PERSONALS

George C. Lawrence will leave on Monday morning for Boston on his annual fall trip.
Senator Dan Gilmour and wife, of St. George, were guests at the Royal Yacht Club, having arrived from Halifax by the morning train. They left for home this morning.
Capt. and Mrs. Holmes have returned from their summer residence at Penfield.
Miss Olive Stone is visiting Mrs. Leonard Beer, in Truro.
Mrs. Alfred Morrey left last evening for Montreal to visit Mrs. Wm. Adams.
Mr. and Mrs. Grey Murdoch are spending some weeks at the White Mountains, N. B. Mr. Murdoch will afterwards visit friends in Lowell.
Mrs. Holmes, P. E. Isard, is the guest of her father, James F. Robertson, Rutledge.
Miss Lydia Kimball left on Thursday to visit her sister, Mrs. Dods in Montreal.
Mrs. A. P. Crockett will leave this evening for Fredericton to visit relatives.
Miss Pauline Powell has gone with friends to spend some time in California.
Great regret is expressed at the removal from St. John to Montreal of Mr. and Mrs. Louis Barker, while at the same time they congratulate Mr. Barker upon his promotion as manager of the National Drug Co., in Montreal.
Mr. MacKay is to leave this evening for Montreal to take a first year's course at McGill. Hugh MacKay will accompany his brother to Montreal.
On Wednesday afternoon Mrs. John K. Schofield entertained at tea at her residence, Sewell street, in honor of her son's fiancée, Miss Nellie Irvine, whose marriage to Mr. Schofield will take place on October 16.
Mrs. J. Morris Robinson and her daughter, Miss Nora, expect to leave for a trip to Europe some time in November, going first to Naples, thence to Rome, where they will be met by Mrs. Digby and her daughter, who are spending a couple of years abroad. Later the party will visit England and the continent, spending the winter and part of the spring travelling. Several well known city people will leave on Monday for Boston to spend a week

eighteenth and on business as well. Among those who expect to go are Mr. and Mrs. William Allison, Miss Annie Puddington, who intends spending the winter in Massachusetts; Mrs. Rupert Turnbull, Mrs. George V. McInerney and wife, of St. George, who will go to New York to remain for two or three weeks.
The Messrs. Mignon and Frances Kerr, of New York, who have been visiting friends in Chester, N. S., have returned to St. John.
Miss Winifred Raymond is in Woodstock, the guest of her uncle, Lee Raymond.
Mr. and Mrs. Gyde and little child, who spent the summer at Deck Cove with the Messrs. Mignon, have returned to their home in South Africa.
The engagement of Miss Marguerite L. Wright, daughter of the late Arthur Wright, to Arthur Noel Lee, of the Bank of Montreal staff, and son of William G. Lee, is announced.
Mr. and Mrs. Frank D. Alward and daughter have arrived home, after spending three weeks in New York.
James B. Daly of the customs house staff left today on a visit to Boston.
James Powers, of the street railway company's staff, will leave tonight on a three weeks' trip to Boston and other eastern cities.
Mr. and Mrs. Fred C. Jones, accompanied their son Ralph and their niece Miss Madeleine Francis, will leave tonight by the Calvin Austin for Boston, en route to California.

ZEKE KNEW HUBE

Rufe was telling Zeke about a terrible escape he'd had the night before, after he had crossed the dam at the river and was making for his cabin about a half mile through the dark woods.
"An' just as I stepped into de brush I hears a funny noise like a shoat enortin'. I looks up an' a blue light jumps out er de ground an' shines itself into a ghost er de night. I was scared, I says, 'I want you, Rufe Jackson.'"
"I walks up to it an' shakes my own finger right in its face. You mind your business an' I'll mind mine," I says, an' turns on my heel an' goes right on. Now, what'd you er done, Zeke, in a case like dat?"
"I'd er done just what you done, you darned lying nigger."

Wall Street Notes.

