SAVE FOOD

In a time needing food economy many people are not getting all the nourishment they might from their food. It is not how much you eat, but much you assimilate, that does you good.

The addition of a small teaspoonful of Bovril to the diet as a pepsogen before meals leads to more thorough digestion and assimilation and thus saves food, for you need less.

It has been wiped clean of the map, there are roses blooming where once were cottage gardens, and it is only the new shell holes made by German gunners searching for batteries or parties of men going up 'he line, which clear away the tangled growth and cut down the plants now blooming over all our battlefields.

It is worth writing this perhaps, not because a bouquet of flowers makes shell-fire pleasant, but because it gives a picture to the people at home of the look of the country in which their men are living while they wait for the battles which must come before these blossoms have withered away.

The daffodils and the jonquills all belong to the narcissus family and are among the first flowers to bloom in our gardens in the springtime. Daffodils do not grow wild in this country, though in some parts of southern Europe they do. The name narcissus was given to the flowers by the Greeks. They had a story about them which you may like to hear.

Long ago, the Greeks' story ran there was a handsome lad named Narcissus. So beautiful was he that everyone who saw admired him. Most of his time was spent in wandering about the woods and fields alone. One day he went to the woods to hunt. Tired and thirsty near the middle of the day, he looked about for a place to get a drink.

As he looked about he found a beautiful clear, deep pool. It was shaded by tall green trees, and the violet that grew by the water were the most lovely and fragrant of their kind. Narcissus knelt to drink from the pool, and lo, just beneath his eye he saw a face looking up at him out of the water.

Narcissus leaped down and the face in the water seemed to come closer, but though he dipped his eye in the pool he could not touch the other. The foolish boy was happy, for he thought that what he saw in the water was the nymph or the fairy guardian of the pool.

But, though he begged the image to come out of the water and talk to him, of course it could make no reply.

Day after day Narcissus came to the pool to gaze at himself in the water. He forgot to eat, to drink, to sleep, and at last he faded away and died. But he did not really die, for from his body sprang a wonderful flower whose golden head hung over the pool as his head so often had done. The flower was called narcissus, and though I would not have you believe this story true, it may help you remember the name.

Children Cry for Fletcher's CASTORIA. The Kind You Have Always Bought, and which has been in use for over thirty years, has borne the signature of Dr. J. C. Fletcher, and has been made under his personal supervision since its infancy.

Vimy Ridge in Summer.

A year ago, writes Philip Giblin, the long range of Vimy Ridge was all bare, and while where it had been torn up by shell-fire not a blade of grass grew on its slopes. Now it is all a lush with scarlet poppies, mingled with clumps of cornflower-blue, and flowers that were in Shakespeare's England and the France of Troubadours, who wrote them to a tribal song. So it is along all our trench systems, and our men go up to it fighting their way through waves of mud and shell-fire.

It has been wiped clean of the map, there are roses blooming where once were cottage gardens, and it is only the new shell holes made by German gunners searching for batteries or parties of men going up 'he line, which clear away the tangled growth and cut down the plants now blooming over all our battlefields.

It is worth writing this perhaps, not because a bouquet of flowers makes shell-fire pleasant, but because it gives a picture to the people at home of the look of the country in which their men are living while they wait for the battles which must come before these blossoms have withered away.

Story of Narcissus.

(For Little Ones)

The daffodils and the jonquills all belong to the narcissus family and are among the first flowers to bloom in our gardens in the springtime. Daffodils do not grow wild in this country, though in some parts of southern Europe they do.

The name narcissus was given to the flowers by the Greeks. They had a story about them which you may like to hear.

Long ago, the Greeks' story ran there was a handsome lad named Narcissus. So beautiful was he that everyone who saw admired him. Most of his time was spent in wandering about the woods and fields alone.

One day he went to the woods to hunt. Tired and thirsty near the middle of the day, he looked about for a place to get a drink.

As he looked about he found a beautiful clear, deep pool. It was shaded by tall green trees, and the violet that grew by the water were the most lovely and fragrant of their kind.

Narcissus knelt to drink from the pool, and lo, just beneath his eye he saw a face looking up at him out of the water.

Narcissus leaped down and the face in the water seemed to come closer, but though he dipped his eye in the pool he could not touch the other. The foolish boy was happy, for he thought that what he saw in the water was the nymph or the fairy guardian of the pool.

The Story of the Stairs.

How do you go up stairs you best your state of health—the condition of your blood.

Do you arrive at the top of the stairs with a gasping, breathless and distressed? Do your knees ache? Do your feet ache? Do your head ache? Do your eyes ache? Do your ears ache? Do your nose ache? Do your throat ache? Do your chest ache? Do your stomach ache? Do your back ache? Do your arms ache? Do your legs ache? Do your hands ache? Do your feet ache? Do your hands ache? Do your feet ache?

Do you feel tired and exhausted? Do you feel weak and listless? Do you feel nervous and restless? Do you feel dizzy and giddy? Do you feel sick and nauseous? Do you feel hot and thirsty? Do you feel cold and shivery? Do you feel hungry and thirsty? Do you feel thirsty and hungry? Do you feel thirsty and hungry? Do you feel thirsty and hungry?

