BARONESS VON RAHDEN.

The Famous Circus Rider Coming to America. America.

A Berlin correspondent writes: Sensation-loving people in America will hail with delight the news that the dashing, handsome Baroness von Rahden is going to America. An enterprising yankee manager has made her a flattering offer, and she will soon appear in the land of dollars to exhibit her marvelous skill as a "high

school" circus rider, and also, no doubt, to captivate the hearts and pockets of gilded youths of fashion, who like their European brothers, will not be able to withstand her seducive charms. This young baroness has created a tremendous stir in the various capitals of Europe, especially since her last love episode, which culminated in her husband's shooting and killing one of her ardent admirers, a Count Castenkiold, an officer in the Danish army. This shooting affray aroused the deepest indignation against her husband, Baron von Rahden, whom the general opinion holds to be a brute. As he will accompany the fair rider to America a few lines about him are not amiss. The baron is about 30 years of age and of illustrious family, his father being governor of the Russian province of Courland. He carries himself well and has pleasing manners at rare intervals. As a rule he lords it over everybody ne meets because he is a very thorough devotee to Bacchus. He has been an officer in the Russian army, but had to leave that country in 1890 on account of a duel in which he killed his adversary.

His wife, Eugenie Weiss, was a circus rider when he met her at Copenhagen, and alter marriage he compelled her to keep on with her exhibitions, as her salary was their only means of support. During his trial for the murder of his wife's lover he asknowledged with the greatest indifference that once in a while he had been in the babit of beating his wife upon her re-BARON DE RAHDEN.

sheir only means of support. During his irgis for the murder of his wife's lover has through the murder of his wife's lover has the more of the murder of his wife's lover has the more of the murder of his wife's lover has the more of the murder of his wife's lover has the more of the murder of his wife's lover has the more of the murder of his wife's lover has habit of beating his wife upon her refusal to work. The Baroness von Rahder turned from this creature to the Danish Lieutenant Castenkiold, who was so infatuated with the lovely circus rider that befollowed her from place to place. Castenkiold was handsome, affectionate and demonstrative, too demonstrative to suit the baron, such lavish tokens of love being beyond his comprehension. So in a moment of drunken frenzy, when the party were at Clermont, in France, the baron deliberately and cruelly shot Castenkiold under circumstances showing extreme malevolence—not toward his wife's paramour, but toward the man as being his superior in every respect.

During the trial the prosecuting attorney and the words of praise with the loss of three officers and ten men killed arms were comparatively few and the British sallors is the fact that Fodisha's men were comparatively few and the British sallors is a fact that Fodisha's men were comparatively few and arms were extremed as light as possible. The question of nationality played a prominent granty in the pleadings for the defense. The summer of the march disclosed no signs of arms of the whole were with provisions for four days and an ample supply of ammunition. As the reputation of being a fearless and destread in the pleadings for the defense which her remaining ashore for some time. Several machine gans were staken ashore with provisions for four days and an ample supply of ammunition. As the barron was a hard drinker, in fact drank to barron was a hard drinker, in fact drank to barron was a hard drinker, in fact dran

DE RAHDEN, THE ROYAL CIRCUM

ERASTUS WIMAN IN TROUBLE.

New York. Feb. 22.—Eras-tus Wiman, formerly manager for R. G. Dun & Co.'s mercantille seency, builder of the Staten Island Rapid Transit railroad and a promunent advocate of amexation of Canada to the United States, was arrested yesterday charged with forceries and smobezzlements amounting to \$229.000. He was arraigned before Judge Martins and committed to the Tombs in default of \$25,000 bail.

The arrest was made yesterday afternoon at the office of Mr. Wiman's son in-law, Noman S. Willer, in the Washington building, on a bench warrant, issued by Judge Martins soon after the grand jury had handed down the indictments charging Wiman with forgery in the second

tectives.

