

# SELECTING THE GRAIN STANDARDS

### Owing to Climatic Conditions Grain is Not Up to Old Grades--Those who Name the Grades

The chief grain inspector has notified the chairman of the western grain standards board that under the provisions of the inspection act it will be necessary for the board to meet and select commercial grades. The chairman has notified all members of the board of this fact, and that as soon as the chief inspector has secured representative samples of this season's crop of grain, a date will be decided upon, of which the members will be notified by wire.

The clause in the inspection of grain act which provides for the contingency reads as follows: (72) Should the climate or other conditions result in the production of a considerable proportion of grain, other than oats, not capable of being included in the classification provided for by this act, the grain standards board shall be convened for the purpose of selecting commercial grades and samples, whenever the chairman of the said board is notified by the chief inspector that such a course is necessary, and inspecting officers shall grade all classes of grain which cannot be graded according to this

act, in accordance with the commercial samples so selected by the board. The following gentlemen are named in the order in council as forming the grain standards board for the Manitoba division for the purpose of establishing such commercial grades, and of choosing samples of such grades to be the standards thereof: Chairman G. R. Crowe, of Winnipeg; Peter Ferguson, of Kenilworth, Sask.; R. J. Phil, Moosomin, Sask.; John McQueen, of Carleton Place, Ont.; James Riddle, Rosebank, Man.; D. W. McQuaig, Portage la Prairie, Man.; Hon. W. R. Motherwell, Regina, Sask.; J. W. Scallion, Virden; W. F. Sirrett Neepawa; Wm. Lothian, Pipestone; K. Campbell, Brandon; Hon. F. M. Young, Killarney; Geo. McCulloch, Souris; T. W. Lines, Strathcona; Albert; W. A. Black and A. E. Harcraft, of Winnipeg; Thos. A. Crane, Montreal; W. McLaughlin, Toronto; W. H. Fairfield, Lethbridge, and C. B. Watts, Toronto. Ex-officio members, David Horn, Winnipeg; F. E. Gibb, Fort William and C. C. Castle, Winnipeg.

## A NEW TOWN

### Govan's Paper Tells of the Progress of That Year-old Town

Govan, a year old town, now has a newspaper "The Prairie News." In the first issue, which appeared this month, it gives the following story of the growth of that place:

"A year old, yes Govan is only a year old and a fine healthy youngster at that, provided with good substantial bone and sinew, an excellent appetite and sits in one of the best farming districts of America or any other continent. There is here ample opportunity to satisfy the excellent appetite and thus sustain and develop the good substantial bone and sinew framework making the retention of the designation, the Hub of Last Mountain Valley assured. Govan is only a year old remember, then glance through the advertising columns of this issue and there find quite sufficient evidence that its growth and development has been and still continues to be something phenomenal. Not only is it true of the town, a trip through the surrounding district affords conclusive evidence that the pioneer farmer too has been a hustling. Phenomenal is equally applicable to the Govan district.

On June 30th, 1905 we landed at Arlington Beach after a trip by rail, shank's pony, wagon and tug boat. Being an easterner we were surprised when we landed. It wasn't a case of not being able to see the town for the houses, but rather one of not being able to see the houses for the town. After a rather hummocky ride enjoying (?) the spring of the axle of a lumber wagon we arrived on the 'Midway'—three 10 x 12 tents on N. W. 30-27-22—about 2.20 a.m., July 1st, we turned in and slept like a brick.

Upon scanning the horizon in the morning, one, only one solitary hut on an apparently boundless sea of grass spotted with a couple of black patches of breaking was all that was visible. In September from the window of a neat two-story house, built in the meantime on the same quarter, we counted fifty-one buildings and as many blackened patches of breaking.

At this time the location of the railway was a mere conjecture. In the spring of 1906 the railway came to the settler a definite proposition and the location of the town afforded a subject for speculation. This remained an uncertainty until the month of August.

In the meantime Messrs. Fargy and Fraser and T. E. Wight moved up on section 23-27-22, the former opening a general store.

It was finally announced that the new town would be located on the N. 1/4 of 14 and about August 1st Mr. J. Blanch arrived on the spot with a load of lumber and proceeded to build. In a couple of days Mr. W. McLaughlin arrived. Messrs. Fargy, Fraser and Wight moved down from 23 followed soon after by Messrs. Ross, McLean and Mrs. Patterson. The town of Govan had become a settled fact, began to boom and continued to boom ever since.

## A GREAT GAME

### Washington, Sept. 25.—A tennis match which savors of international importance will be played in Washington on Saturday afternoon, when President Roosevelt meets Lt. Rev. A. T. Winnington Ingram, D.D., lord bishop of London. The game will be played on the White House grounds, which is the scene of the president's victories over M. Jusseland, the French ambassador, Hon. Speck Van Sternburg, Emperor William's official representative; Secretary Garfield, Lawrence Murray, of the bureau of commerce and labor, and others. Bishop Ingram has an enviable record as a tennis player, and is considered the champion long player of the British empire. Golf is his long suit, but Herbert Carlton, general secretary of the Brotherhood of St. Andrew, now in convention in this city, says his lordship is anxious to avenge the defeat of Eustis Miles, and believes he can defeat the president.

