CANADA'S WEST THE EYE-SPOT OF THE MILITIA DEPARTMENT

Work of Increasing Western Forces Will Occupy the Attention of Department, Says General Lake—No Pay for Militia at the Tercentenary

Major General Percy H. N. Lake, C. B., C. M. G., inspector general of the militia, arrived in the city yesterday at noon. General Lake was accompanied by Lt. Col. Howard and by his private secretary. He is in St. John for the purpose of inspecting the local militia corps. The general inspection of the 3rd New Brunswick Artillery was completed last evening. The 2nd Fusiliers will be inspected tonight.

When interviewed yesterday by a reporter for The Sun General Lake said that his absence from being present at the technical inspection of the 3rd Artillery held some weeks ago. He regretted the fact, as he had never had an opportunity of seeing the St. John corps.

Concerning the long delayed drill hall for this city the general said he had no knowledge, as it was outside his department. In reply to a query whether it was the intention of the militia department to increase the strength of the Maritime Provinces command, General Lake expressed the opinion that as the 19th field battery had but recently been organized in Moncton no further increase

would be made for some time but that the department's attention would be directed to the great and growing population in western Canada. West, where the rapid increase of population made it possible for new corps to be raised. In the past five years much mounted infantry and cavalry had been organized in the new provinces, and in the future it was likely that the other branches of the service would be augmented in that part of Canada. City corps had been authorized in several of the large places, and as centres of population increased in size new city regiments should be raised. He considered it a matter of regret that more city regiments did not take the opportunity to go into camp for a few days each year. When asked if he thought it probable that the troops which went to Quebec would receive pay for the time they were there, he said it was highly likely, as parliament had voted no money for the payment of the soldiers who attended the tercentenary celebration.

Concerning the game at Petawawa, he said the summer was being spent in the grounds. The work is being done by the Royal Canadian Engineers and partly under contract.

COUNT ZEPPELIN'S AIRSHIP IS LIKELY TO MAKE A RECORD TRIP TO MAYENCE

FRIEDRICHSHAFEN, Aug. 4.—Arriving from its floating dock on the dark green waters of Lake Constance early this morning, the great dirigible airship of Count Zeppelin was sent away for a 24-hour journey in the air to Mayence and return. Late tonight the apex of the triangular flight had been reached, with the nose pointed southward, and the airship reported speeding along under starry skies toward Friedrichshafen, where it is hoped the journey will end Wednesday.

The flight to Mayence, however, was not an uninterrupted one, for something went wrong with the propeller while speeding along above the valley of the Rhine and Count Zeppelin was compelled to bring the airship down to the surface of the river at Nackenheim, eight miles from Mayence, where repairs were effected. The dirigible again was sent on high and the trip which probably will prove a record one, was re-commenced.

A representative of the Associated Press followed the airship in an auto-motive, but found it "impossible" to keep up with it, as the balloon was making more than forty miles an hour, and taking almost a bee-line, while the motor was compelled to ascend hills, cross railways and circumvent other obstacles.

"LOYDS" ALWAYS READY TO "TAKE A CHANCE"

Advocates of the anti-gambling measures of this state and, especially those who believe in the spirit as well as the letter of the law, should not take too much to heart the stories about men who, wishing to bet on the results of the Presidential election, have resorted to the device of insuring themselves, through Lloyd's against the election of Bryan, says the New York Evening Post.

Some such policies have been written in the last week, but there are very few of them in existence, and, in the opinion of insurance brokers who have resorted to the device of insuring themselves, through Lloyd's against the election of Bryan, says the New York Evening Post.

For instance, on one day last week a man who wanted to hedge by betting both ways went to J. H. Maloy, an insurance broker of No. 15 Exchange place, with \$10,000 and wanted to take out a policy against Bryan at a 20 per cent. premium, and one against Tatt at a 40 per cent. premium.

ULTIMATE OBJECT OF I. C. R. TO DOUBLE-TRACK WHOLE SYSTEM

Deputy Minister of Railways Here on His Way to Ottawa, Fully Restored to Health—Surveys for Double-Tracking to be Continued—Too Many Trains on This Division—Tercentenary Adversely Affected Tourist Traffic—Pays Tribute to John Collins

The ultimate object of the I. C. R. is to double track the whole system. Such was the observation made to a reporter for The Sun yesterday afternoon by M. J. Butler, Deputy Minister of Railways, who arrived in St. John on the C. P. R. en route from Chester, N. S., to Ottawa.

Regarding traffic on the road at the present time, Mr. Butler said it was rather poor. This condition existed on all railroads in Canada as well as in the United States. The passenger traffic up to this month was dull and behind previous years.
