SOUTHERN CANADA POWER HAD FINE YEAR.

Those investors who have been following the monthly earnings and expenses of Southern Canada Power maturally expect that the annual report, shortly to be issued, will make yery fine reading, notwithstanding that its new development of Hemmings Falls was only put into operthat its new development of Hem-mings Falls was only put into oper-ation a short time before the close of the fiscal year, and consequently its effects on the earnings cannot be fully shown for another year.
With the completion of its new
86,000-horsepower plant at Hemmings falls the company is in a very strong position. This enables it to wipe out the item of "Purchased Power," which it has had to obtain from outside sources to meet the demand, and the elimination of this should react to averably more earnings. The company has also signed a contract for the delivery of 10,000-horsepower ing of New Wey minster at the trom the new plant to Shawinigan.

Canadian Press Despatch.

Montreal, Sept. 17.—The foreign demand for Manitoba spring wheat here continues to be of an indifferent character, according to exporters, which they attribute to the liberal offerings being made for shipment in all positions, and no business of importance was reported. There was some inquiry for oats and barley, and as the prices bid for the latter were satisfactory, sales of a few odd loads were made for November shipment.

The trade on spot cash grain was slow and the market quiet. Sales of odd loads of No. 3 barley were made early in the day at 77c per bushel. The tone of the market for Ontario and Quebec oats was firm, owing to the much smaller offerings from the country, and sales of odd cars of No. 2 white were made at 51c to 51½c and No. 3 white at 48½c to 49c per bushel ex-track. Ontario maiting barley was dull and unchanged at 83c per bushel. MONTREAL.

Canadian western oats were quoted at 64½c for No. 2, 57½c for No. 3, and 57½c for extra No. 1 feed. MINNEAPOLIS.
