We pointed out the other day that ents who revel in sensations, and espeeastern papers by writers who have stances except that gleaned from the paid sensation-mongers;

paid sensation-mongers:

"The first Counservative government British Columbia has ever had has been reduced to such a condition of infamy by the disclosures which have been dragged from unwilling witnesses that nothing further that can be brought against it is likely to affect its reputation. The malodoreus deal perpetrated against the people of the western province by Premier McBride and those who were his accomplices cannot be justified in any particular. The plot was one of the boldest ever conceived, the aim being to hold up the Grand Trunk Pacific and to turn the land purchased by the syndicate at one dollar an acre over to the company at a profit of forty thousand dollars. The members of the McBride government who were parties to the deal should not be allowed to escape censure and punishment for their acts, as is feared, will result in the event of the legislative committee not being permitted to present its report."

In addition to these enterprises at home, the co-operatives own six steamships, so that it is possible for their cargoes of wheat for the home mills to be carried from the Great Lakes to the Scottish and English headquarters without breaking bulk. This saving of expense, together with the absence of middlemen's profits, will enable the marketing in Britain of flour milled from Candain wheat, at a price unprecedented for cheapness. But this is outdone by the Ottawa Free Press, and it will make our readers smile. For instance, this: "Victoria is one of the cities which is vitally concerned in the construction of the Grand Trunk Pacific railway to the Pacific coast, and the decision of the electors may be considered an approval of the course, to the minor poetry which strikes a respondent chord in the popular breast. Nearly all the gems that are found in volumes of selections from the poets and in authologles have gone the rounds after being written, just as certain songs, which never die, have been sung by the fireside of the humble folk, or airs that have been "illted" and "hummed" by the masses into immortality.
