General Geology— <i>Continued.</i>	
Laurentian .....	31
General character .....	31
Distribution .....	32
Lithological character .....	32
Structural features .....	33
Relation to other formations .....	33
Huronian .....	34
General character and subdivisions .....	34
Distribution .....	35
Basal conglomerate .....	35
Greywacke .....	36
Arkose .....	36
Upper conglomerate .....	37
Thickness .....	37
Structural features .....	37
Relations to other formations .....	38
Origin .....	39
Correlation .....	46
Post-Huronian intrusives .....	46
General features and distribution .....	46
Lithological character .....	47
Pleistocene and Recent .....	49
Economic geology .....	50
Gold .....	50
General features and classification .....	50
Veinlets of quartz or of quartz and ferruginous Dolomite in ferruginous dolomite .....	50
Veins of quartz, or of quartz and calcite.....	52
Prospects .....	53
Harris Maxwell .....	53
Dr. Reddick .....	53
Gold King .....	54
Big Pete .....	54
Kerr-Addison .....	54
Tournenie .....	54
Lincoln-Nipissing .....	54
Lucky Boys .....	55
Pontiac and Abitibi .....	55
Victoria creek .....	55
Combined Goldfield .....	56
Silver-lead .....	56
Copper .....	56
Cobalt and nickel .....	56
Molybdenite .....	57
Iron .....	57
