DR. SHERWOOD'S GALVANIC EMBROCAT ON—It is now generally admitted by the learned and scientific, that the mysterious power called Gulvanism or Magnetism is, in fact, the principle of Viralley or Life, and that disease, in fact, the principle of Viralley or Life, and that disease, in many of its most painful forms, is entirely owing to the many of its most painful forms, is entirely owing to the many of this Galvanic or Magnetic power in its beathy proportions. It, then, we can readily supply this wondrous Power, when it is thus deficient, we can successfully combat disease, and this has been fully and perfectly attained by this most wonderful scientific discovery, of combining Magnetism or Galvanism with a Fluid which has cost the inventor of this Remedy years of stady and labor.

KNOWLEDGE AMONG MILITABY OFFICERS.—
Then arose a discussion as to what was a lady's full dress; in the course of which the Officers showed themselves so well versed in the matters of muslins and silks, that Constance (rankly told them that her private opinion was, that they had all served a year or two with Howell and James before they entered Her Majesty's service. Captain Bohun smiled at this panegyric; for the rest, they laughed loudly, and told her she was very severe. "Come, now, let us talk of something wise," said Constance. "Who has read the Bridgewater Frutuses?" Everybody laughed at the notion: it was quite amusing. Mr. Sinclair and he payer read at all, which was very nossible. KNOWLEDGE AMONG MILITARY OFFICERS.-

is a temple where all arts, and styles, and tostes, and beauties, seem united in one exquisite whole. Like the enamelled illuminations on the pages of an antique manuscript, all, though gorgeous and an antique manuscript, ait, though goige of standing glowing, is subdued and kept down into such perfect harmony, that in the general effect, there might seem rather an absence of brilliancy than a redundancy of ornament; yet every part of St.

Apropas of this start to push out of the push of the soldier who bestrode the charger. He was a semarkably hardsome outh, quite an exquisite, an accorable, with cont-black moustaches and repule, and snow white powdered hair,—a come bracion that certainly gives a pinuste expression to the countenance, which all the sacchesnut hair or raven locks in the world, however redundant, however silky; can never impact. Headen, at animous well with the come and bearing at a suited so well with the come had been invented on purpose to show off the other. However, to my story, you may well magice that the old cripple had not let the prot, however well satisfied she might be at the the mexpected generosity of Signes, without leidening the air with curses upon the head of the young gurdeducops. She was a firth har, blanched, and lame; and it was fearful to hear her, as she tossed her rags abifupon the wind, utter such a will maledictions, in a screaming, discordant voice, that the blood has need to histen. The soldier sat in calm defiance on his saddle, in the practical statitude imaginable. With this she hobiled away, and we also turned aside in disgust, while the young man remained immovable and unconcerned, as though the nords had not been addressed to him at all. The event I have been relating took place before the breaking out of the revolution. Now rejoice, and listen, thou porthers believer in propiecy and witches. The very day after the return of the King and Queen in m Versailles, when traversing the Place Louis Quinze, M. dr.
