### GAY WAISTCOATS.

As the silk industry is greatly de deputation to the Prince of Wales on the subect, the idea being that, if only the Prince could be induced to wear silk embroidered waistcoats, a demand might be set for those sumptuous garments. But even if the good nature of the heir apparent was equal to inducing him to appear in public, say in a scarlet vest embroially infectious. A regretted, just as the new regime inaugurated by the French revolution came in. And unless the world gets more foolish than there is any likeli hood of its becoming, the costume will not be easily restored. The splendid waistcoat, we admit, died a very slow death. It remained after the rest of the fine raiment of which it was a part had vanished. Time was-not so many years ago but that some middle-aged folk can recall these mild follies of their youth—when waistcoats were al- THE RATHBUN CO'Y. ways ordered apart from the rest of the suit of clothes. Very moderate dandies had generally quite a little assortmen of "vests," with equally showy scarfs, and possibly pins to match. The gentlemen who clung to buckskin breeches and Hessian boots had, indeed, so many that they seldom wore the same article two days running, and were contin ually adding to their stock.

When Major Dobbin and Joseph Sedler landed at Southampton from the Ramschunder, East Indiaman, the excollector halted long enough to order half a dozen new waistcoats, and to this day the typical John Bull, who stood for his portrait soon after the battle of Waterloo, is invariably rep-And after the waistcoats in brocade, and scarlet, green and purple, and blue velvet got worn out and were not renewed in Europe, they continued popular in America. A trapper or a gold digger, when he returned to civilization with all the extravagant tastes of a sailor from a long cruise, ordered, among his first attributes to the life of towns, a few very gay waistcoats, and, if he desired to cut a figure in St. Louis or San Francisco or Council Bluffs, would direct them to be made of the same material "fore and aft." In the Southern States, especially, fine waistcoats were long popular. Indeed, so familiarly was the weakness of transatlantic visitors known that, in the far away days "before the war," London tailors always kept a "handsome line" of "cut velvet vests" for the "American market." But even the American dandy has at length discarded such vanities, and we are sure that, among the boxes of clothing sent nowadays to the New York exquisite by the London tailor whom he patronizes, such a thing as a gold-sprigged or silk-flowerand then eccentricities in the under garment appear in Oxford and Cambridge, and for a time striped waistcoats like those footmen are doomed to wear were moderately popular with some very young men. But among sober-minded people it would require some courage to go beyond the familiar buff or simply white.—London Stand-

## BONAPARTE AND JOSEPHINE.

The Beginning of the Estrangement Between Them.

It was on October 16th that he arrived at his house on Victory street in Paris. Mme. Bonaparte was not there to give him a welcome. During the absence of her husband she had made her house the centre of a brilliant society which numbered among its members the ablest men of the time. This circle was untiring in its devotion to Bonaparte's interests, making friends for him at home, plotting in his behalf abroad, turning every political incident to his advantage, and building up a strong party which believed that he was the only possible saviour of France. In conduct the associates were gay lect inner coterie withdrew to Plombieres, nominally for repose, but prob-

Into this loval but licentious com pany the sudden announcement of Bonaparte's approach brought something like consternation. Josephine, in paricular, was over-anxious to display feigned devotion to her husband. Learning of his approach, she went out ome distance to meet him, but took the wrong road, and passed him un awares. Hurrying back she found the door of his chamber barred, her absence being of course a confirmation of the general's jealous suspicions. For hours her entreaties and tears were vain. At last Eugene and Hortense joined theirs with their mother's and the door was opened. The breach was apparently healed, but rather to avoid a scandal that from sincere forgiveness, and this scene was the beginning of estrangement.

Bicycle Manners. We observe that many bicyclers have

an anxious or even distressful look while riding. This is unsatisfactory to us. It indicates a lack of freedom and of self-command and of mastery of the wheel. It bears some resemblance to stage frights, and might be called bike fright. Those afflicted with it ought to shake it off at once. Again, we have noticed some men smoking eigars while out riding, and they may think that this makes them look dandy or free-and-easy. We don't like the habit. It is a bad one. It must be offensive to the eyes of young wheelwomen of good taste. Since cycling has become the rage, we ought to have a code of bicycle manners, in which sound principles shall be laid down, and means for their application shall be provided. Everything ought to be properly regulated in the earlier stages of the bicycling era of the world, so hat the right thing may be establish-
