

Not New.

Don't think our Vapo-Crescine is something new, but it isn't. For more than twenty years it has been extensively used for all forms of bronchial and throat trouble. Mrs. Ballington Booth said of it, years ago, that "No family where there are young children should be without Vapo-Crescine." You breathe in the vapor, it goes all through the bronchial tubes, soothing, healing, curing. It is pleasant, safe, economical. It is Vapo-Crescine is sold by druggists everywhere. The Vapo-Crescine and Lungs, which would last a lifetime, and a bottle of Vapo-Crescine complete. Send for a supply of Vapo-Crescine at 25 cents and 50 cents. Illustrated booklet containing particulars of the Vapo-Crescine free upon request. Vapo-Crescine Co. 200 Fifth St., New York, U.S.A.

Desirable Property for Sale in the City of Chatham

The Late William Oldershaw Estate.

Parcel No. 1—Brick Store on north side of King Street, opposite Geo. Stephens & Co.'s hardware store.

Parcel No. 2—Two-story brick tenement dwelling, on corner of Elizabeth Street and North Chatham.

Parcel No. 3—Two storey brick dwelling on east side of William Street, north of Stanley Avenue.

For full particulars apply to James L. Oldershaw, 63 Head Street, or to Geo. A. Sayer, Barrister, Eberts Block.

VARICOCELE

No matter how severe your case may be, no long time may have had it, our NEW METHOD TREATMENT will cure it. The "varicose veins" return to their normal condition and hence the sexual organs receive proper nourishment. The organs become vitalized and manly powers return. No temporary benefit, but a permanent cure. **NO CUTS. NO PAIN. NO OPERATION NECESSARY.** NO DISENTITLEMENT. **NO BUSINESS.**

STRICTURE

Thousands of young and middle-aged men are troubled with this disease—many unconsciously. They may have a smarting sensation, sharp cutting pains at times, weak organs, and all the symptoms of nervous debility—they have **STRICTURE**. Don't let doctors experiment on you by cutting, stretching or tearing you. This will cure you, as it will return. Our NEW METHOD TREATMENT abolishes the stricture permanently. It can never return. No pain, no suffering, no detention from business by our method. The sexual organs are strengthened, the nerves are invigorated, and the bliss of manhood returns.

Cures Guaranteed

WE TREAT AND CURE: BLOOD POISON, NERVOUS DEBILITY, IMPOTENCY, STRICTURE, VARICOCELE, SEMINAL LOSS, BLANDER, KIDNEY DISEASES. CONSULTATION FREE. BOOKS FREE. CHARGES MODERATE. If unable to call, write for OUR 50-PAGE BLANK FOR HOME TREATMENT.

BACK-ACHE ?

If you have Backache you have Kidney Disease. If you neglect Backache it will develop into something worse—Bright's Disease or Diabetes. There is no use rubbing and doctoring your back. Cure the kidneys. There is only one kidney medicine but it cures Backache every time—

Dodd's Kidney Pills

How Sankey Composes His Hymns.

As he sings, so Mr. Sankey composes the tunes for his hymns inspired by the feeling of the moment. Often he will stop suddenly in the midst of reading or talking to jot down on the ever-ready music-paper some bit of melody that comes to him. These jottings he gathers together and develops at his leisure, sometimes fitting them to poems preserved in his scrapbook, sometimes getting Fannie Crosby or another hymn-writer to write words especially for his music. He once said: "Good words will soon attract a good tune." He believes in melody always over harmony as a power to move people—Ladies' Home Journal.

Cultivation Kills Weeds.

If the ground is cultivated often enough no weeds can grow, and if the ground for a crop is carefully prepared before putting in the seed, by deep plowing and frequent harrowing, the cultivation required after the plants are up need not be more than one inch deep. If this be done after every rain there can be no weeds, and they will become fewer every year, while the cultivation will prevent loss of moisture in the soil by affording a loose covering of dry earth.

If Men Only Would.

If the young men who are measuring tape and laces would surrender their work to the young girls who are seeking employment and turn their attention to the pursuits of agriculture, there would be less misery and more contentment in the land; there would be more independence and less servility; more men and fewer creatures; more happy wives with comfortable homes, beautiful children and cheerful tempers.

Death Germs in Pin Heads.

The swallowing of a pin is less to be dreaded than the contagion that may lurk about the pin. Under its head and about the point of a pin, a whole multitude of disease germs may lurk, which, being given entrance to the mouth, from there soon infect the whole body, thus causing illness, or perhaps even death.

Those Loving Girls.

Does—"I wish that young Sotleigh wouldn't stare at me so every time we meet." It's dreadfully embarrassing."

Neill—"Yes, poor fellow! He never did have much sense."

A Perilous Profession.

There are some astrologers in China but not many, as astrology is a very perilous profession. When one of these so-called prophets predicts an event which does not occur, he loses his head.

A locomotive that never moves an inch and never draws a load is fit for nothing but the scrap pile. A Christian who does not go forward an inch and who helps along no Christian work—for what is such a disciple fit? Surely not for praise or imitation. The active Christian is the only possible Christian if we measure by the Bible standards.