New York, Sept. 28.—Americans in London strong from 4 to 6 p. m.
Reading for August, all companies, shows net after charges and taxes \$1,468,390, an increase of \$1,162,552 over last year.
Illinois Central year ended June 30, shows earned on capital stock 3.17 against 3.02 last year.
It is said that D. G. Reid will head the new tobacco company with \$50,000,000 capital.
St. Paul annual meeting at Milwaukee today.
Foreign trade improvement over same period last year.
The advances in R. I. and Mo. P. are founded on the tremendous haul results in the roads territory.
The buying in Steel has been very heavy and of the best character. The steel companies' earnings this year are likely to reach \$12,000,000.
Readings earnings are great. It is rather ridiculous to read financial writers' talk about segregation of Reading properties. They are already segregated. The Reading Company is a holding company and holds the Philadelphia & Reading R. R. Co. The Reading Coal & Iron Company, and the Reading Iron Company, and owns 90 per cent of the Central of N. J. R. R. The stock, ultimately, will sell much higher. The public are taking more interest in the market. Do not look for any material setback just yet, and higher prices are expected.
Eric railroad earnings—August, net increase \$127,378; two months net increase \$198,700.
New York City, Sept. 28.—A clique of big op-

WOOD PULP NOW SUPPLIES FABRICS FOR WOMEN'S DRESS

Blouses, Laces, Trimmings and Stockings Made From It in England

London, Sept. 28.—"English women of all classes have dressed better and more attractively this year than ever before," said a prominent West-end draper, when questioned on the subject. "This is due to the fact that the prices of silk blouses, ribbons, and the lighter grades of tulle, foulards, crepe de chine, and mull, so much favored for summer and evening wear, have fallen to a figure that tempt even the slenderest purse. Yet, I wonder how many women realize that these so-called silken ripples with which they so gleefully adorn themselves to gladden masculine eyes—and even more to rival one another—are really made from wood pulp, and have not even the remotest connection with the silk worm or the mulberry leaf."

"It is a fact, though just the same, that manufacturers in England and on the continent have been experimenting with wood pulp fibre as a substitute for the product of the silk worm for the last three years, but it was only last winter that they finally succeeded in overcoming the drawbacks to its use. There are now half a dozen big firms engaged in the manufacture of all kinds of 'silk' goods from wood pulp fibre, including laces, trimmings, and stockings. One of these firms employs 1,000 hands, and turns out 25,000 yards of silk a week. The output of this plant, however, is only a small part of the artificial product consumed by the manufacturers of the different commodities in which it is used.

"The necessity for the substitution grew naturally out of the enormous and constantly growing demand for silk materials. There was a time when a woman got a black silk dress and wore it for years, and only people of means possessed this one silk dress. But now, especially in the summer time, almost every other woman who comes along is wearing a 'silk' frock of some sort, or at least a 'silk' blouse. The badly overworked silkworm has not been able to keep pace with this increasing demand. Moreover, the very best silk is more silk, but for cheaper silk as well. Even the men entered the field with a growing demand for silk hose and underwear.

"The natural solution, of course, was a consequence, I am sure, of the fact that there is now no such thing as absolutely pure silk on the market, while every manufacturer knows that it is a physical impossibility to dye black silks without adding some weight to the fabric. It is also impossible to detect the real quality of silk in a garment, the only way to acquire this knowledge being to submit it to a chemical analysis. Women buy from style and color without knowledge of the quality. There is not one who can tell the difference between two pieces of silk on a counter, though one piece may be worth fifty cents a yard more than the other."

This fact made it more easy for the manufacturer to find a substitute for silk—something that would look like silk, give the same feel like silk, and perhaps be silk at all. The chief trouble with the wood pulp fibre in substituting was to make it really and truly a pulp, and to part readily under tension. But lengthy experiments were undertaken, and the wood pulp fibre is introduced into wash cottons as silk stripes or figures.

Now, the difficulty was to meet a beautiful woman nowadays who is beautifully groomed with a minimum of the imagination to think of her as being engaged in wood."

SCHOOL OF JOURNALISM AT COLUMBIA OPENED

First Year Classes Number Reporters of Several Years Experience

New York, Sept. 28.—The opening of the new school of journalism at Columbia University found an enrollment, which, according to Dr. Talbot Williams, its director, met all expectations. The student body of the new school is representative of every section of the country, indicating the widespread interest, aroused by the late Joseph Pulitzer's gift.

Nearly half of the men in the first year class are newspaper reporters of from one to four years' experience. The registration in the upper classes is made up of men who have received university degrees and who desired technical newspaper training to fit themselves for journalism.

BURIED TODAY.
The funeral of Mrs. Mary Cronk took place this afternoon at 2:30 o'clock from her late home in Duke street. Funeral services were conducted in the cathedral by Rev. E. J. Conway and interment was in the new Catholic cemetery.

