Press Comment

NOEL REVENUE FROM POTATOES

Toronto Globe: High prices for farm products are again on hand with short crops of wheat, corn, and other crops. The potato crop is also short, and the price is high. The potato crop is also short, and the price is high. The potato crop is also short, and the price is high.

MISGUIDED MUSTAPHA KEMAL

Kansas City Times: President Mustafa Kemal of Turkey has appealed to his loyal followers to discard the fez and kalpak and appear in the "headgear of modern civilization". There is a prevalent idea that if we wear conventional clothing and live in houses with modern plumbing we are civilized. Unfortunately this doesn't follow.

RUSSIA ON THE RHINE

Berlin Deutsche Allgemeine Zeitung: The Russian section filled double the space it took up at the Spring Fair. This is the third time that the Russians have participated at the Cologne Fair.

THE LOOSE NIT

Los Angeles Times: The paper spoke the other day about a loose nit wrecking a car. That is one trouble we have. There are too many loose nits running around in cars. Some of them ought to be locked up. When a loose nit gets tight it may be worse, at that.

SOME JOKE

Detroit News: Crows have stolen so many golf balls from a Williamstown, Mass. course the players are carrying guns. However, the crows have seen some of the shots on this course and are having a good laugh.

DECADENT EUROPE!

New York World: The ability of America to capture foreign markets in the face of European competition is still to be demonstrated. European iron and steel products have been delivered at our own seaboard cities during the past year at a price under domestic quotations and in spite of the tariff. The same thing has recently happened in the case of plate glass, and British competition is cited as one of the chief causes of depression in the New England cotton textile industry.

PEACE IN EASTERN EUROPE

Rome Riformatore: Though we may consider that the conventions arrived at in the Locarno Treaty sensibly diminish the perils and fears of conflicts, it is nevertheless true that they do not affect the problems which are vital to the new States such as Poland and Czechoslovakia or to the Succession States such as Jugoslavia and Austria. The Conference of Locarno does not offer a solution for questions in Eastern Europe; it has done no more than to indicate the method of approach.

GLASGOW SLUMS

Lewis Spence, in the London Nineteenth Century: Bad housing is the root-cause of discontent in the Clyde

ALEX. BEZANSON PAYS THE ADVOCATE A VISIT

He Has a Crow To Pick With The Editor And With The C. P. R.

Mr. Alex. Bezanon, of the top of Dalhousie Mountain, was in Pictou on Tuesday and paid a call to the Advocate office. Mr. Bezanon lives alongside of Bezanon's Lake where Friend Munsie catches the nice half pound trout in the early spring, and one of Mr. Bezanon's errands to town was to record a deed to the lake. He had another little errand, he said. He wanted to pick a crow with the Advocate man because the Advocate had mentioned that he had taken a trip to the West, and away over in Waugh's River or somewhere around there had people had seen this item and had immediately come across country to Dalhousie, and taking advantage of his absence, stolen two pet rams and some sheep, he owned. So when he arrived home, he was missing the sheep. And of course the paper was to blame for it. It had not told about his going away, the had men would not have come across country and stolen the rams and sheep.

TO EXPECTANT MOTHERS

Letter from Mrs. Ayars Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Spring Valley, Sask.—"I took the Vegetable Compound before my last confinement, when I got to feeling so badly that I could not sleep nights, my back ached so across my hips, and I could hardly do my work during the day. I never had such an easy confinement and this is my sixth baby. I read about Lydia E. Pinkham's Vegetable Compound in the 'Farmer's Telegram' and wrote you for one of your books. We have no druggist in our town, but I saw your medicine in T. Eaton's catalogue. I am a farmer's wife, so have all kinds of work to do inside and outside the house. My baby is a nice healthy girl, who weighed nine pounds at birth. I am feeling fine after putting in a large garden since baby came. (This is as good as she can be.) Yours is the best medicine for women, and I have told about it and even written to my friends about it."—Mrs. ANNIE E. AYARS, Spring Valley, Sask.

KARSDALE

Rev. Dr. McConnell delivered a splendid address in the Port Wade United Church on Tuesday last.

DR. MC COLLEUM ON EGGS

Dr. McCollum, a noted scientist, believes that the real reason why the men and women of China and Japan are small in stature is that their diet has been faulty, lacking mainly in eggs and milk. In fact the Doctor thinks that differences both in bodily and mental equipment are due to diet rather than race. The use of eggs in a limited way by the Chinese has probably saved them from extinction; but they do not use sufficient of the hen product and no milk. In contrast, the eminent scientist points out, according to Pamphlet No. 59 of the Dominion Department of Agriculture, the people of Europe and America are, comparatively speaking, liberal users of both eggs and milk; they are the largest people in the world, have the lowest death rate, the largest span of life, and accomplish the most in every line of activity. The Doctor further believes that faulty diet predisposes individuals to tuberculosis. The answer is more eggs and more dairy products.

WEMBLEY'S BIG DEFEAT.

London.—The British Empire Exhibition at Wembley, it was announced in the House of Commons tonight, will cost the British Treasury £1,150,000. Parliament will be asked to vote that sum, but when liquidation of the exhibition is complete there is likely to be a certain amount of the proceeds from sale of assets to be returned to the Government.

