

## Section 9: Charting Your Data

---

16. Make sure the insertion point is in the Title text box and type **Fiction Sales** *The text appears in the sample chart.*
17. In the Subtitle text box, type **Best Sellers** *The text appears in the sample chart.*
18. In the X-Axis text box, type **Book Type** *The text appears in the sample chart.*
19. In the Y-Axis text box, type **Revenue** *The text appears in the sample chart.*
20. In the Destination area, be sure the Current Sheet option button is selected
21. Choose Finish *The Chart Expert closes and the sheet is active. The pointer changes to a bar chart with a + (plus sign).*
22. Position the pointer over the upper left corner of cell F4 and click the mouse *The chart is inserted at cell F4. The title **Adventure** might not be visible, due to the limited size of the chart pane.*
23. If necessary, use the scroll bar to bring the entire chart into view
24. Click the QuickTab button *The Objects sheet appears.*
25. Examine the chart icons *The Chart1 icon represents the chart you created. The Chart2 icon represents a chart on another sheet.*
26. Click the QuickTab button *The Books sheet reappears.*
