

# THE PEOPLE OF Trinity Medical College.

## **PRACTICAL CHEMISTRY.**

Practical Chemistry is taught very thoroughly, under the personal supervision of the Professor. In view of its growing importance, great care has been bestowed on the fitting up of this Laboratory, and the Course will include experiments of various kinds, qualitative and quantitative analysis, etc., etc. In view of the many cases of poisoning coming before the courts of law, Toxicology will have much attention paid to it—no pains being spared to prepare students for the grave responsibilities which such cases impose upon them as practitioners. Each student will be supplied with the requisite reagents and apparatus, and the course will be adapted to meet the needs of the physician in his daily practice. Special attention will be devoted to urinary analysis as regards both normal and abnormal constituents.

## **PRACTICAL PHYSIOLOGY.**

A Physiological Laboratory has been fitted up and furnished with all the best modern appliances necessary for the practical study of this important subject. Amongst the apparatus recently imported for this Laboratory, are a DuBois Raymond's Coils, DuBois Raymond's Keys, Foster's Moist Muscle Chamber, Revolving Drum Cylinders, Galvanometers and Scale, Electrodes, Excitors, Mercurial Keys, Strickner's Warming Stages, Hot Air Baths, etc., etc., and further additions are being made from year to year.

## **MICROSCOPIC ANATOMY.**

Microscopic Anatomy, Normal and Pathological will receive ample attention from the several Lecturers, upon the branches in which the microscope is now employed; and in addition to this, very complete Courses of Instruction will be given upon Microscopy, and the use of the Microscope in connection with Normal, and Pathological Histology, both of which subjects are now required by the Medical Council. A large number of the most modern and best microscopes from Europe is provided. The various methods of injecting, staining, mounting, etc., will receive special attention.

## **OPHTHALMOLOGY AND OTOTOLOGY.**

Special Lectures will be given at the General Hospital on Diseases of the Eye, Ear and Throat, with instruction in the use of the Ophthalmoscope, and other modern instruments employed in ophthalmic and aural practice. An entire wing of the Hospital recently built, is appropriated specially to ophthalmic, ear, and throat cases.

## **ZOOLOGY AND MEDICAL PSYCHOLOGY.**

A course on Zoology will also be delivered if required, as well as one on Medical Psychology, for the special benefit of gentlemen who desire to graduate in the University of Toronto, or wherever else such courses are demanded.