ARGENTINE WHEAT CROP

Officially Estimated at 235,000,000 Bushels.

Ottawa.—Argentina's wheat crop about to be harvested, is at present officially estimated at 235,000,000 bushels, as compared with 191,000,000 last year, according to a cablegram received today at the Department of Agriculture from the International Institute of Agriculture.

THE OLD, RELIABLE

Use Gillette's Lye to MAKE YOUR OWN SOAP and for cleaning and DISINFECTING. Gillette's Lye Protects. Saves Your Money.

Here and There

Basking in brilliant autumn sunshine, the coast of British Columbia offers a striking contrast to the severe winter weather already making itself felt in other parts of Canada. On the Coast, golf courses are crowded, the ocean is dotted with figures of bathers taking their daily dip, and pleasure craft still ply the waters.

One hundred thousand dollars' worth of Black Fox puppies were shipped to Antwerp on the Canadian Pacific liner, "Melita" recently. Especially built cages they will be conveyed by the Dominion Express across Europe to the farm in Switzerland where they will form the nucleus of a fox-breeding establishment.

Another instance of foolhardiness. A recent report from Hull is to the effect that an automobile, travelling at high speed, crashed through both gates at the Chelsea Road level crossing just as they were being lowered to stop traffic so that a light engine should pass. The automobile smashed its way over the tracks barely two feet ahead of the locomotive.

Arthur Edward Shave, in the employ of the Canadian Pacific Railway since August 18, 1908, when he was appointed clerk in the office of the Treasurer, has been appointed assistant treasurer of the company. Mr. Shave became assistant chief clerk in the office of the Treasurer in 1915 and was promoted Chief Clerk in 1919.

The apple is a typical Canadian fruit and among the finest grown in the Dominion. It is incomparable as a Christmas gift for friends and relatives in Great Britain. In order to facilitate shipments, the Dominion Express Company are offering special rates. Standard boxes containing about 150 and standard barrels holding about 375 will be sent from Quebec or Montreal up to the close of navigation to any station on a railroad in Great Britain or Ireland at a cost of \$3 and \$6, respectively.

To perpetuate the memory of the late P. Alexander Peterson where engineers in this part of the country gather, a portrait of the famous engineer, done in oils by the late Robert Harris, Canadian artist, is to be hung in the Engineering Institute on Mansfield street. The late Mr. Peterson, former engineer of the Canadian Pacific Railway, took a leading part in the railway construction in Eastern Canada during the latter part of the last century.

According to a report just issued from Canadian Pacific Railway headquarters, an average of one instance of gross carelessness on the part of automobilists every seventeen days is the record during the last three years and two months in connection with level crossings in New Brunswick, Quebec, Ontario and the Algoma districts. These instances number 69 from September 1, 1922, to October 31 last, or a period of 1,157 days. They resulted in injuries to 53 persons, of whom two died.

Creation of a new industry in Western Canada covering a product which is now imported into this country to the value of about five million dollars annually is foreshadowed by the samples of hemp now on display at the Windsor Station, Montreal, according to G. G. O'Malley, Development Engineer, Canadian Pacific Railway. Mr. O'Malley stated that considerable work had already been done in the West of Canada towards the creation of such an industry. Efforts to promote companies have been made in recent months and there is no doubt that fine stands of hemp can easily be grown in certain districts.

At the Royal Winter Fair, Toronto, Nova Scotia won three prizes in the Creamery Butter competition. The Yarmouth Creamery won two of the three prizes. The Pictou County Dairy being the other successful competitor from Nova Scotia.

The competition was exceptionally strong this year. Entries from every province in the Dominion making a total of over 150 entries in all the butter classes.

The Western Provinces carried off the majority of prizes. It is encouraging to know that Nova Scotia can compete successfully with any province in the Dominion and make the highest quality butter. Credit is due the Yarmouth Creamery Limited and Pictou County Dairy for representing Nova Scotia with honors in such a large and strong competition.

NOVA SCOTIA CREAMERIES WIN AT THE ROYAL WINTER FAIR.

At the Royal Winter Fair, Toronto, Nova Scotia won three prizes in the Creamery Butter competition. The Yarmouth Creamery won two of the three prizes. The Pictou County Dairy being the other successful competitor from Nova Scotia.

389 BARRIE

The Star

CONSIDERING Canada's progress forty years there is no room for complacency. If Canadians face their problems with courage it would be the limits to Canada's future progress. K.C. President of the C.W.P., on November 7th last, on the fortieth anniversary of the centennial of the Pacific Railway. Mr. Beatty's belief that the present is more difficult than those of the past is not less able to cope with the world's problems. Forty years ago Canada had a population of 3,500,000. Today it has 10,000,000. A remarkable fact that the Canadian Company spent \$70,000,000 of bringing settlers to the Dominion building of Canada was a gallant

CANADIAN AND UNITED STATES CHEESE.

Why does Canadian cheese command a higher price in the United States than the home production? It is an American writer that puts the question. He seeks to imply that it is not as might be supposed on account of transportation expenses but because of its greater uniformity and soundness. To Canadians this
