handicapped on account of building operations, and important stocks cramped for room, but the jingle of 50 cents doing the work of a dollar carries everything before it in this Clothing section. We don't need to waste our emphasis on big, black type. When we get through we're going to have the finest Clothing store in Canada, and we can afford to sacrifice something now for the sake of what's ahead.

There's just enough enthusiasm in this list to make one wish the quantities were twice as large, although it's room we want and not goods. The new addition is going to revolutionize store plans and selling arrangements, and the sooner we can turn these into money the easier we can make it for architect and builders.
