

## A BUILT-TO-MEASURE TRACTOR FOR YOU

**W**HEN buying a tractor there are three important points to consider: Will it do your work? For how long a time will it give good service? How much will it cost for operation and up-keep?

The tractor that is best suited to your work, that gives you the longest good service, and that costs the least for operation and up-keep, is the one *you* want.

Your tractor needs have been measured by us. Our 82 years contact with the development of Canadian agriculture have enabled us to do this well. But what is more important, our experience, ability and equipment enabled us to *build* the tractors best suited to the needs of Canadian farmers.

We found one tractor was insufficient to meet the needs of all. So we built four sizes: 11-22, 17-34, 20-40 and 27-50. But the principles behind each of these sizes are the same. Back of each tractor is the Sawyer-Massey reputation, guarantee, and a service that really serves.

All Sawyer-Massey Gas-Oil Tractors have 4-cylinder motors; 4 wheels; air cleaning equipment; power transmission direct to *both* rear wheels, on which 75% of the tractor weight rests, assuring maximum power at the draw-bar and complete traction in all soils. Big radiator capacity and perfected mechanical cooling prevent overheating.

*Bulletins describing Sawyer-Massey Tractors  
forwarded on request. In writing, specify  
the size in which you are interested.*

### SAWYER - MASSEY COMPANY LIMITED

Head Office and Factory: HAMILTON, ONTARIO
