

QUESTIONS FOR EXERCISE
IN
NAVIGATION,
NECESSARY TO EFFECT
EXPEDITION AND ACCURACY
IN
NAUTICAL CALCULATIONS.

In Two Parts.

PART 1ST.—Logarithms—Log-line—Trigonometry—the various sailings—Latitude by observation of any of the heavenly bodies—Variation of the Compass—Tides, &c.

PART 2ND.—Chronometer—its error and rate—Equation of time—Apparent time from the altitude of the sun, moon, star, or planet—Greenwich mean time by Lunars—Great circle sailing.

BY JAMES CAMPBELL.

“Old sages say, Dame Truth is known to dwell
(Strange place enough) at the bottom of a well
And QUESTIONS are the windlass and the rope
To pull the grave old gentlewoman up.”—P. PINDAR.
