John Newson

CARD.

ANTOINE VINCENT, Architect and Sculptor, Dorchester Street, West, is prepared to execute orders for Monuments and Church-work, in Altars, Statuary, Holy Water Fonts, &c. Work done promptly.
August 3, 1898—6m

If your sight is bad
When walking the street,
And you meet an old chum
You look at his feet.
He thinks he is slighted,
For he knows no reason,
And he looks not at you,
For the rest of the season.

Many have come
to us who could
not recognize a
friend six feet
away, and after
getting fitted by
us with spec-
tacles could tell
them across
Queen Square.

E. W. Taylor,

OPTICIAN.

ey to loan.

FERTILIZER FACTS.

The value of all Fertilizers consist in the amount of soluble Phos. Acid, Nitrogen and Potash they contain, and the brand which shows the greatest value in these is the one to buy, on the same principle that Milk testing 4 per cent. butter fat is more valuable than 3 per cent. milk ENGLISH MANURES costing the same price, contain 20 per cent. to 25 per cent. more Phos. Acid, Nitrogen and Potash than any other complete Fertilizer on the market.

Or in other words the Plant Food contained in a ton of other Fertilizer costing, say \$35, can be purchased from us for about \$28. All Fertilizers are sold under a guaranteed analysis enabling any who may, to verify the above, and the superior quality of these Manures is being shown by actual test year after year by the really wonderful results produced wherever sold.

[SACRED HEART REVIEW.]

THE CURSE IN EDUCATION.

Under the above title Mrs. Rebecca Harding Davis contributes to the current North American Review an article which may be characterized as a companion one of the notable paper dealing with our educational system that Julian Hawthorne had in the previous issue of the same month.

Mrs. Davis begins by declaring that the average American may entertain grave doubts about matters of religion; but as regards the excellence of our accepted public school system of education there is no room at all in his mind for any misgivings. That system he considers perfect. He may recognize that it makes very little or no account of the moral training of the child; that in its very small attention, or none at all, is given to the religious part of education; but that does not alter his convictions regarding the advantages and the excellence, as he views them, of the system itself.

ROYAL Baking Powder

Made from pure cream of tartar.

Safeguards the food against alum.

Alum baking powders are the greatest menaces to health of the present day.

ROYAL BAKING POWDER CO., NEW YORK.

Catholic, Protestants, Jews and Atheists, are invited to write their request, sign the same with full name and address, and forward before June 1st to Reverend Mother Superior, Nazareth Academy, Mount Saint John, Concordia, Kansas. During the past year thousands of letters were received from all parts of the world expressing the gratitude of the recipients for favors obtained through the fervent supplications of God's devoted servants. The sick claim to have been healed in a miraculous manner, unhappy marriages have been blessed; wayward children have been reformed; the unemployed have procured lucrative positions; persons addicted to drink have become total abstainers; extraordinary vocations to the religious life have been obtained by numerous pious young girls; sin has been overcome and virtue acquired.

May the Sacred Heart of Jesus be everywhere loved!

A large part of the recent work of Professor Lowell and his assistants has been devoted to a study of the planet Mercury, primarily to determine exactly its period of rotation, and secondarily to study the external aspect of this planet for the purpose of deciding upon the permanence of the irregularities observed on its surface which have attracted much attention among astronomers. The most favorable period for the study of Mercury is, singularly enough, when the planet appears that it is "invisible," owing to its proximity to the sun, for it is then its minimum of distance from the earth. The measurements, which were made with a spiral-line spectrometer, have given very good results. They have obtained 311 drawings and twelve sketches of the disk of the planet. The irregularities are well defined and are found to be permanent. The period of rotation is 88 days, 15 hours, 42 minutes, 23 seconds. The superficial irregularities are very different from those of the other planets. They are long, narrow and dark, unequal in width, and at certain periods appear like dotted lines, symmetrically arranged, showing darker at their points of intersection. The cause of this structure is unquestionably owing to the solar heat; for the half of the planet turned toward the sun receives an intense and continuous heat, which would produce a much greater contraction than that of the other hemisphere, and therefore result in the formation of numerous fissures. The portion of the planet which we can observe—taking account of its libration—is nearly rectangular in shape, and the dotted lines—quite similar to those of Lowell's conclusions are as follows: The planet is never veiled by clouds; it possesses no appreciable atmospheric envelope; it has no vegetation, and exhibits no temporary modification in appearance; in a word, it is an extinct world.—S. H. Review.

It would, perhaps, edify those who sneer at the United States as "the land of the almighty dollar" if they could know how much money is annually given by wealthy people to charitable and educational institutions in this country. Counting only donations of five thousand dollars and upward, a partial list of the benefactions made during the last six years gives an average of more than thirty-three millions every year. These figures go far to show that our countrymen are not avaricious, and that they have a genius for dispensing money as well as for accumulating it. (Ave Maria.)

"Example is Better Than Precept."

It is not what we say, but what Hood's Sarsaparilla does, that tells the story. Thousands of testimonials are examples of what Hood's has done for others, and what it will do for you.

Dyspepsia—"I was weak and had fainting spells. Dyspepsia and indigestion in severe form troubled me. Five bottles of Hood's Sarsaparilla made me well and strong." Mrs. WILLIAM VAN ALLENBURG, Whitby, Ont.

A Good Medicine—"We have taken Hood's Sarsaparilla in our family as a spring medicine, and used Hood's Pills for biliousness and found both medicines very effective. For impure blood we know Hood's Sarsaparilla is a good medicine." S. S. FLEEN, publisher, Box, Alwood, Ont.

Hood's Sarsaparilla

Hood's Pills cure liver ills; the non-irritating and only cathartic to take with Hood's Sarsaparilla.