On being arraigned before Judge Martins last night Mr. Wiman was asked whether he would furnish bail. "No, sir," said Mr? Wiman, "I do not intend to." Judge Martins then held him in \$25,000 bail and he was committed to the Tombs prison. Before going to jail Wiman sent a despatch to his counsel. Benjamin F. Tracey.

prison. Before going to jail Wiman sent a despatch to his counsel. Benjamin F. Tracey.

NEW YORK, Feb. 26.—Erastus Wiman, who was arrested Wednesday charged with forgery in the second degree, and who has been confined in the Tombs prison, found a bondsman yesterday in the person of Charles H. Deere, of Moline, Ill., who de posited \$25,000 in cash with the City Chamberlain a few minutes before noon. Charles H. Deere, who furnished bail for Mr. Wiman, is a weaithy manufacturer of Moline, Ill., and an old friend of Mr. Wiman. Wiman's son William, who is dangerously ill, married a danghter of Mr. Deere. Mr. Wiman will be called up roday to plead to an indictment for forgery in the second degree. He has not permit ted anyone to ask whether he will plead guilty or not, but his friends assert that it has been settled since his release that he will plead not guilty.

After Mr. Wiman's release he was closeted with his solicitor, Gen. B. Tracey, who subsequently gave out this st. tenent: "I have seen for the first time to-day the in dictments against Mr. Wiman and have learned the history of the case and the tacts upon which the indictments are found. I am entirely satisfie I after such examination that Mr. Wiman has committed no crime, and unless I am greatly misinform ed the trial will develop a state of facts which will show that Mr. Wiman is not only not a criminal but has done nothing that can seriously refl et upon his honor or integrity as a man. I am not in the habit of trying my cases in the newspapers, but in view of the extent to which this course has been taken by Mr. Wiman's enemies and certain of his supposed friends I think it only just to him that I should make this statement publicly."

A FIGHT WIT - SLAVERS

British Sailors, Sent against a Slaver Chief, Defeated by the Natives. Chief, Defeated by the Natives.

LONDON, Feb. 26.—The rumors in circulation on Saturday base! on despatches from Bathurst, West Africa, that a number of British officers and sailors had been killed in battle with slave dealers on the west coast are confirmed by official despatches.

The despatches state that the cruise. The despatches the Revision of the Revision

despatches.

The despatches state that the cruise. Raleigh, the flagship of the British squadron on the West African coast, commanded by Rear Admiral Frederick C. D. Bedford, and the screw gun boat Widgeon. Bedford, and the screw gun boat wingeon, commanded by Lieutenaut Commander William J. Scullard, arrived on Friday at Bathurst, capital of the British West African colony of Gambia. Though the admiralty officials refused to make public their despatches it was learned that the sailors of these two vessels had been de-feated on shore.

sailors of these two vesse is had been defeated on shore.
Further details leaked out which show that landing parties from the Widgeon and Raleigh had ben sent ashore to punish Chief Fodisilan, a notorious slave-trader who had been carrying as a way and seiling into slavery numbers of natives of the villages in that section of the coast over which he rules.

The sailors landed in force, marched some distance inland and in a fight with Fodisilah's followers were repulsed with the loss of three officers and ten men killed and forty-seven wounded.

The Wag Again. In the garden of a certain nobleman's country house there happened to be fixed up at different spots Fainted boards with this request: Please do not pick the up at different spots painted boards with this request: "Please do not pick the flowers without leave." Some wag got a paint brush and added an s to the last word.

Oiling the Voice. Oiling the Voice.

The voices of singers need an occasional "oiling," and some peculiar remedies have been in vogue among the singers which it is interesting to know. When Gallmeyer, the famous soubrette, visited England she confessed that she treated her throat before each performance to a good rubbing with rum and glycerine. This statement led to further investigations in this line with the following results: Labatt, the great

sideration for her than to live upon her earnings, his gratitude being exhibited in a good beating now and then when she did not feel equal or inclined to work.

