The Standard

We have twelve chainless blcycles among the National wheels, and the Columbia Chainless is the Standard,

The large gear wheel is always true. It is the hardest gearing to make in all chainless wheels. But in the Columbia Chainless it is of such a shape that in tempering it shrinks into its proper scientific form. And it is absolutely perpendicular to the crankhanger.

All parts are protected from dust. It needs no graphite. It is always clean,

Just Half

In E. & D. four-point bearings the load cannot give itself any leverage, as the bearings only carry the load in a direct line from axle to hub.

The pressure on the E. & D. four-point bearings is divided in each bearing between two points, while in ordinary bearings it all comes on one point. In the E. & D. four-point bearing, as compared with the best bearing of any other type, the pressure is just half. Just half the pressure. Just half the wear.

Debated Question in the Great

For the Running of the Traction Cars by the Municipal Corporation by 1910.

London, May 24.—Municipal ownership of traction facilities in the metropolis was substantially extended by the London County Council when notice was served on the companies in the parishes of Deptora, Greenwich and Southwark requiring the surrender of their franchises, embracing 20 miles of tramways. Coincident with this action the Council announces its intention of availing itself henceforth of its right to acquire tram properties as fast as their grants expire, with a view to public ownership of all lines in the county. It is said that the year 1910 will see this accomplished. Meantime the systems are being moderalized through the substitution of double for single tracks and of electric-conduct, Mr. Thomas Bentley Westcott, vice-charman of the Highways Committee of the County Council, said recently: "Public ownership of traction utilities is no longer a debated question in London. What difference of opinion there is still is only over the advantages of municipal ownership as compared in streets and forms an immense entries in South Africa, is arranged in streets and forms an immense entries in South Africa, is arrangeded in streets and forms an immense entries in the priorism containing every concelvable article hat can be offered for sale.

compared with the results of leasing the lines to private corporations. The systems at present municipally controlled showed during the last year a profit of £80,000 and a reduced tax rate of a farthing in the pound. Inasmuch as the bulk of the pront came from the leased lines, experience favors rental rather than municipal operation. It has been found impossible entirely to divorce municipal conduct of the roads from politics, not to mention the bothersome routine entailed to public officials.

"The Council is firm on one point—never to consider giving another franchise to private interests. The highways are essentially the property of the people, and the people are entitled to the benefits of any commercial value they may possess."

The annual spring fair was held yester-Davenport Methodist Church.

The choir of Davenport Methodist Church spent a very pleasant evening at the home of Mr. and Mrs. Farr, Davenport-road, Wednesday. Mr. John Shaw, secretary of the choir, expressed the regret of the choir on the retiring of Mr. John Lainson, who has led the choir for the past three years, and as a token of esteem presented him with a splendid bound copy of the Methodist hymns and music. After an expression of thanks by Mr. Lainson, a splendid photograph of the church was presented to each member of the choir as a souvenir. Refreshments were served and a very pleasant evening was brought to a close. day under most favorable conditions The close. at 2500, seemingly enjoyed the events to the highest pitch, and perfect order and goodfellowship pervaded the entire day.
