The clamp before being used.  
 It is made throughout of No. 9 Plain Galvanized Wire, both horizontal wires and cross wires or uprights. The steel clamp securely fastens the horizontal and cross wire, thus consolidating the strength so that the whole fence resists an attack on any part of it. As the strength of a chain is gauged by the strength of its weakest link, so a fence is only as strong as its weakest part. The Anchor Fence is equally strong throughout, and being constructed wholly of large wires, is much stronger than a fence in which small wires are used.

**MISTAKES**

IN milk testing are often made through carelessness; sometimes through ignorance; sometimes through defective testing machinery. The first two difficulties are entirely dependent upon the operator. We do not attempt to manufacture experts in this line. We have, however, a list of good buttermakers, and are always glad to assist in getting creameries wanting competent help into correspondence with these men. But when it comes to the testing machine our

**Improved Ideal Turbine Tester**

stands for convenience, durability, and accuracy. No other machine on the market for this purpose combines so many excellent features and assures so uniformly accurate results. Do not place your order for a new tester to replace your old worn-out machine until you have inspected the IDEAL. We are still willing to allow trial to anyone who questions the merits of this machine.