This strange couple is coming to America. The baroness is not so remarkably handsome as she is fascinating, possessing in a large measure that quality of chic which to most men is irresistible. She has splendid eyes and an exceedingly graceful figure, and her riding is simply superb.

She Lashed the Lawyer.

MR. AND MRS. BOWSER.

THEY EXCHANGE COMPLIMENTS IN

A HIGHLY AMUSING MANNER-

indigiting about for two or three minutes, "suppose a lady should lose her purse on the street."

"Millions of 'em do!" he replied as he looked at her over the top of his glasses.

"Do you think it would do any good to advertise for it?"

"Not the alightest good. A woman who hasn't sense chough to get down town and back with a dollar or so shouldn't make things worse by advertising the fact to the world at large. So you lost your purse today, eh?"

"I—I think I left it in the street car. I know I had it—"

"That's a smart piece of business, isn't it?" he interrupted. "You think you left it in a street car, but the fact is you may have left it in forty other places. How much money did you have?"

"Not much—not over \$7."

"Seven dollars! You ought to be sent to an idiot asylum for the rest of your life! That makes over \$1,000 you've lost in the last year!"

"It's the only money I ever lost, Mr. Bowser, and that may have been picked out of my pooket."

"Worse and worse! A woman who will sitdown in a street car and go to sleep deserves to have the bonnet stolen off her head! Seven dollars! Seven big dollars! It's bad enough to lose the money, but the idea that my wife hasn't got more sense than that outs me to the soul."

"And you wouldn't advertise?"

"I positively forbid it! Do you suppose I want to be pointed out on the

men.

The Blaschkas live near Dresden. They have there a fine collection of tropical plants—orchids being a specialty. Rudolph Blaschka, the son, has made several journeys to South America to obtain rare specimens of these queer plants of vivid colors, spotted and streaked with scarlet and gold and streaked with scarlet and gold and green, or marked with silver and gold traceries and powdered with copper dust. Besides the tropical collection there is a large "garden" of what we call weeds and wild flowers, for the Blaschkas handicraft shows us some exquisite arrangements in our common roadside flowers.

The Blaschka work is especially in the series and powdered with copper dust. Besides the tropical collection there is a large "garden" of what we call weeds and wild flowers, for the Blaschkas handicraft shows us some exquisite arrangements in our common roadside flowers.

The Blaschka handicraft and gold and streaked with scarlet and gold and stre Next day Mrs. Bowser called at the street car office and found her purse. She had laid it on the seat beside her while arranging her wraps, and the conductor had found it and turned it in. She decided found it and turned it in. She motive it in the same home to dinner. She noticed that he carried his hand to his breast pocket every two or three minutes, as if feeling to see if his wallet was safe, but she waited until she caught him looking over the "Found" advertisements in the evening paper and then quietly asked:

"Did you have much money in it, Mr. Bowser!"

"Are you addressing me?" he sharply replied, as he glared at her with flushed face.

"Certainly. I hope you didn't have much money with you. Was it done in crowd?"

"If you are talking to me instead of the "If you are talking to me instead of the second of the s

THOMAS A. EDISON, THE GREAT IN VENTOR, SPEAKS.

and Silver Largely Due to Tradition and Custom-The Best Dollar Could Be

Made of Compressed Wheat.

Thomas A. Edison, the great inventor, has apparently turned a portion of his attention to the financial problem. In a recent interview he said:

"The hankering after gold and silver is largely traditional. People allow themselves to be governed by the old ideas on the subject of coinage formulated at a time when national credits did not exist and currency would only be taken at an intrinsic value. What we need is a new standard of value. I think that the best dollar could be made out of compressed wheat. You take a bankel of wheat and squeeze the water out of it and then compress it into a hard cake the size of a silver dollar and stamp the government mark upon it. That would represent actual value and labor performed and then you wanted to use the wheat all that would be necessary would be to put your money to soak. We should then have the bushel of wheat as a permanent unit of value which all farmers would appreciate, and the currency of the country would represent actual worth and labor performed. Both gold and silver could then be dispensed with and the present bimetallic problem solved.