ABSOLUTE SECURITY

NATIONAL TRUST COMPANY, Limited, Toronto, Montreal, and Winnipeg.

N.B.—Since the Prospectus of the Company was issued (about the first of April), the Company has received two offers for the purchase of its entire output of paper. These offers are entirely unsolicited, and are from parties whose standing is such as to guarantee the performance of any contract they may undertake. One of these offers covers the first year of production, and the other covers the first three years. Either offer, if accepted, would be sufficiently profitable to assure the payment of the full dividend on the Preferred Stock, provide the amount required by the Charter for a Reserve Fund, and leave a balance sufficient to pay a large dividend on the Common Stock, if no unforeseen contingencies should arise. This does not include profits estimated from the sale of sulphite pulp or from the saw mill, which, it seems reasonable to suppose, would be sufficient to cover all unexpected contingencies.

PROSPECTUS

OBJECTS OF THE COMPANY

The Atlantic Pulp and Paper Company, Limited, has been organized in order to take advantage of the unrivalled facilities for the manufacture of pulp and paper at New Richmond, on the Bale des Chaleurs, and by its charter, has powers of the fullest description. It is confidently believed that pulp and paper can be more economically manufactured there than any other place in America.

The essentials to the success of such a concern are:

1. Cheap and unlimited pulp wood;
2. Adequate water power cheaply developed;
3. Pure water for the manufacture;
4. Cheap labor;
5. Low transportation charges;
6. Efficient management.

It will be seen that the facilities possessed by this Company assure a point of cheapness in the production of paper never attained before, while the situation of the mills on the Atlantic seaboard makes it possible to ship to all foreign ports by water without trans-shipment. As the Company proposes to confine itself almost exclusively to the export trade, it will readily be seen that this gives it further advantage over all other companies.

1. **WOOD SUPPLY.**—No paper mill in Canada has greater advantages in point of situation. Many companies do not own their own limits, being entirely dependent on outside purchases, and subject to fluctuations of supply and price. Other companies owning limits have to transport their wood from great distances by water or rail. Thus we find mills at Merriam and Niagara Falls are bringing their pulpwood from Central Quebec. Some prosperous paper companies even buy their pulp in the manufactured state. The mills of the Atlantic Pulp and Paper Company, Limited, will be built about two miles from the limits, where there will also be a very large mill-pond capable of holding several million logs. The Little Cascapedia River flows from end to end through the center of the limits, and the large number of tributary streams does away with the greater part of the hauling usually entailed in getting out pulp wood, thereby greatly decreasing the cost.

2. **WATER POWER.**—Mr. George F. Hardy of New York, the foremost American authority on this subject, has made a thorough examination of the water power that can be developed at the proposed mill site, and his report shows that sufficient power can be developed to run mills of even greater capacity. This report can be seen at the office of the undersigned, or at any office of the National Trust Company, Limited.

3. **WATER SUPPLY.**—Pure and clean water is one of the most important factors in connection with pulp and paper-making. The bed of the Little Cascapedia River is rocky, and owing to its crystal-like clearness and purity the water in the river is suitable for making the finest grades of paper without the expense of filtering, which is almost invariably required at other mills.

4. **COST OF LABOR.**—The labor employed in the mills and woods cost less than probably any other American mill, as far as known, as competent men in this section of the country, on account of the cheapness of living, ask very low wages.

5. **TRANSPORTATION CHARGES.**—The shipping facilities of this Company are certainly unequalled by any similar enterprise in Canada, the situation of the mills on the Bale des Chaleurs giving every possible advantage for export trade, which is probably the most profitable field. Arrangements can be made with Atlantic steamship lines to run steamers from New Richmond for eight months in the year, as required. During the winter months favorable winter rates have been arranged with the Railway Companies to St. John and Halifax, New Richmond being on the line of the Atlantic and Lake Superior Railway, which will be connected with the mills by a siding.

6. **MANAGEMENT.**—The Company has been fortunate in securing the services of Mr. Wm. M. McIntyre, formerly Mechanical Superintendent with the Laurentide Pulp Company, Limited, who will act as Manager of the construction and operation of the mills. Mr. McIntyre has had over twenty years' experience in pulp and paper-making, and is regarded as an authority on the manufacture of pulp and paper.

PROPERTIES

The properties and limits acquired by the Company contain about three hundred and two square miles, or one hundred and ninety-three thousand two hundred acres, more or less. The wood is principally spruce, and there is also a large quantity of cedar, pine, birch, balsam, and hemlock, and poplar. The Company has reports on this property made by five different expert Rangers, acting independently. Copies of these may be seen at any office of the National Trust Company, Limited, or at the office of the undersigned.

ISSUE OF STOCK

For the acquiring of the said property, equipment of the pulp and paper mills, the development of the water power, building the railway siding to the mills, and the furnishing of sufficient working capital, the present issue of Preference Stock is made. The whole of the Seven Per Cent. Cumulative Preference Stock has been authorized to be issued on the following terms:

For every two shares of Seven per cent. Cumulative Preference Stock subscribed and paid for, there will be allotted by way of bonus one share of fully paid Common Stock.