The funeral of William G. Collins took place this afternoon at 2:30 o'clock from his late home in Duke street. Funeral services were conducted by Rev. Mr. Steel and interment was in Fernhill.

errators is reported to have taken hold. It is said the Morgan interests are not objecting to it.
In some quarters of the street it is intimated that the manipulators are playing for a big Monday opening.
Canadian interests are assured that there will be no serious money stringency here and are reported buying some of the low priced rails.
In speculative circles, well informed, there is talk of taking up low priced railroad stocks like Erie and advancing them sharply next week.

TO MAKE FOR MORE SAFETY IN NAVIGATION

Change in Carrying of Lights Which is Believed Practical

Montreal, Sept. 28.—Ships that pass in the night at present show one port light, one starboard (green), and one or two mast head lights, and frequently also a tall light, the latter being ordinary white lights. While vessels may have many other lights gleaming from their port-holes, those named are known as the "navigating" or "under way" lights, but a scheme is now being considered by Lloyd's, the Board of Trade and the British Admiralty whereby ships will to a certain extent, be classified by the number of lamps they carry.
A. S. Leupold, of Montreal, suggests a new method of showing navigation lights when "under way" that all vessels of more than 25,000 tons register, of any speed down by a sailing vessel in the English Channel on a clear night in the spring of 1912) will make beforehand that it is a large sailing vessel that is bearing down

upon him and be able to alter his course accordingly. The pilot on the bridge of the "Mauretania" in the Ambrose Channel will be able to shape his ship's course to pass by with double safety the approaching "Olympic" or "Imperator".
At night a steamship's size may at present be roughly judged by the number of lights shown from her port-holes and the distance between the two mast head lamps is a further indication in the case of large two masted steamers, but in the case of three or four masted steam vessels of great tonnage, dimensions are not so easily estimated, because the distance between the mast head lights on the first and second mast is reduced to about one-third, and port hole lights and mast head lanterns are really only a gauge to size when the ship is being approached from an angle. The proposed new system tells one at a glance practically what class the ship belongs to and, therefore, might be worthy of careful consideration.

46 King Square.
Dear Sir—I take pleasure in recommending your Perfect Baking Powder, having used it for fifteen years. It never fails.
Yours respectfully,
MRS. CHAS. W. BELLE.

WEAK, NERVOUS PEOPLE

This is to those who lack courage, whose nerves are shaky, whose brains are muddled, whose confusions, restlessness, confidence gone, irritability and easily depressed, who are backward, hesitating, unable to venture because they are afraid of failure, who want somebody to decide for them. It is to those who are nervous, who are afraid of failure, who want somebody to decide for them. It is to those who are nervous, who are afraid of failure, who want somebody to decide for them.

gish circulation, stimulates the brain to activity, and fills the body with life, ambition and endurance. In one day it cures Nervous Disorders, Weak Back, Lumbago, Rheumatism, Stomach, Liver, Kidney and Bowel Troubles. "Come-and-Go" Pains, and that Tired Feeling, after every other treatment has failed. Every one who ever used it recommends it, because it is honest. It does great work, and those whom I have cured are the most grateful because the cure costs so little.

Dear Sir—I wish to congratulate you on your success in inventing such a blessing to mankind, as your Electric Belt. I should have written to you about my Belt before. I wore it only three weeks, then all the soreness in my back and thighs left me and my bowels became regular. Wishing you continued success in your business, I remain,
W. G. FRIZZELL.

Dear Sir: I am writing to let you know how my brother is and to thank you for your kindness, also to show you how he feels towards you. You know, he has not been able to walk for some time. He can walk now. His strength is surely returning. Doctor, your Belt has done for him what nothing else on earth could do. Even now there are those who shook their heads when I told them of the Belt; now they are amazed. I thank you with all my heart, and so does my brother, for the improvement so far is encouraging.

(Miss) A. DOUGLAS,
Royal Hotel, St. John, N. B.

Wherever you are I think I can give you the name of a man in your town that I have cured. Just send me your address and let me try. This is my twenty-fifth year in the business of pumping new vim into worn-out humanity, and I've got cures in nearly every town on the map. Come and see me, and I'll fix you up, or if you can't call, write to me. I've got a nice book on men that I'll send free, also one for women, which you can have by asking for it.
