

It is Worth While

investigating the advantages offered to settlers on the **CROWN LANDS IN NEW ONTARIO**. The climate is all right; the land is rich and well watered; railways serve each district opened for settlement, and the local market for timber, in most cases, enables the cost of clearing to be more than met by the crop of trees now on the land.

If You have any Curiosity

as to Ontario's advantages in this regard, and desire to better your position, write for information to

HON. E. J. DAVIS

Commissioner of Crown Lands, TORONTO, ONT.

It isn't often...

that any machine receives the success and endorsement that "**MAGNET**" SEPARATORS have, as being the **Hand Cream Separator for the farmer**.

THE PATHE MFG. CO., LTD.,
Guelph, Ont.

Ottawa, April 9th, 1903.

Gentlemen—I am pleased to inform you that the Magnet Cream Separator which I bought from you several months ago, has been in continuous use in my dairy of forty cows. It has been very carefully and severely tested, and I am glad to inform you that it has given perfect satisfaction.

It runs very lightly, skims well, and separates beyond the capacity guaranteed by you. I have no hesitation in saying that Canadian farmers would find it to their interests to buy machines made in Canada, rather than those imported from foreign countries and assembled in Canada. The reasons are obvious and need no explanation.

Yours very truly,
F. W. HODSON (Live Stock Commissioner).

Don't do yourself the injustice of ordering a Cream Separator without first having thoroughly investigated how strong and well made Magnet Separators are. No worm gearing, but all cut gears. They turn easy, skim clean, and are easily cleaned.

A Catalogue for the asking

PETRIE MFG. CO. GUELPH, ONT.

THE WONDER OF THE AGE

ALL EYES ARE ON THIS INVENTION

Patented 1885-6 and 1901.

The Genuine Telson Pea Harvester With New Patent Suncher at Work

1. Harvesting in the most complete manner from eight to ten acres per day.
 2. Harvesters to suit all kinds of sowers.
- Every Machine Warranted. Our Motto: "Not how Cheap, but how Good."
No drilling holes in Mower Bars or Inside Shoes. A wrench is all that is required to attach it to any mower. Give your orders to any of our local agents, or send direct to

TOLTON BROS., Guelph, Ont.

WHEN WRITING ADVERTISERS, PLEASE MENTION

response to their ads. in our columns. We have just seen a home painted throughout with Alabastine. The effect was clearly highly artistic, and eminently cheerful.

The attention of our readers is specially directed to "The Home World" in this issue. It will be noticed that the new departments, recently added, are well presented. No effort will be spared to make these features of The Farming World of interest to every member of the Farm Home.

The appreciation of the windmills manufactured by the Ontario Wind Engine Co. is not merely confined to Canada, although a home demand is evident. The firm in point is at present shipping regularly both to South Africa and South America, and the demand from these places increases with a rapidly altogether encouraging. With the former country, there can be little doubt that its agricultural expansion and future importance is very largely a question solvable by the introduction of an immense number of wind motors. By and by we shall have Canadian windmill watering the country in which Canadian soldiers suffered the horrors of thirst.

The Nordheimer Piano and Music Co. is advertising the Chase & Baker Piano Player in the present issue. This is a most extraordinary contrivance. By means of it any one can play on his or her own piano any class of music, and play it with the finished technique of an accomplished performer. There is no shade of expression, he it ever so delicate, nor is there any intricacy of composition beyond the scope of Chase & Baker's Piano Player. Through it, the best music may be introduced into any home, and played by any one who very few could hope to play even after many years of strenuous study. Recently we listened with the greatest pleasure to the performance of one of Chopin's most exquisite nocturnes through the medium of the piano player. No wonder Messrs. Nordheimer are doing so large a business in these!

Special attention is directed to the two advertisements of Messrs. Southcombe, Viel & Ramsden, in this issue. The lack of a good fire extinguisher, when a man's house is ablaze, means an ever present regret for the man throughout the remainder of his days. And when one weighs the cost of an efficient extinguisher with the probable cost of a domestic conflagration, no careful person will be found wanting one. With each extinguisher, the makers furnish receipts for extinguishing solvents, the ingredients of which can be procured at any drug store. Their preparation is simplicity itself.

The Uncle Sam Sprayer is a thoroughly good little machine, and is protected by thirteen patents. The demand for these is very considerable. For spraying cattle there is nothing better in the market. Of course, it can be employed with equal satisfaction in all other kinds of spraying. The Weather Forecasts Prepared by Sillington, the one pupil of the late Prof. Rice, have achieved great popularity among farmers all over Ontario. These forecasts are based on the electro-planetary theory. They tell what the weather is going to be for each day in the year, subject to slight variations for any given locality. These forecasts are an invaluable feature of our calendar for 1903.

We have still a few of these calendars on hand, which can be secured for 25 cents each, or free with one subscription to The Farming World at \$1.00. Address Farming World, Toronto, Ont.
