds—Ferry's.

1906 Seed Annual free to all applicants.

then harrowed, or it can be sown with the grain. Set the drill to sow the desired amount of grain then add brome seed to sow at the rate of about fifteen pounds per acre. As the seed is light and bulky you may have to open the drill out pretty well. Consider well before you sow this grass as it is decidedly difficult to eradicate from land on which it is once sown; would prefer timothy or native rye grass, if the land is not intended for a permanent pasture.

USE OF PUBLIC LANDS.

If a sheep rancher, owing to scarcity of water were to move his sheep outside the sheep limits would he be liable to prosecution if he had his sheep where they interfered with no other settler? Sask. C. W. M.

Ans.—No, provided you made some agreement with the government or who ever owns the land.

GRASSES FOR RANCH COUNTRY.

I should be much obliged if you would give me a little information in your valuable paper re sowing down grasses for permanent meadows.

1. Will it do to sow timothy and clover with spring rye as a nurse crop. As this is only a ranching country, wheat is too expensive a seed to sow for green feed.

2. Will western rye-grass do well on a dry and rather shallow soil?

3. Is there any grass seed (e. g. brome) which will choke out stink-weed? Alta. W. A. G.

Ans.—Very little is known about the cultivation of grasses in the ranching districts that it is impossible to speak with certainty upon the subject. We would have no hesitancy in trying timothy and clover with rye and if there is sufficient rain it should grow. In time the clover would be crowded out but it would enrich the hay the first few years. We would also strongly advise the introduction of alfalfa as this is the crop ranches across the line use with greatest success for feeding purposes.

2. *With plenty of rain the first year it should grow.

3. Yes, Brome will crowd out almost everything when it once gets started but it is not yet grown to any extent in the dry climates of the ranch country.

ROLLING FENCE WIRE.

In your issue of February 14, page 253 there is a question asked by R. V. H. re the rolling of wire and I beg to say that the answer submitted is not at all the proper way to go about it. The right and most convenient way is to start a hoop of wire about three feet in diameter and kept together by strings tied at intervals so as to hold the wire together. Just roll the wire along and after making a few revolutions tie first one string and then another. When unrolling just cut the strings as required. Arden, Man. T. J. WRAY.

OWNERSHIP OF HAYSTACK.

In July last year A. bought a quarter section from B. On the land was part of an old hay stack. In January A. fed the hay as it was in the way for next year's breaking. No mention was made by either party as to ownership of hay at time of sale or since until the other day B. asked A. to pay \$10 for hay. Can he collect? Alta. J. C.

Ans.—The hay properly belonged to B. and if it were in his way he should have notified B. to remove it. B. can collect for the loss of it but whether or not \$10 would be a just valuation we cannot decide. Better submit it to an arbitration of three neighbors.

NOTE LOST.

Can I collect a debt that has been settled by a note if I have lost the note? Alta. G. D.

Ans.—In the event of it being proved that the note had not been negotiated and the loss a clear case of accident we think a court would order a settlement.

EXORBITANT CHARGES.

A. L. Souris.
Ans.—It seems to us that the charges are exorbitant, and the account should be cut down. You have a good case by refusing to pay. Your offer to each of the parties was quite liberal.

Varnishes and Japans

are put up by the CANADA PAINT COMPANY in a handy, convenient form for every day use. Our Varnishes are brought to such a state of perfection that they may be used with the greatest confidence. They are far superior to imported varnishes, being specially adapted to the Canadian climate. All Varnishes bearing our name are highly recommended—made and tested in Canada by Canadian expert workmen.

"O Ruddier Than the Cherry"

Wood Stains are an important branch in our business. The CANADA PAINT COMPANY manufacture Cherry, Rosewood, Mahogany, Walnut, Oak and Green Amboine Stain for houses and furniture. They are incomparably the very best permanent stains made. A stained floor is sweet and wholesome. We make a specialty of

Creosote Shingle Stains.

By their use the roof will be preserved and have a handsome appearance for a very long period. Write for a set of samples, mentioning the name of the firm from whom you buy your paint, and say where you saw this advertisement.