Former Wolfville Man Dead.

The following is taken from the Evening Budget, of Astoria, Oregon, of June 21st, kindly sent to THE ACADIAN by a friend in that city.

The gentleman referred to was in his younger days an esteemed citizen of Wolfville, and residents of that day will learn with sincere sorrow of his death. The writer remembers him as a prominent and enterprising business man, a member of the firm of Higgins, Crowe & Co.

Astoria is a day's journey from the town of Wolfville, and the late Mr. Higgins was a native of that town. He was born in Wolfville, Nova Scotia, on the 21st of March 1849, and was 69 years of age. At the age of 15 he entered the Wolfville Academy of Nova Scotia, and at the same time began working in his father's mercantile establishment, being employed therein until 21 years of age.

At that time he went to Halifax and secured a position as clerk with a mercantile concern, seeing in that capacity for three years. On the expiration of that period he went to Boston, Mass., and was there employed as clerk for a similar period. Returning to Wolfville, he became associated in business with his father and remained with him for five years.

Coming to Oregon in 1897 he settled in Astoria, where he was employed as bookkeeper by the firm of Badollet & Co., for five years, and also served at the same time as county school superintendent for a term. He was then appointed a special deputy in the custom service, under Cleveland's administration, holding that position for four and a half years. Subsequently he embarked in business with J. T. Ross, R. Z. Ferguson and H. C. Thompson, under the firm name of Ross, Higgins & Company, and for years remained an active factor in that concern. In January, 1903, he became cashier of the Astoria National Bank and for 15 years ably discharged the duties devolving upon him in that connection.

In 1913 on account of failing health, he resigned as cashier of the bank and in company with Mrs. Higgins he made a long trip to the Orient.

On November 29, 1918, Mr. Higgins was united in marriage to Isabelle J. Waser, of Halifax, Nova Scotia, who survives him. Uta Mr. and Mrs. Higgins were born five children, as follows: Margaret M., wife of Walter A. Stokes, who died a short time ago; Herbert A., who passed away at the age of 15 years; Minnie, who died when a little maiden of seven years; Edward A., treasurer of the Bee Hive Department Store of this city; Winifred, whose husband is Lieut. Colonel Richard Park, of Washington, D. C., now awaiting orders to sail for France.

For 12 years Mr. Higgins served as school director and also was a member of the cemetery commission. He had a deep and sincere interest in the progress and improvement, while to many measures for the public good he was a most generous contributor, and his death stands out as a distinct loss to this community.

Besides the relatives enumerated above he leaves to mourn him five grandchildren, three brothers and two sisters: Thomas, of Portland; William, merchant of Vancouver, Wash.; Chas. R., cashier of the Astoria National Bank; Minnie, the wife of George F. Baldwin, of Vancouver, B. C., and Linda, who lives with her sister.

At the time of his death he was vice-president of the Astoria National Bank, treasurer of Ross, Higgins & Co., and director of the Bee Hive Department Store.

The funeral will be held at 1:30 Friday and the interment will be in Ocean View cemetery.

The new tenant had rented the house and was about to sign the agreement. 'Of course,' said the agent, 'you understand there is no bathroom in the house.'

War Prophecy.

A lady reader of The Spectator in Philadelphia writes:

As I notice that you have had some interpretations of the scriptures in regard to the present war, it may interest you to know about a very clear sermon I heard on Sunday from the text in Micah, 4:3, last clause, and Isaiah, 2:4. He said that when God begins to work he works suddenly, and referred to Israel's first deliverance, 'Now shall thou see what I will do.' We are very near to the deliverance of Israel the second time. The times of the Gentiles began to end in 1914. It took 18 years for them to end. The captivity covered that time. The Jews were taken to Babel in 605 B. C. and were taken out in 539 B. C. The prophet mentioned the great 4th of July procession in Philadelphia headed by 10,000 Jews with the Liberty Bell being significant and remarkable. Isaiah 31:5 was literally fulfilled when General Allenby took Jerusalem, the armies taking a large part in the capture of the city. When all of Palestine is taken, England, France and America have promised the land to Israel. They will return in unbelief and when some great leader not yet in sight makes a covenant with them, count seven years and the Lord will come in His glory and we with Him. And just as Saul was converted and deny a nation of Saul will be converted and they will be the great world missionaries. This great leader, or anti-Christ, will treat them well the first three and a half years, but the last three and a half will be the worst in their history, just before the Lord's coming.—Annapolis Spectator.

This is to certify that fourteen years ago I got the cords of my left wrist nearly severed, and was to about nine months that I had no use of my hand, and tied other limbs. My doctor, and used one bottle which completely cured me, and have been using MINARD'S LINIMENT in my family ever since and find it the same as when I first used it, and would never be without it.

ISAAC H. MANN, Metepedia, P. Q. Aug. 1st, 1908.

I had lost their way in their new country.

'That's the sign, dear,' she said to her husband, who got out of the car and flashed his flashlight on the board.

'Are we on the right road?' she asked.

He read: 'To the Fourhouse.'

'Yes,' he answered. 'We're on the right road and we didn't know it.'