Aluminium. In the time of the middle ages almost all trades or handicrafts had their mysteries, and a workman who was taught all the processes of the work had to take a solemn oath not to betray the secret. It is very different now. If you visit the great factories the proprietor or forestan will show you how the complicated machinery works; papers and books are crowded with articles explaining various processes. plicated machinery works; papers and books are crowded with articles explaining various processes.

Still, some of the secrets of handicraft remain. One of the most interesting of these is the wonderful art of the Blaschkas, which no other worker in glass has been able to learn or in any way to imitate. The work is so unique and beautiful that you will be interested in hearing of the exquisite and marvelous results, even if all the processes of manipulation must remain a mystery. Leopold and Rudolph Blaschka—father and son—are from Bohemia, a country famous for its work in glass. The father is upward of 70 years old, but both he and his son are active and skilled workers. For a long time they worked in glass, making models of sea creatures for museums and colleges. About seven years ago they began making the works for which they are now so famous, not only the most exact reproductions in glass of flowers in their natural size, so perfect that the rich red cactus blossoms look soft and velvety, and our yellow cowslip shows its satiny sheen, and the little white anemone trembles and bends on its slender stalk, but also all the microscopic parts of the flower—almost invisible to the naked eye—on such a magnined scale that a student may at any time study these hidden things of the plant world without a lens or a specimen.

The Blaschkas live near Dresden.

Haven't I got the bottle under me arm.
kapin' warm and lively wid me heart's throbbin's Rheumatism and Neuralgia radically throbbin'?"

"Tim Ryly, shure it's a fool ye are! Why didn't ye tell me an hour ago? Come in an' see Biddy; shure she's wearyin' for a sight of yez. Biddy, me dear, here's Mr. Ryly and the rest come for a bit of supper they've brought along wid 'em. Shure here they've been standin' widout, and we waitin' widin, hours."

Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. It removes at once the cause and the disease immediately disappears. The first dose greatly benefits. 75 cents. Warranted by J. P. Lamb.

Rebecca Wilkinson, of Brownsvalley,

A thrifty Frenchwoman.

A lady and gentleman were dining to gether in a little French restaurant not long since, when the attention of the former was attracted to the figures woren in the tablecloth, which was of a fair quality of linen.

"Look at these figures," said she, calling the escort's attention to the cloth. "They seem to be a company of men dining. The pattern is repeated on your side. It seems yery odd. Can you make it out?"

The company of the company of

ples, and what will you have?" "Colic, sir."—Harper's Bazar.

Properly Answered.

Just as the door of the city clerk's office was due to be closed the other night two young ladies called and stated that they were looking for a marriage license.

"This is not the place." explained the sober faced clerk. "The clerk of the court issues them at the court house, but you are too late to get down there before he goes home."

"Isn't that provoking?" remarked one of the maidens, with a pout equally provoking. "They told us that this was the place to get lincenses."

"It is. Dog theenses."

"It is. Dog theenses." the facetious clerk answered.

"The license is for her, not for you, sir," answered the girl, and a deep hush fell ver the city seal.—If meaning has them, and my customers and representations are the fear to the court insue. The place to get lincenses is for her, not for you, sir," answered the girl, and a deep hush fell ver the city seal.—If meaning hush in girls place they were offered to me theap. I bought them, and my customers at the market and it will only cost it, seal the worth framing. This is an easy way to decorate your home. The soap is the best in the market and it will only cost it, postago to send in the wrappers, if you leave the ends open write your address carefully.

THE TERRIBLE EXPERIENCE OF WELL KNOWN GENTLEMAN.

Badly Orippied With Eheumatism that he was Helpless as an Infant-lew he was Cured—A Lady Relative also Restored to Health. rom the Richibucto, N. B., Review.

