

improve. With feelings of thanks, pleasure, and some satisfaction, we close our volume, and gladly turn to the bright, clean pages of the new, saying in the words of another: "If you are satisfied we are gratified, and if you are gratified we are satisfied."

---

NOTES.

It affords us much pleasure to be able to give our readers such an intellectual and scientific treat as the full copy of the lecture delivered in Faraday Hall, May 6th, by Dr. E. Haanel, F.R.S.C., before the Science Association under whose auspices this journal is conducted. We are sorry that we are not able now to reproduce the illustrations. We are compelled, on account of the length of the address, to suppress other columns, and hold over much matter; but we are well pleased so to do, for "The Physical Basis of Certain Mental Operations" is presented with such charming simplicity and clearness, and such sound scientific teaching, that we regret its shortness. Our readers may expect something further during the year from the same source.

GILCHRIST SCHOLARSHIP.—This scholarship, of the value of \$500, tenable for three years, will be granted this year for the last time in Canada. We are very sorry that the directors have so decided for though the competition has been limited to a few, the men who have been successful have been men who have worthily upheld the reputation of Canadian students. Death has removed several, but we can to-day point to Dr MacGregor, of Dalhousie Univ., Dr. Goodwin, of Queen's Univ., and Dr. Alexander, now in Germany; while those of later years bid fair to rival them.

HAMLIN UNIVERSITY.—Dr. G. H. Bridgman, a graduate in Arts of Victoria University, and lately of Lima Seminary, N. Y. State, has been advanced to the Presidency of Hamline University, Minn., U.S. This University has lately received some