In his book, 'From Gallipoli to Bagdad,' Padre William Ewing tells the story of a busy Irishman brought into the field hospital suffering from many wounds.

'Who are you, my man?' asked the doctor.

'Sure, I'm half an Irishman.' 'And what's the other half?' 'Holes and bandages.'

Doctors: 'Did that cure for deafness help your brother?'

'Pat—Sure enough; he hadn't heard a sound for years, and the day after he took that medicine he heard from a blind in America.'

Members of English girls and colonial soldiers—Australians, Canadians, New Zealanders and South Africans—were taking place at the approximate rate of nearly 2,000 a month.

A Simple Proposition

Here is the McClary Sunshine Furnace proposition.

McClary's heating engineers will give you advice and estimates of cost of correct heating plant free. When you buy a furnace, McClary's engineers will give you proper plans for installing it the McClary way by which they will guarantee satisfactory results.

The first steel vessel built without rivets, so far as known, has just been launched on the south coast of England. The production of this vessel, it is considered, may mark a epoch in shipbuilding, the plates being fastened by electric welding in one process. General adoption of this process, it is held, would speed up production with an estimated saving of from 20 to 25 percent, in both time and material.

The United States Shipping Board, it is understood, has been in close touch with the experiment, with the result that arrangements are said to be in hand for the building of a number of 100,000-ton standard ships with electric welding.

Disease germs cannot live in rich red blood. It is a germ in low vitality that falls victim to germ disease. By using Dr. Chase's Nerve Food you enrich the blood, increase vitality and prevent disease germs from finding lodgment in your body. There's wisdom in prevention. It's easier to keep well than to get well.

It happened after a very recent advance. Our troops declared it was a treat to go over, so well had the artillery swept the ground. So impressed was a bystander at this statement that he inquired of an Irish soldier: 'Did you see any German dead at all?'

'Many's was the reply, 'why the whole place was alive with them!'

Necessity knows more law than a lot of lawyers. Things within reach come quickly to those who wait on themselves. Some men look upon religion as a sort of moral life escape.

Plenty of Labor.

IT IS A MATTER OF ADJUSTMENT AND ENTHUSIASM SAYS DR. C. A. RAYON. No—it isn't scarce; but it is wrongly adjusted. It has to be replaced and reorganized. Go into the average big hotel! What do you find? Thirty or forty waiters standing idle, while eight or ten wait on a few guests. Go out into the rotunda! What do you find? Half a dozen bell boys—men waiting on the chance of one jumping to do unnecessary service for some man. Go into the homes of the rich; and what? Men cooks in the kitchen, men assistant cooks, a butler, a footman, two or three chauffeurs! Go into the big government offices—what? The whole office cluttered up with clerks, who waste your time and money but accomplish nothing that could be done by a high school girl; and it is the same in the big business offices. These men don't mean to be slackers; but they have drifted into non-productive, useless, wasteful, extravagant jobs. Cut every man and every woman out of every non-productive job, and put them in essential productive work—yes, let the lady go into her own kitchen and do her own cooking and let some man for a man-sized job—and we'll have plenty of workers for all the essential jobs, and will have cut off besides a lot of non-essentials that have been sapping our manhood and womanhood. We talk of the war reorganizing Europe; but it is going to reorganize us from the luxury vices before it is over. It's Christ or the anti-Christ now, the millennium or the cesspool! There is no half way. We are going to come out a regenerated humanity; and the soul of America is going to rise to the occasion as the soul of England and France has—as the soul of the workers in our shipyards has! I haven't the slightest fear of there not being hands enough to do all our war work.

New Process in Shipbuilding.

The first steel vessel built without rivets, so far as known, has just been launched on the south coast of England. The production of this vessel, it is considered, may mark a epoch in shipbuilding, the plates being fastened by electric welding in one process. General adoption of this process, it is held, would speed up production with an estimated saving of from 20 to 25 percent, in both time and material.

The United States Shipping Board, it is understood, has been in close touch with the experiment, with the result that arrangements are said to be in hand for the building of a number of 100,000-ton standard ships with electric welding.

HUSBAND SAVES WIFE

From Suffering by Getting Her Lydia E. Pinkham's Vegetable Compound.

Pittsburgh, Pa.—'For many months I was not able to do my work owing to a weakness which caused backache and headaches. A friend called my attention to one of your newspaper advertisements and immediately my husband bought three bottles of Lydia E. Pinkham's Vegetable Compound for me. After taking two bottles I felt fine and my troubles caused by that weakness are a thing of the past. All women who suffer as I did should try Lydia E. Pinkham's Vegetable Compound.'

Mrs. J. A. Robinson, 620 Knapp St., N. S., Pittsburgh, Pa. Women who suffer from any form of weakness, as indicated by displacements, inflammation, ulceration, irregularities, backache, headache, nervousness, or 'the blues,' should accept Mrs. Robinson's suggestion and give Lydia E. Pinkham's Vegetable Compound a thorough trial.

For over forty years it has been curing such ailments. If you have mysterious complications write for advice to Lydia E. Pinkham Medicine Co., Lynn, Mass.
