

Scientific Refining

To explain the En-ar-co system of Scientific Refining, let us assume that you have caught and condensed escaping vapor from a teakettle spout. In doing this, you have secured pure water. But along the sides and at the bottom of the kettle, scale has formed — residue that is left over. By placing this pure water in a new kettle and re-boiling it, you will find little, if any, scale in kettle number two.

En-ar-co National Motor Oil is made by much the same process. It is distilled and re-distilled several times. All impurities, free carbon and residue are removed. It is all oil.
