Faulty Building. The school was over-crowded and quarters had been provided for the younger children in the attic. Strange as it may seem, more of the pupils es caped from this part of the school house than from any other. The children were under good discipline, they had been practiced frequently in the fire drill. Their teachers, without exception, retained their self-possession, showing great courage in the face of imminent death, and yet more than half of these little ones died horrible deaths because of the faulty building arrangements. The school house wa two stories and a half in height, the walls being of brick and concrete. Inside it was a shell which burned with almost inconceivable rapidity. The en-tire interior was a mass of smoking minutes after the alarm of fire was

Children Led to Death. Miss Anna Moran, the principal of the school, denies that the doors open inward and insists that they were never locked during school hours.

JAPAN SHOWING

THREATENS FORCE TO RECOVER TATSU MARU

Wants Unconditional Release by China-Refuses Arbitration of British.

Pekin, March 5.-Japan is threaten ing force to recover the Japanese

cruisers on the charge that the cargo consigned to a merchant of that place,

Changeen Chun, Viceroy of Canton, awaiting proof that the vessel and its cargo should not be confiscated. The coercion of China is feared here on account of the weakness of the gov-

ment stairs and without knowing it we led those little children into the very face of the fire. Only one of the double outer doors was open. The other was fastened by a spring at the Chinese government, Japan's refusal pp. Before the janitor got it open the to accept China's proposal to appoint a joint Japanese and Chinese commisthe vestibule and the others in a panic, stumbled and climbed over them. It was frightful—so near safety.

Collingwood Disaster--Construction Faulty.

outside, men were trying to pull the children out, but the crush was so tight that it was almost impossible. A dozen died within a foot of absolute safety."

Investigation to Be Held.

A rigid investigation into the cause of the fire is promised. Governor Harris last night announced that the state authorities would look into the matter of them children between the ages of them children between the ages of them children between the ages of the color of them children between the ages of the children out, but the crush was so tight that it was almost impossible. A dozen died within a foot of absolute safety."

To-day China proposed arbitration by Vice Admirals Arthur William Moore, commander in chief of the Brittish China station, but Japan refused these overtures also, and has warned the foreign board that such proposals are unwelcome. She again expressed her desire for the release of the vessel, failing which she said she would take the steps necessary to se-

the Chang Jen Chun soldiers boarded the Tatsu Maru and then hauled down the Japanese flag, when according to the Japanese the steamer was waiting off Macao for a turn of the tide. The steamer's papers show that she was George is continuing his efforts to arrange a softlyment of the trouble working to the same end. The school board of Collingwood has taken up the matter and will look into it carefully. So far, however, no clues of value and no definite information have been obtained.

Coroner's Investigation.

County Coroner Dr. T. A. Burk beautiful and Portugal (Macao is a Portuguese dependency) had the vessel arrested in Macao waters. This is according to the viceroy's statement but whether the steamer was in Macao waters. County Coroner Dr. T. A. Burk be- steamer was in Macao waters or no

EARNEST PLEA FOR TASSE SCHEME

WHAT A BEAUTIFIED VICTORIA WOULD MEAN

William Wainwright of G. T. P. Can Conceive no Objection to Plan.

(From Thursday's Daily.)

It does not seem to make any difreporter goes to see, it does not seem to matter whether they are citizens of Victoria or not; any person who has the interests of the city at heart, who-ever, he may be realizes that the Tasse proposition for the beautifying of the city is one of the most advantageous suggestions for the benefit of the town which has been mooted, The latest person who was interview

ed by the Times was W. Wainwright the second vice-president of the Grand

Trunk Pacific.
It is difficult to make a choice words with reference to the amount of appreciation which the different elements which go to make up the popula tion of the city have expressed con-cerning the scheme, and the word "enthusiasts" has been used more than once. Mr. Wainwright was more than enthusiastic, he was earnest

In substance he said, speaking to a Times reporter this morning: "I not only think that the scheme is a good ne, but more than that I think that it is a thing which is absolutely necessary. I never saw a city which had so many natural advantages and which made so little use of them. Take the case of Ottawa. Ottawa is not a city which is set on a hill, nor is it a city which possesses any natural advant-ages whatever, with the possible ex-ception of the fact that a river runs through it. Yet see what Ottawa has done. The Dominion government, appreciating the fact that the capital of the Dominion should be a city of beauty, have gone so far as to vote a certain sum per annum for the beauti-fying of the city. I cannot give the exact amount which has been provided by the Dominion government, but it is a very cohsiderable sum. To the com-mercial people, those people to whom nothing appeals unless it can show a MANY ARE NOT OF revenue in dollars and cents, the idea did not commend itself. But the wiser people, those people who took some pride in their city, those people who realized that a capital should be, above all things seemly, saw that the expenditure was wise, and very wise at that. Ottawa is not a place, as I said before, which possesses any natural beauty, any yet to-day you would have to go far indeed to find a city which is more