## NEW R.N.W.M. POLICE TRAIL

### After Two Years' Work, Road is Completed From Peace River to Coast

After two years' hard work the mounted police have cut an eight foot trail from the Peace River through the Rocky Mountains, giving a route from Edmonton to Dawson entirely over Canadian territory. The trail has been built to Hazelton, where it joins the trail along the line of the Dawson telegraph, and thus continues to the Yukon capital.

The trail, besides affording access to a hitherto inaccessible portion of the country will be used to justice purposes in transporting prisoners who would be able to take advantage of territorial immunity if taken over the usual route of travellers, which crosses American territory.

## DAVIDSON BOYS REMAINS FOUND

### After a continuous search for upwards of five days the body of the little two-year old boy of Mr. and Mrs. W. Kirkwood, who was lost at Davidson on Tuesday of last week, was found five miles from the place from which he had strayed.

## MYTTON-HUBBARD

### Henry F. Mytton, manager of the Canadian Bank of Commerce, at Regina, was married in St. Paul, Minn., on Monday, Sept. 23rd to Violet Strickland Hubbard, eldest daughter of Walter R. Strickland, of Toronto, Ont.

## MAY RETURN TO WORK

### Antwerp, Sept. 27.—The shipping federation today, ordered that all dock laborers who have been on strike, or who were locked out be allowed to return to work.

## KILLED BY WIRE

### Dundas, Ont., Sept. 27.—Samuel Sutton was killed by an electric light wire here tonight while walking down the street.

## GAS AT CALGARY

### Light and Fuel Problem may be Solved--Natural Gas was Struck after Fourteen Months' Work

After digging patiently for natural gas for the past fourteen months, the efforts of the Natural Gas company were rewarded last week at Calgary by the discovery of the material in paying quantities. The strike has been made 2,900 feet down, and although it is not in sufficient quantities for commercial use, the company believes that only the top layer has been touched, and that the full volume will not be reached for about one hundred feet yet.

Calgary has been waiting anxiously for this strike of gas, as it was expected to at once solve the power, light and fuel problem. The company has a franchise with the city not to charge more than 15 cents per thousand feet for a supply distributed within the city. This will reduce the price of light, fuel and power about 90 per cent, and Calgary expects, through this discovery to cinch its claim as the industrial centre of the west.

After the strike was made hundreds of people were travelling out to the well, which is about six miles from the city, to make an examination and were satisfied with the result. Despite the fact that only a beginning has been made, the company has made every arrangement to cope with a high pressure. The roar of the gas can be heard for many miles. A. W. Dingman, late of Toronto, is manager of the company making the discovery.

## BROWN MAY RE-JOIN C.N.

### Former Popular Official May Again Join the Canadian Northern

According to rumor, states the Port Arthur Chronicle, William A. Brown, who is now recuperating his health at his old home in Nova Scotia, will again enter the employ of the Canadian Northern Railway, assuming a responsible position in the west. It is also stated that Supt. Cameron is slated for promotion and that he will be removed from Port

## REGINA TO BULYEA

### Contractor John Bradley Commenced Work This Week on New C.P.R. Branch

Brandon, Sept. 21.—John Bradley, who has finished the construction of the B. S. & H. B. branch of the Great Northern into this city, has secured the contract for building the Regina-Bulyea line of the C.P.R. He intends commencing operations at once, and is moving his outfit to Regina. The length of the new line is 45 miles, and it is expected to cost in the neighborhood of \$300,000.

The line in question will connect Regina with the Kirkella line, giving it access to the fertile and well settled Last Mountain valley district, one of the finest and most prosperous sections of the great Canadian wheat belt.

For the past two years Regina shippers have been seeking to be connected with the Kirkella, as at present owing to the long road haul, Regina shippers are at a disadvantage compared with Winnipeg houses in serving a territory naturally tributary to the capital. Early in the year Second Vice President Whyte assured members of the board of trade that the branch would be built this year, and while it is extremely doubtful whether steel will actually be laid, grading should be far enough advanced by freeze-up to ensure the opening of the line early next summer.

The building of the line is looked forward to by Strassburg, Bulyea, and other Kirkella line towns with great interest as naturally a great deal of business is done by these towns with Regina, necessitating at present a wearisome, round-about railway journey on a cross country trip.

From Craven the Regina-Bulyea

## 37 BUSHELS TO ACRE

### Strassburg, Sask., Sept. 27.—The first load of 1907 wheat was marketed here today by N. Lemory of Lake Centre and graded No. 1. Northern. The yield was 37 bushels to the acre.

## STOP THAT COLD

To check early colds or grippe with "Preventics" is a sure method for them. To stop a cold, Preventics is safer than to let it run and be obliged to cure it afterwards. To be sure, Preventics will cure even a deeply seated cold, but not early—at the sneeze stage—this break, or head of these early colds. That's surely better than why they are called Preventics.

Preventics Little Candy Cold Cures. No Ointment, no physic, nothing sickening. Use for the children—and thoroughly safe too. If you feel sick, weakness, and don't forget your child. It is especially useful, night or day. Hives, urticaria, the prevention of measles, and in cases for the pocket, also in the boxes of 48 Preventics. Based on your druggists giving you
