

### CAN DO TWICE AS MUCH WORK NOW

Everything Agrees With Him and Friends are Complimenting Him on Big Change

"I can do twice as much work now as I could before I took Tanlac, and I tell the world it's the greatest medicine ever made," was the emphatic statement made recently by Arthur Scott, a well-known longshoreman living at Rardolph, N. B. Two and one half miles from St. John.

"For two years before taking Tanlac I suffered almost continually from the worst kind of stomach trouble. After every meal I had a feeling like a weight of lead in the pit of my stomach and a tightness across my chest that made it hard for me to get my breath. If I ate anything sour, it would keep me feeling miserable for days afterwards.

"It was an effort for me to get through my work, and when the day was over I just felt completely played out. I would wake up in the mornings feeling tired and worn out and unfit for anything. In fact I felt bad, downhearted and discouraged all the time.

"But just a few bottles of Tanlac have relieved me of all these troubles. My stomach never bothers me a particle now, and everything I eat seems to agree with me perfectly, for I never have a touch of indigestion. Everybody tells me I look better and I certainly feel better in every way. I get up in the mornings full of pep, ready for a good hearty breakfast and a big day's work. I am doing the hardest kind of work and it doesn't give me a bit of trouble. After what Tanlac has done for me I am ready to give it a good word any day."

Tanlac is sold in Newcastle by E. J. Morris, in Redbank by Wm M. Sullivan and in Doaktown by O. Hildebrand.

### LOOK TO SARDINIA FOR CORK

World Turning to That Island for Production of Material So Much in Demand.

Cork has probably passed olive oil as the leading export of Sardinia, and Commercial Attache A. P. Dennis states that recent production has been so stimulated that a large factory at Tempio is quadrupling its capacity. The bark is stripped from the tree once in nine years. At the Tempio factory the dried bark is first thoroughly steamed and flattened out by hydraulic pressure; it then remains in piles about 30 days, when it is taken out covered with blue mold, and is carefully scraped on both sides and cut into widths varying according to the lengths of the cork stoppers desired. The strips are cut by hand into cubes, a process requiring highly skilled labor, with much care in picking out defective pieces. The corks have been rounded and tapered by high-speed cutting machines, but a new abrasive process is claimed to reduce the waste of this finishing from 20 to 30 per cent. Before the war the fine dust sold in Germany for unknown use for about \$90 a ton. At Terranova the cork is differently utilized, the best being baled in sheets for shipment, while the inferior is coarsely ground and used with a magnesium surface for walls and floor coverings. The war demand was for cork trench mattresses, which were both light and afforded protection from cold and moisture.

### MOTOR CARS ON STAGE LINE

Old Four-in-Hand Vehicles on Nevada Roadways Succumb to March of Improvement.

Stage lines in Nevada have abandoned the time-honored four-in-hands of horses in favor of high-powered motor busses.

Daily, with clocklike precision, these big cars pound along the 100 miles of sun-bitten alkali roadway carrying passengers and mail. In much less time and far greater comfort the ranchers and business men of today speed over the same roads where once rattled the four-in-hand stage, slow, jolty and not at all certain of reaching its destination.

The cost of transportation by motor bus compares favorably with operating expenses of the horse stage. The proprietors of the lines are thorough business men and can tell to the penny the gasoline mileage of every car, the oil consumption and just how much service is obtained from tires.—San Francisco Bulletin.

### Land Reclamation Scheme.

The British board of agriculture has inaugurated a scheme for the reclamation of land on the Lincolnshire shore of the Wash. A bank is being constructed from Wainfleet, a little below Skegness, to Freiston, near Boston (Lincolnshire), commencing at the Wainfleet end, and by this means it is hoped to recover about 12,000 acres. The work is in charge of a resident engineer in Wainfleet and will employ a large number of men, who will be selected from demobilized soldiers and sailors, and thus obviate the taking away of labor from agriculture. It is said that in the middle of the last century a reclamation scheme was started, and it was then estimated that a sufficiently large area would be redeemed from the Wash to form a new English county. The enterprise was abandoned, but experts have always maintained its practicability, which is now in the course of being tested.

### Saw George Elliot's Ghost.

The death of Mrs. Katherine Macquoid, the veteran novelist, at the great age of ninety-three, severs another of the few remaining links with the Victorian past. A contemporary of George Elliot, Mrs. Macquoid used to tell how she once saw the famous writer in a vision.

When George Elliot went to live at Chelsea Mrs. Macquoid proposed to go and call on her. But before she could do so a remarkable and tragic thing happened.

One night Mrs. Macquoid awoke suddenly, and saw the figure of George Elliot standing between the bed and the wall. The apparition was distinct and unmistakable. On the following evening Mrs. Macquoid learned of George Elliot's death.

### Things Looking Up in Serbia.

There are many evidences of bettering conditions in Belgrade, Serbia. Belgrade university opened a short time ago. The American Red Cross is now erecting barracks to house the students during the summer.

In the spirit of the people there is a marked change for the better in the last few months. Social gatherings are more frequent, and a few moving picture theaters are in operation.

Shops in the city are gradually re-filling with stocks. Prices are high. Reports from the interior indicate a large grain harvest with a possible surplus for export in South Serbia. These reports have had encouraging effect on life in the capital.

### China to Make Cement.

The cement requirements of North China will probably soon be supplied by domestic production. One large concern is said to control this industry in North China, and its plant is located at Tangshan, a small town about 100 miles northeast of Tientsin, on the Peking-Mukden railway. It is equipped with modern machinery, and secures its supply of limestone on the site of the works.
