

# DELCO-LIGHT

## Increases Farm Efficiency

- Saves time and labor**—Work formerly done under poor light and by hand can be done better and in less time with the aid of electric light and power.
- Labor is attracted to the farm**—The "back to the farm" movement is made practical when the conveniences afforded by electric light and power can be had in the country.
- Keeps the boys and girls on the farm**—Electric service on the farm offsets city attractions. Valuable labor and valuable young manhood and womanhood are saved to the country community.
- Solves the retired farmer problem**—Electric light and power make the farm home so attractive and comfortable that the farmer and his wife remain on the farm where their advice, experience and immediate interests are of great practical value.
- Lightens burden of the housewife**—Increased farm work in war times means increased labor for the housewife. Electricity offers the only practical means of taking the drudgery of household tasks from her shoulders.

Over 50,000 Satisfied Users Throughout the World

Delco-Light Engine and Generator  
Self-Cranking—Air-Cooled—Ball Bearings—No Belts  
30 inches high—Runs on Kerosene or Gas
