Oxford Chancellor Range

The oven of the Oxford Chancellor Range is designed for service. It is very roomybig enough to do the cooking for a large family. The racks or shelves are of pressed steel -guaranteed unbreakable. In the ordinary range the racks are made of cast iron which are very brittle and easily broken by a hard knock or a heavy pan.

The drop oven door is balanced so it will not drop with a bang. When it is down it forms a shelf to rest a pan on when basting. The oven bot-

tom will never warp, and is supplied with a rack, providing a level surface at all times. The upper warming closet has a balanced drop door, which will raise completely

out of the way and remain there while dishes are being placed there or removed. We would like to send you some of our literature about the Oxford Chancellor Range and tell you where you can see it. Won't you write?
