"Just Thirty Minutes Ahead of the Whole Bunch"

THERE were seven different tractors matched in a real test in the field, the seven best known tractors in America; each had 3 1-7 acres to plow; some pulled three 14-inch plows, others two.

Happy Farmer, with three plows, finished half an hour before the other six, with a cool motor at all times. It was so convincing that the Happy Farmer machine was bought up on the spot and five more were ordered! Good enough for the eye witnesses, good enough for you! Get a

Happy Farmer

Model F

TRACTOR

24 h.p. at
Belt

Ask us for the most exacting demonstration you can think of within 12-24 horse power. Happy Farmer meets it, and "then some." That is the experience of our users.

Records are not made by luck. Happy Farmer has its own reasons for leaving competition behind; one is its remarkable power compared with its light weight (only 3,700 lbs.). It gets no less than 2,000 lbs. draw bar pull, because it hasn't much initial weight of its own to propel along, and 88% of that is on the big tractor wheels. You see, precious little power is not utilized for work; it performs most work at the draw bar or belt pulley.

Besides, the Happy Farmer has a real kerosene

engine, with a special intake (patented) that gets every whit of power out of the fuel, by delivering perfectly vaporized fuel hot to the combustion chambers. There is no carbon trouble, no smoke nuisance—just good, useful work.

Happy Farmer gets its records economically; it changes quickly from expensive gasoline to cheap coal-oil, and gets more power per gallon than other tractors.

You certainly owe it to yourself to investigate Happy Farmer. Nothing pleases us better than to actually demonstrate its superiority on the field; be sure to get our free illustrated literature. Write for it to-day.

"Tractor Demonstration: The Happy Farmer Tractor will be shown in actual use at the Cobourg, Ont. Demonstration Sept. 18th, 19th and 20th and at the Provincial Plowing Match, Ottawa, Oct. 16th, 17th, and 18th."

Hens Moults and Lay When Fed Our Way

Feed your hens Royal Purple Poultry Specific and it will shorten the moulting period. It will keep your hens in the "pink" of condition, and supply the nourishment for forming new feathers. This is very important if you want eggs during the winter months:

Royal Purple Poultry Specific

Our specific contains all the necessary food elements to keep poultry healthy and greatly assists them in digesting the other foods they eat.

Hens generally start laying in about one week after you start feeding Royal Purple Poultry Specific. Hundreds of our customers have written us to this effect.

If your hens are in poor condition, moulting or not laying as you think they should, start feeding our Poultry Specific.

Royal Purple Poultry Specific will enable you to fatten your cockerels and old hens in two-thirds the time it would ordinarily take. Order a supply at once from our dealer in your town or direct from us.

Sold in large and small packages.

A Real Oil Engine Not an Experiment

Uses no Gasoline. Not even to start with. Starts easily in the coldest weather on the fuel it runs on, Coal Oil or Fuel Oil, and only uses half the amount required by other so-called Oil Engines. The saving in fuel alone will pay for this engine in a few months. The

Hoag Oil Engine

has no electric devices whatever, the burning of the oil is obtained by mechanical means alone, and the usual time and trouble, forever fixing electrical ignition, is entirely done away with, making this engine the Farmers' Friend. Get circulars and price of size you are interested in.

What He Suspected.

Jones.—"What is Newlywed Bigghedd looking so glum about?"

Smith.—"Why, the gipsy fortune-teller just told his wife that she would have two husbands, and that the second one

would be a very fine sort of a man."

Jones.—"Ha, ha! And Bigghedd thinks that is a reflection on him, I suppose?"

Smith.—"Oh, no! He thinks his wife must have been married before, and never told him."