The Seven Per Cent. Preferred Stock is Cumulative, carries yearly dividends, and has priority over the Common Stock as to both dividends and assets.

After the payment of the dividend on the Preferred Stock, and before any payment of dividend on the Common Stock, a further sum of one per cent. must be applied to a Reserve Fund, under the charter. This fund will be for the further assuring of the dividends on the Preferred Stock. Application will be made in due course for the listing of the shares of the Company on the Toronto and Montreal Stock Exchanges.

Applications for Preferred Shares should be forwarded to the **NATIONAL TRUST COMPANY, Limited, Toronto, Montreal, or Winnipeg; or to SUTHERLAND & CAMERON, Brokers, Ottawa, Canada.** Checks, drafts, etc., are to be made payable to the **NATIONAL TRUST COMPANY, Limited.**

If the whole amount applied for be not allotted, the surplus paid on deposit will be appropriated towards the sum due on allotment. Where no allotment be made, the deposit will be returned in full.

Further information and Forms of Application can be obtained at the offices of SUTHERLAND & CAMERON, 48 SPARKS STREET, OTTAWA, CANADA, or the NATIONAL TRUST COMPANY, LIMITED, TORONTO, MONTREAL, and WINNIPEG.

We offer the Preferred Stock for sale on the above terms.

SUTHERLAND & CAMERON, Brokers
OTTAWA, CANADA.

The following is an extract from one of the reports: "I have been working in the lumber woods for twenty years or more, and have traveled and examined limits in the State of Maine, New Brunswick, and Quebec, and worked in Wisconsin and Minnesota, and I am sure this is the best pulp limit I have ever seen or traveled over."

On the basis of any one of these reports a conservative estimate shows that there is sufficient pulpwood now on the limits to supply the proposed mills for more than 25 years. As spruce wood will replace itself in from twenty-four to thirty years, it will be seen that there is sufficient wood on the limits to afford a perpetual supply to a mill double the capacity of that now contemplated.

The freehold property consists of twenty acres where the saw mill, dwellings, and office are situated, and 254½ acres on the bank of the Little Cascapedia River, where it is proposed to build the Pulp and Paper Mills.

THE PULP AND PAPER MILLS

It is proposed to erect—

- A Paper Mill with a daily capacity of 54 tons.
- A Ground Wood Pulp Mill with a daily capacity of 50 tons, and
- A Sulphite-Pulp Mill with a daily capacity of 40 tons.

Mr. George F. Hardy has estimated the cost of erecting the Pulp and Paper Mills and of developing the water power at \$950,000. The balance from the sale of the Preferred Stock will be sufficient to complete the payments for the limits, water power, saw mill, etc., provide working capital, and leave a substantial balance for contingencies.

THE SAW MILL

There is on the property a saw mill, equipped with the latest improved machinery, capable of turning out from 35,000 to 40,000 superficial feet of sawn lumber in ten hours, and is equipped with all necessary power, gearing, shafting, etc., for the installation of another saw, which would double the capacity.

MARKETS

The markets will be chiefly foreign, including the Eastern States and Great Britain. In view of the expected advances in the price of paper in the Eastern States it is probable that the greater part of the output will be marketed there. Situated as the mills will be on the seaboard, paper can be laid down in Liverpool and New York, duty paid, at such a price as to defy competition.

Freight quotations can be seen at the offices of the National Trust Company, or the undersigned.

ESTIMATE OF BUSINESS AND PROFITS

Estimating the cost of pulp wood at \$2.25 a cord, careful estimates made for the Company show that the ground wood pulp should not cost over \$5.89 a ton, and sulphite pulp not over \$16.00 a ton. The actual cost of newspaper from pulp, estimated at these prices, should not be over \$14.94 a ton. This is after making all necessary allowance for depreciation and renewal of plant, and all charges of management and selling.

The following estimate of the annual output of the mills has been prepared by Mr. Wm. M. McIntyre, a practical pulp and paper manufacturer, and is believed to be conservative and well within the mark, and includes allowances for salaries and contingencies.

15,902 tons of newspaper at \$37.00 a ton	
f.o.b. at mills	\$588,374.00
\$294½ tons of sulphite pulp at \$30.00 a ton	
f.o.b. at mills	249,825.00
	\$838,199.00

Cost of producing same:	
15,902 tons of newspaper, at \$16.94 a ton	269,319.88
\$294½ tons of sulphite pulp at \$16 a ton	269,319.88
	538,639.76

Showing a profit of..... \$300,000.00

7 per cent on \$1,500,000 Preference Shares..... 105,000.00

Available for Reserve Fund and further Dividends..... \$350,000.00

The ground wood pulp and the balance of sulphite pulp will be consumed in the paper mill of the Company.

The estimated profits from the operation of the saw mill are not included in these figures, but owing to the enormous quantities of cedar on the limits, substantial profits should be made from the manufacture of railway ties, shingles, etc. The Laurentide Pulp Company, Limited, in its annual report, June 30th, 1900, stated that the Company's saw mill added to the year's profits an amount equal to its entire cost, although it was operated for only three months of the year, and estimated that the future profits from this source would cover the interest on the entire bond issue of the Company.
