NAVAL MUTINY ADDS TO RUSSIA'S TERROR.

Battleship's Crew in Revolt--Almost Anarchy Throughout Nation--General Strike Begins Saturday.

ST. PETERSBURG, Oct. 26, 1:15 p. m.—Russia is practically isolated today from the rest of the continent of Europe, as the international train service on all the lines has virtually ceased.

At Moscow cabmen have already fought the strikers, whom they charge with taking the bread out of their mouths. In many cities, especially at Moscow, the question of food is becoming extremely serious.

The whole country is becoming alarmed, and in St. Petersburg a panic prevails. The boats and the wharves are crowded with people going abroad.

The inhabitants of St. Petersburg awake to find the streets resembling a beleaguered city. The shops in the Vasilievsky district and in all the suburbs are closed.

The prices of food have gone up, and the supply of beef is extremely limited. The emperor and the court at Petersburg are supplied by a warship from the Baltic.

LONDON, Oct. 26.—A special despatch from Odessa says the Russian battleship Catherine II, at Sebastopol, and that four hundred of her crew have been arrested.

WARSAW, Russia, Oct. 25.—Agitation is holding revolutionary meetings in the factory districts, and a general strike is anticipated Oct. 28.

The general strike on the railroads is complete except in a few border provinces, and St. Petersburg, Moscow and other large cities are almost as closely beleaguered as if they were invested by besieging armies.

The strike is complete in the great factory region on both banks of the Neva above the city, and in several other industrial quarters. Forty thousand men are out, but they are conducting themselves in a most orderly manner.

LOYALIST CITY'S WELCOME TO PRINCE.

PRINCE LOUIS OF BATTENBERG.

It was exactly 10 o'clock when the huge anchor of the flagship of Rear-Admiral Prince Louis of Battenberg disturbed the mud at the bottom of St. John harbor this morning.

The warships arrived off the harbor at about seven o'clock and were met by the harbor master and Captain Farris in his official rig in tow of a tug.

Many of the principal business houses and private residences are decorated with flags and bunting, but no big display was attempted.

Prince Louis of Battenberg, Lieut. General Sowerby and two servants arrived in the city this morning from Halifax on No. 9. Quite a number were down at the depot to see the arrival of royalty notwithstanding the early hour but they were disappointed.

At eleven o'clock this morning Lt. Gov. Snowball and staff called upon the Prince at the Royal hotel. The visit was a formal one and was returned fifteen minutes later by the Prince.

Your Serene Highness—The mayor and aldermen of the City of Saint John, on behalf of the citizens, take great pleasure in extending to you a very hearty welcome to our city.

At one o'clock the mayor entertained the Prince and his suite at luncheon at the Union Club. The large dining hall was a great credit to the steward Edward Wilson.

Louis of Battenburg and His Warships Arrived Today.

Lieutenant Governor and Mayor Receive Him--Civic Address Presented--Luncheon Tonight's Reception.

The floral decorations were magnificent, the work of Frederick Enos. On the middle round table the decoration consisted of a great star with red, white and blue points and with a mirror trimmed with green in its centre and at the very centre a large flower vase.

The menu was as follows: Oysters on shell, consommé and French turtle soup, boiled roach and egg sauce; fillet of partridge, larded with bacon, port wine and sauce; mushrooms on toast; roast turkey, cranberry sauce and sausages; tomato and lettuce salad, French dressing; peas and potatoes, cauliflower with white sauce; Roman punch; English snipe on toast; wine jellies and Charlotte Russe; celery, cheese and coffee; fruits—orange, pear, grapes and peaches; confectionery.

On the right of the mayor sat His Serene Highness Prince Louis and to his right Chief Justice Tuck. To the left of the mayor was Lieut. Governor Snowball and to his left Judge McLeod.

Across the table from the mayor sat Dr. Daniel and on his right, Capt. Robertson and Col. White, D. O. C., and to his left, Capt. Dave and Premier Tweedie. The guests numbered fifty-two.

The guests at the luncheon were the following: Prince's Flag Lieut. and Secretary, Captain of H. M. S. Cornwall, Commander of H. M. S. Cornwall, Captain of H. M. S. Berwick, Commander of H. M. S. Berwick, Lt. Gov. Snowball, Col. H. H. McLean, aide de camp to Lieut.-Gov. R. S. Barker, private secretary, Mr. Justice Barker, Mr. Justice McLeod, His Lordship Bishop Casey and Chaplain.

At the conclusion of the luncheon Mayor White drove his serene highness about the city, pointing out the chief points of interest.

From 4:30 to 6:30 o'clock Lady Tilley will hold a private reception at her residence, Carleton House, Germain street, to which a number of her friends have been invited and probably at the conclusion of his drive around town His Serene Highness will drop in there for a few minutes.

The public reception in St. Andrew's (Continued on Page 5.)

SUN SHRINKING 16 INCHES EVERY 24 HOURS.

Startling Statement by Sir Robert Ball—The Orb Will Not Get Cold for Awhile, However.

LONDON, Oct. 24.—"The sun grows smaller by 16 inches every 24 hours." Such was the startling statement by Sir Robert Ball, the Irish astronomer, to an audience at the Atholgate Institute.

"Ten million years ago," said Sir Robert, dealing with the period as though it were of an ordinary length, "the sun was nearly a million times wider than it is at present, because of the fact that it is getting colder and because of the principle that a red hot poker is wider than a cold one."

As showing the tremendous combustion that is going on in the sun to keep up its heat, Sir Robert declared that if all the coal in the earth were poured into the sun it would last less than ten thousandth part of a second in that tremendous conflagration.

"Fortunately," said the astronomer, "it is not to combustion alone that the sun's heat is due. In its process of contraction the particles of the gigantic orb produce such a tremendous friction that the heat from this friction is equal to the burning of 800,000 tons of coal."

"Of late," proceeded Sir Robert, "the idea has prevailed that the sun's energy is due to the presence of that mysterious agent—radium. If that is so, and if radium exists in the sun in the same proportion that it exists in the earth, then instead of the paltry 24,000,000 tons allowed to the sun because of combustion, the sun would be able to furnish heat for a period of a billion years. By which time," added Sir Robert, "most of us will be beyond the reach of solar energy."

FOOTBALL MAY BE ABOLISHED AT HARVARD.

It There is any Brutality in the Harvard-Yale Game—The Corporation May End the Sport.

BOSTON, Oct. 25.—The Advertiser today says: "If any exhibition of brutality or any disposition to 'knock out' players is seen at the Harvard-Yale game next month a proposition will be made in the Harvard corporation to abolish the present inter-collegiate football as a sport at Harvard."

This proposition will probably have the support of President Eliot and three other members of the corporation. That makes a majority of that body which has the right to prohibit any sport which is detrimental to the good name of the University.
