THURSDAY'S SLUMP IN THE MONTREAL MARKET

"The Bottom Fell Out and Great Was the Fall Thereof," Says the Witness—The Stringency in the Money Market Was One of the Causes.

(Montreal Witness, Thursday.)

The bottom fell completely out of the local market this morning, and great was the fall thereof of many of the prime speculative favorites. There was absolutely no support from any source, but there was a grain of satisfaction to be gathered from the fact that most of the offerings, or liquidations, or whatever it might be called, were of comparatively small accounts, and while they made a pretty substantial appearance of wholesale selling in the aggregate, did not represent anything but the overhauling of stocks held by what is usually called the "small fry."

A market with the characteristics of this morning's session is usually a bitter blow to the salary man, who, through the continual line of "good things" that are presented, thinks to augment his income by "dabbling," and in the vernacular of the street gets "left."

The selling has no doubt been precipitated by the stringency in the local money market, there being practically no funds available to carry the large volume of margins this market is known to have during the past few months. The result has been wholesale loss to many of the market habitués. It is not certain if the slump will help the local situation, notwithstanding a pronounced desire on the part of a number of people to buy at the decline. The losers today will be completely scared away from the market for some time to come, and there will be some difficulty in regaining the lost confidence, although the selling has been caused by conditions that could neither have been foreseen nor prevented.

(Herald, Thursday.)

The local market today experienced the worst fall in many months.

The month of January has been an unfavorable one for the market, but the
