

AUTHOR.

vantage of injecting a gallon of water into the colon was first brought to his notice.

And no wonder that upon the first announcement in a foregoing authoritative lecture by Richard F. Stevens, M.D., before a medical society in Syracuse, N.Y., some twenty-two years ago, it The document should immediately began to spread among thoughtful and broad-illustration of the need-minded medical practitioners, and to such extent, that deleterious substance upon issuing this pamphlet, giving the details of the al, but also the elimi-treatment, many of the learned profession throughout es from the vital cir-the country were found to have already learned of the herein by absorp-tion heroic process and to have adopted it in their practice.

Having had the longest continuous experience under health be permitted to this heroic flushing process of any man living, and having ous quantity of fetidemonstrated its value in the cure of disease and the pre-about by him withinservation of health, and to a degree unparalleled by any al canal, all of which later experience, it is quite natural that we should be and none of which looked to for information as to the practical working and useful substance; he effects of the constant use of this treatment.

myself and to marvel. To all inquirers upon this subject we say solemnly, ay surcharged with and upon every principle of honor that should entitle one to the respect of his fellow men, that our present ns, familiar as they existence in robust health is now wholly due and has y with the dissectingeen for more than forty years entirely to this heroic itals, and witnessing treatment of flushing the colon.

abdominal contents. If it be asked, as it frequently is, if this process does absolute importance not necessitate its continuous use after it is once begun, colon, when its prac-we answer that we have never tried to find out, because their attention.

after its first adoption we have never once, for more than now forty-one years our days, in all that period of time, been without just en possible to inject such a flushing operation with from three to four quarts rectum, and such and water, as described in the first edition of our pamphlet sigmoid flexure had to which this is a supplement.

most daring medical. Moreover, we now aver that we would not if we could at exhibited by such—not for any amount of money that could be paid to us,—ew York, the most come back to the old natural, involuntary, dribbling, n the United States, nap-judgment process of evacuations in lieu of our stated y and even the ad-flushings and general cleansings of the colon.
