## CATALOGUE OF SHELLS, WITH DESCRIPTIONS OF NEW SPECIES.

BY DR. A. A. GOULD.

Catalogue ..... 243-245

## VI.

## FISHES OF LAKE SUPERIOR COMPARED WITH THOSE OF THE OTHER GREAT CANADIAN LAKES.

Geographical distribution; the prevalence of general laws over mere peculiarities of position and circumstances, 246-7.—Migrating animals do not wander, but regularly return: light thrown on the question of unity or plurality of creations by the examination of the fishes of Lake Superior, 248.—Examination of the question whether the Petromyzons should form a subclass by themselves, or be classed with the skates and sharks, and conclusion that they are simply embryonic forms of the latter type, 249-52.—Description of *Ammocetes borealis*, 252-4.—LEPIDOSTEUS, as showing the reptilian character of the ancient fishes, 254-63.—The sturgeons; their geographical distribution, 263-4.—Circumscribed within narrow limits in various parts of the world, yet linked together by intermediate forms; peculiarity of their distribution in America, 265-6.—*Acipenser levis*, Agass., 267-71.—*A. carbonarius*, Agass., 271-6.—*A. rynchæus*, Agass., 276-7.—*A. Rupertianus*, 277-8.—On the position of the Siluridæ and Goniodonts as aberrant families of the order of Ganoids, 278-9.—The genus PIMELODUS; probably to be further subdivided; remarks on several species, 279-80.—*P. felis*, Agass., 281-4.—Genus PERCOPSIS, Agass., representative of an ancient type of the tertiary period; intermediate between Percoids and Salmonidæ, 284-5.—*P. guttatus*, Agass., 286-9.—PERCOIDS; great difference in their distribution, between Lake Superior and the Lower Lakes, 289-91.—Observations on *Perca flavescens*, 291-3.—On *Pomotis vulgaris*, 293.—*Lucioperca Americana*; value of the opercular spines as distinctive mark in this genus, 294-5.—*Grystes fasciatus*, Agass., 295-7. *Huro nigricans*, Cuv., a *Grystes*, 297.—COTTOIDS; importance of correct appreciation of the connecting character, rather than the amount of external variation, in classification, 297-8.—Subfamily of ETHEOSTOMATA; ETHEOSTOMA; PILEOMA; PÆILOSTOMA, Agass., BOLEOSOMA, 298-9.—COTRUS; character of genus; various opinions as to number of species, 300.—*C. Richardsons*, Agass., 300-3.—*C. Franklins*, Agass., 303-4.—BOLEOSOMA, characters of, 304.—*B. maculatum*, Agass., 305-7.—PILEOMA; characters of this genus, 307-8.—*P. zebra*, Agass., 308-10.—*Gasterosteus nebulosus*, Agass., 310-14.—*G. pygmaeus*, Agass., 314-15.—Family ESOCIDÆ, 315-17.—*Esox boreus*, Agass., 317-21.—Family GADOIDS; obscurity of their real affinities; disagreements and uncertainties as to certain North American genera and species, 321-4.—*Lota maculosa*,