The attention of The Review having been called to two cases in Kingston in which it was alleged remarkable cures had been effected by the use of Dr. Williams Pnk Pills, a reporter was ent to interview the parties named and find out whether the cures wer really the result of the use of Pink Pills. Mr. Samuel Barnes, who formerly resided in Dorchester, N. B., and who removed to Kingsten, Kent Co. some time ago, was first interviewed, and asked whether the reports concerning his illness and recovery from the use of these Pills were true. He ex-pressed himself willing to add his testimony to the many he saw in the paper mony to the many he saw in the papers concerning the wonderful cures effected by Pink Pills, and hoped his story might be the means of bringing relief to others. We give his story as nearly as possible in his own words:—"I was first attacked with acute muscular rheumatism in March, 1891. I was then living in Dorchester. For three months I lay in bed unable to move

Aluminium.

Aluminium is silvery white, two and a half times heavier than water, and only one third as heavy as steel. It does not tarnish like silver when exposed to the air, and although it is not so hard as iron some of its alloys with copper and other metals are intensely hard and strong. It can be spun around wire so fine that weavers turn it into cloth, and it can be hammered so thin that abreath will blow it away. It is already being used for kitchen pots and pans, because it is so light and strong, and in Germany it is made into equipments for soldiers for the same reason. It is expected some day to replace iron wares for carrying electric currents, since it is much lighter than iron and will not rust. Boats are being made of it, though salt water corrodes it, and the first practical flying-machine is likely to be built in large part of aluminium.

By the aid of electricity it is now possible to extract aluminium from clay cheaply, and the uses of the metal are being increased every year. Up to the present there has been one strong drawback to its use. Mechanics have been unable to make a solder that would unite two pieces of it firmly. If such a solder has been increased a hundred then the uses of this most abundant metal have been increased a hundred fold.—Harper's Young People. hand or foot, more helpless than an in-fant. The joints of my arms and legs were much swollen, and my hands and fingers twisted almost out of shape The physician who attended me ban daged my limbs and in every way at-tempted to give me relief, but without effect. Two other doctors were called in consultation, but could do nothing for me. I was told by a friend who called to see me of the wonderful cures reported to have been, effected by the use of Pink Pills, and I resolved to east aside doctors' medicine, and give finished the second box I began to feel slightly better. After taking four or five boxes I was able to get out of bed and walk around the house on crutches. I continued taking the pills until I had taken a dozen boxes, wh n stopped for a time. I was then able with the help of crutches to get out of doors and around. I have since re-moved to Kingston, and continued taking the pills, and have continued to improve and hope soon so be entirely cured. Mr. Barnes is a gentleman of education, whose statements will carry weight. The writer remembers when

Mr. Barnes first came to Kingston he was forced to use crutches, and was able to get around only with great diffi

out difficulty. His hands and fingers, however, still bear traces of the severe suffering he has undergone.

also a sufferer from muscular rheuma-tism. She was first attacked by the disease eight years ago, and at that time it was only with great difficulty she was able to move around. Doctor's medicine did not help her, and she tried all kinds of so-called cures for rheumatism, but they appeared to do her no good whatever. Through the advice of Mr. Barnes and with the con-

sent of her physician, she began taking Pink Pills last fall. By the time she

wonderful curative powers.

Dr. Williams' Pink Pills are a specific for all diseases arising from an impoverished condition of the blood or a shattered condition of the nervous forces, such as St. Vitus dance, locomotor ataxia, rheumatism, paralysis, sciatica, the after effects of la grippe, loss of appetite, headache, dizziness, chronic ery-sipelas, scrofula, etc. They are also a specific for the troubles peculiar to the suppressions and all forms of f male weakness, building anew the blood and restoring the glow of health to pale and sallow cheeks. In the case of men they

effect a radical cure in all cases arising from mental worry, overwork or excesses of any nature of all druggists or direct by mail from Dr. Williams' Medicine Company,
