If you are having trouble about the disposal of your dust and shavings use

"MAHONY'S" IMPROVED DUST COLLECTING & SHAVINGS SYSTEMS.

Especially designed for handling all classes of finely divided material such as shavings, chips, saw dust, etc. Our dust collector is constructed of the very best heavy galvanized steel, and is guaranteed to accomplish its work without back pressure. Will do the work for which it is designed in a first-class, practical manner.

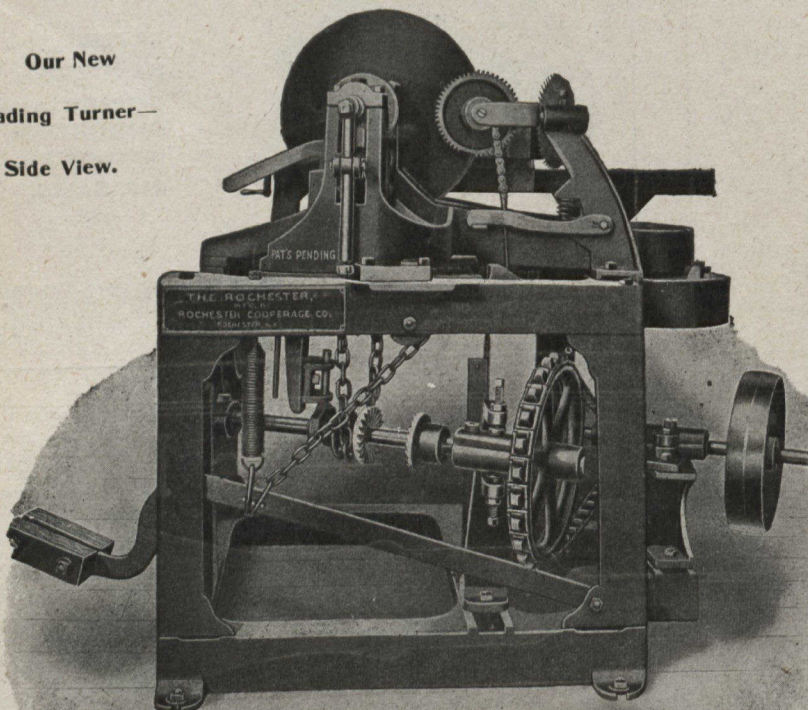

I have had several years' experience with the best firms manufacturing these specialties in the United States, and can save you money. Personal supervision given to all contracts.

A. MAHONY,

505 KING ST. WEST, TORONTO

The Rochester Cooperage Company

Our New
Heading Turner—
Side View.

530 to 542 Child St.,
Rochester, N.Y.

**Manufacturers of
Machines for Slack Work
that are the ACME of In-
ventive Genius.**

Illustration shows the best slack barrel heading turner of its kind ever devised. Its capacity is limited only by the skill and activity of the operator. Our Turner has no gears or worms to wear out and cause annoyance, the operator stands closer to clamps and has easier access to same, which enables him to feed faster. Machine has **Greater Range** than any other, cutting from the small sizes up to 28 inches, it also has an automatic throw-off which works positively every time and the heading refuse drops down straight from clamp, thereby doing away with any possibility of machine clogging up.

**Machines Sent on Thirty Days' Trial.
