With other new features, together with all the matter of previous editions. In one volume of 1750 pages. Price, \$6.50. Sold by all Booksellers.

G. & C. MERRIAM, Springfield, Mass.

"The eighty pages of Illustrations, comparable in fineness to those of bank notes, are worth the price of the book."—*Ch. Herald.*

PICTURES IN A DICTIONARY.—A neat cut or diagram will often give a better definition of a term than a page of letter press. In respect to size, completeness, mechanical execution, and variety of subjects, Webster's are unquestionably the best. Worcester's, though many of them are well enough, are, on the whole, a failure. They are very small, many of them are obscure, and the assortment ill-proportioned. Ornithology, somehow, achieved a singular monopoly in their allotment. Of 973 cuts in all, 324, or one-third, are birds or fragments of birds; and of this 324, no less than 191 are merely heads or bills of birds. Botany has 144; Quadrupeds, &c., the same; Fishes, 77; Mathematics and Mechanics, together, about 100; Architecture 80; Miscellaneous, Domestic Arts, &c., 70; and Physical Science, a few. Reptiles and Insects are as rigorously excluded as from Ireland.—*New Englander.*

WEBSTER'S GREAT DICTIONARY.—We learn with much pleasure from the publishers, Messrs. G. & C. Merriam, Springfield, Mass., that the new Pictorial Edition of "Webster's Unabridged Dictionary" is having a very extended sale. Every school, every office, nay every dwelling, should be provided with it. It is the standard not only for spelling and definition, but also for correct pronunciation. The amount of general information which is also condensed within its pages is truly astonishing. In the course of a very extensive professional practice we have frequent necessity to seek out and apply the best technical terms and descriptions. Webster is our constant recourse, and we never consult him in vain. It is surprising to observe how replete the work is. As an educational medium it enjoys a very high reputation. For the schools of New York state no less than ten thousand copies have been purchased, while in Massachusetts, Michigan, New Jersey and Wisconsin an equal number has been obtained, or one copy for almost every school. It is said that more than ten times as many copies of Webster are sold as of any other similar publication.—*Scientific American, May, 1862.*
