Mental Activity

is dependent for its success-making results, upon the way the brain cells are fed.

Right food turns "mental activity" into pleasure and profit.

The natural, wholesome food elements from field grains, such as Albumen, Phosphate of Potash, etc., scientifically combined in **GRAPE-NUTS**, are quickly taken up by the human machinery for rebuilding worn-out brain cells.

The practical demonstration of this scientific proposition may be proven by a 10 days' use of
